Subject: EPA Reg. No. 81880-6/ Yukon Herbicide Supplemental Labeling for Post Harvest  
Burndown, Crop Stubble, and Fallow Ground

Dear Ms. Butcher:

The labeling referred to above, submitted in connection with registration under the Federal  
Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable.

Amended labeling will supercede all previous accepted ones. A stamped copy of labeling is  
enclosed for your records. If you have any questions please call Erik Kraft at 703-308-9358.

Sincerely,

A handwritten signature in black ink, appearing to read "James A. Tompkins", written over a circular stamp.

<sup>1</sup> Suppression

<sup>2</sup> Biotypes of these weeds are known to exist that are resistant to ALS-inhibitor herbicides. Reduced control with YUKON Herbicide may be seen from these populations. The use of higher rates of YUKON Herbicide or tank mixing with additional modes of herbicide action may be necessary to achieve complete control.

\* Use 6 to 8 ounces for best results.

Use the higher rates for heavy weed infestations or weeds close to the maximum height for control.  
Refer to the "Mixing Instructions" section of the EPA label for guidelines on surfactant use.
