Arch Chemicals Inc Agent for Splashes Inc
5660 New Northside Drive Suite 1100
Atlanta GA 30328

Subject **Chlorine Free Splashes Santizer**
EPA Registration Number 81002 2
Notification Date February 25 2010
EPA Receipt Date March 3 2010

Dear Dr French

The following amendment submitted in connection with registration under section 3(c)(7)(A) of the Federal Insecticide Fungicide and Rodenticide Act (FIFRA) as amended is acceptable with the conditions listed below

- Updating Container Disposal statement

Conditions

Revise the label as follows

- On page 1 under the STORAGE AND DISPOSAL section revise the nonrefillable container household/residential use container handling language to read as follows

Nonrefillable container Do not reuse or refill this container Securely wrap original container in several layers newspaper and discard in trash or offer for recycling if available
- At the top of page 2 under the STORAGE AND DISPOSAL section remove the entire first paragraph (refillable container – household/residential use) This product is not sold in refillable containers Therefore you can not have storage and disposal language for refillable containers on your label
- The Directions for Use indicate that the product may be used for both residential and public swimming pools and spas Therefore you will need to add STORAGE AND DISPOSAL language for commercial pools Please consult chapter 13 or the label review manual for guidance

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling

{Use 1 Swimming Pools}

TREATING POOL

POOLS PREVIOUSLY TREATED WITH CHLORINATING CHEMICALS

Important [Chlorine Free Splashes¹ Sanitizer is incompatible with chlorinating chemical products Consult your Splashes retailer for information on balancing your pool water Note if the pool is a plaster pool add 1 ¼ lbs of Splashes Metal Control per 10 000 gallons of water after the chlorine has been neutralized and allow pump/filter to operate for 8 12 hours

Check with chlorine test kit for free and combined chlorine prior to the beginning of neutralization To destroy chlorine add 1 gallon of Chlorine Free Splashes Shock (27% hydrogen peroxide) per 10 000 gallons of pool water Filter overnight Check with chlorine test kit If free chlorine is detected repeat neutralizer treatment

FRESHLY FILLED AND DECHLORINATED POOLS

START UP WITH SPLASHES

Note If the pool water contains algae or is hazy consult the problem solving section of Splashes Pool Care Guide available from your Splashes retailer

Backwash or clean pool filter Check pool pH adjust to 7.2–7.8 if necessary

Add Chlorine free Splashes Sanitizer to give a content of 50 ppm (¾ gallon product/15 000 gallons of pool water)

After 24 hours check pH and Chlorine free Splashes Sanitizer concentration with biguanide test strips and adjust if necessary

NORMAL POOL ROUTINE

Every week check Chlorine Free Splashes Sanitizer concentration and pH

Maintain Chlorine Free Splashes Sanitizer concentration at about 50 ppm If concentration falls 10 ppm or more add a top up dose The level must not be allowed to drop below 30 ppm For example to raise the Splashes Sanitizer level 10 ppm add 1 pint per 10 000 gallons of water Consult the Splashes Pool Care Guide for calculation instructions

NOTE Chlorine Free Splashes Sanitizer and chlorine are incompatible Refer to Splashes Pool Care Guide for information on how to deal with accidental chlorination

PROBLEM SOLVING AND SUPPLEMENTAL POOL INFORMATION

Do not use in freestanding spas/hot tubs Do not use in unpainted plaster pools previously exposed to metals which may cause staining [See current Pool Care Guide for specific information] Chlorine Free Splashes Sanitizer is not compatible with many detergents and some supplemental algicides such as those based on copper If algae development cloudiness or pool problems occur or additional information on water quality is desired consult Splashes Pool Care Guide available from your Splashes retailer

¹ From this point forward the term SPLASHES may be replaced by either an EPA approved alternate brand name or This product
