HOT LINE NUMBER	
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-424-9300 for emergency medical treatment information.	
NOTE TO PHYSICIAN	
Chlorpyrifos is a cholinesterase inhibitor. Treat symptomatically. If exposed, plasma and red blood cell cholinesterase tests may indicate degree of exposure (baseline data are useful). Atropine, only by injection, is the preferable antidote. Oximes, such as 2-PAM/protopam, may be therapeutic if used early; however, use only in conjunction with atropine. In case of severe acute poisoning, use antidotes immediately after establishing an open airway and respiration.

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION**

Harmful if swallowed, inhaled or absorbed through the skin. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Avoid breathing dust.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Waterproof gloves
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is extremely toxic to fish, birds, and other wildlife. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. Cover or incorporate spills. Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

The maximum application rate per application of Chlorpyrifos Pro 0.5% Mole Cricket Bait is 1 lb. ai/A.

Use Chlorpyrifos Pro 0.5% Mole Cricket Bait for control of chinch bugs, sod webworms (lawn moths), ants, brown dog ticks, field crickets, mole crickets, cutworms, earwigs, sowbugs (pillbugs), certain white grubs* and hyperodes (turfgrass) weevils** infesting golf course turf and ornamental turf, on road medians, and industrial plant sites.

Keep children, pets and other unprotected persons out of the treated areas until dusts have settled or the bait is thoroughly watered in and the turf is dry.

NOT FOR USE IN RESIDENTIAL AREAS.

Apply Chlorpyrifos Pro 0.5% Mole Cricket Bait uniformly to golf course turfgrass, road medians and industrial plant sites using any hand or power operated gravity or rotary type spreader designed for application of granular materials. Treat when insects first appear using Chlorpyrifos Pro 0.5% Mole Cricket Bait at the rate of 200 pounds per acre. Apply 1/2 the required amount of product in one direction; then apply the balance at a right angle to the original application to aid in uniform distribution of the product.

For control of chinch bugs, cutworms, earwigs, sod webworms (lawn moths), sowbugs (pillbugs), certain white grubs* and hyperodes (turfgrass) weevils**, immediately after application, sprinkle the turf with 1300 gallons of water per acre to wash the granules into the zone of insect infestation. Refer to the following table to determine the amount of Chlorpyrifos Pro 0.5% Mole Cricket Bait and water needed for smaller sized areas. Repeat as necessary.

RATES TO USE		
Area to be Treated	Pounds of Chlorpyrifos Pro 0.5% Mole Cricket Bait	Gallons of Water to Sprinkle on Turf***
1,000 sq. ft.	4.5	30
5,000 sq. ft.	22.5	150
10,700 sq. ft.	48	325

*To control certain white grubs (larvae of European chafer and Japanese beetle) use two to four times the amounts of Chlorpyrifos Pro 0.5% Mole Cricket Bait shown in the table, i.e., 2 to 4.5 pounds per 1,000 sq. ft. Apply the granules uniformly over the area to be treated followed immediately by thorough watering to wash the insecticide into the turf. For best results, treat when grubs are young and actively feeding near the soil surface, usually during late July and August. Consult your local Agricultural Extension Service specialist for proper time to treat in your area.

**To control hyperodes (turfgrass) weevils, use twice the rate of Chlorpyrifos Pro 0.5% Mole Cricket Bait shown in the table. Treat suspected problem areas in mid-April and again in mid-May. Consult your local Agricultural Extension Service specialist for best time to treat in your area.

***Water in bait for control of chinch bugs, sod webworms (lawn moths), cutworms, earwigs, sowbugs (pillbugs), certain white grubs, and hyperodes weevils.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container in a cool, dry place.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

CONDITION OF SALE AND LIMITATION OF WARRANTY AND LIABILITY
