

PRECAUTIONARY STATEMENT

HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS

"CAUTION": Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Personal protective clothing, normal work clothes (i.e., long pants, shoes plus socks, a long sleeved shirt) plus waterproof gloves for all handlers and a NIOSH/MSHA certified respirator during mixing and loading. Wash thoroughly with soap and water after handling. Avoid contamination of food and feed. Do not have container where children or animals may gain access.

FIRST AID

If swallowed:

- Call poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If on skin or in clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-207-2940 for emergency medical treatment information.

ENVIRONMENTAL HAZARDS

Do not discharge effluent containing this product into lake, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DISODIUM OCTOBORATE TETRAHYDRATE

A preservative for Protection and Treatment of Wood and Wood-Foam Composite Structural Components Against Decay Fungi and Wood-Destroying Insects.

ACTIVE INGREDIENT:

Disodium Octaborate Tetrahydrate99.98%

OTHER INGREDIENTS0.02%

TOTAL100.00%

KEEP OUT OF REACH OF CHILDREN

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal

PESTICIDE STORAGE: Store in a dry place. Do not store where children or animals may gain access.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

DIRECTIONS FOR USE: IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. DISODIUM OCTOBORATE TETRAHYDRATE IS A WATER SOLUBLE INORGANIC BORATE SALT FOR THE PROTECTION AND TREATMENT OF LUMBER AND WOOD-FOAM COMPOSITE STRUCTURAL COMPONENTS AGAINST DECAY FUNGI AND WOOD BORING BEETLES INCLUDING powder Post Beetles (Lyctidae), Furniture Beetles and Old House Borers (Anodidae), Longhorn Beetles (Gerambycidae). This treatment is not effective against wood staining fungi and may require mixing with compatible products. DISODIUM OCTOBORATE TETRAHYDRATE also controls Subterranean Termites (Reticulitermes, Coptotermes, Heterotermes), Dampwood Termites (Zootermopsis), Drywood Termites (Kaloterms, Incisitermes), and Carpenter Ants (Camponotus). DISODIUM OCTOBORATE TETRAHYDRATE is recommended for all interior and exterior wood and wood-foam composite structural components, which will be protected, from rain and not in direct contact with soil. The treatment of lumber is permanent even after cutting and finishing providing the wood is not exposed to moisture or in contact with the soil. This product is toxic to wood destroying insects but surface etching of treated wood and wood-foam composite structural components may occur.

PRESSURE TREATMENT: Pressure treatment must rigidly adhere to the current specifications of DISODIUM OCTOBORATE TETRAHYDRATE and/or those of the American Wood Preserver's Association (AWPA).

PRE-TREATMENT: Wood-foam composite structural components may be treated to prevent infestation of attacking organisms. Apply 10% aqueous solution of DISODIUM OCTOBORATE TETRAHYDRATE (1 lb/gallon solution). Solution may be applied by spray or brush until surface is thoroughly wetted (approximately 7-10 gallons per 1000 sq. ft.). Current DISODIUM OCTOBORATE TETRAHYDRATE and/or American Wood Preserver's Association specifications and test methods should be followed to ensure adequate chemical loadings in wood.

PRE-TREATMENT of Polystyrene beads prior to expansion. Mix DISODIUM OCTOBORATE TETRAHYDRATE dry chemical 3% to 5% by weight to the dry polystyrene beads and process in normal manner to manufacturer Polystyrene insulation.

Note: A quart or 32 oz. Container loosely packed equals **one pound**.

NOTICE: Because of many varying conditions affecting use and application, manufacturers warns buyer that these may impair or vary the results of the use of this product. In any event, complete prevention of decay by fungi or other organisms is not guaranteed. Neither manufacturer nor seller shall be liable in respect to any injury or damage suffered by reason of the use of this product for purpose not indicated by the label or when used contrary to the directions or instructions hereon nor with respect to breach of any warranty not expressly specified herein. Buyer accepts this material subject to these terms, assumes all risk of usage and handling except when used or handled in accordance with this label. Neither manufacturer nor seller, makers, and their employees and agents are permitted to make, any representations or warranties, express or implied by law, not specifically set forth herein.
