OFFICE OF  
PREVENTION, PESTICIDES  
AND TOXIC SUBSTANCES

Ms. Heather R. Bjornson  
Regulatory Assistant for,  
Copper Development Association  
260 Madison Avenue  
New York, New York 10016

Mail to: Heather R. Bjornson  
Technology Sciences Group, Inc.  
1150 18<sup>th</sup> Street, N.W.  
Suite 1000  
Washington, D.C. 20036

Subject: Antimicrobial Copper Alloys Group IV  
EPA Registration Number 82012- 4  
Your Amendment Dated February 4<sup>th</sup>, 2009  
EPA Received Date February 9<sup>th</sup>, 2009

The amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, FIFRA, as amended, to add revise the product labeling by adding additional use sites to the product labeling is acceptable, provided you make the following changes:

Revise the labeling claim, "When cleaned regularly, Antimicrobial Copper Alloys kills .....after repeated contamination", to read as follows: "When cleaned regularly, Antimicrobial Copper Alloys kill greater than 99.9% of bacteria\* within two hours, and continues to kill 99% of bacteria\* even after repeated contamination."

The following use sites must be deleted where ever they appear on the product labeling and hang tag label:

Bedside pitchers  
Toothbrush holder  
Cup holder

These use sites are considered food contact surfaces.

2 of 14

A clear description of cup holder and bowl stand must be provided to the Agency before these claims can be accepted.

Provide the Agency with the frequency of times a parent, caregiver, and/or employee in a nursery would clean or follow cleaning procedures as per the use pattern of Baby cribs: rails, fittings, brackets, supports. These surfaces would have to be cleaned on a scheduled basis in order to comply with the Agency's labeling requirements for Copper Alloy products. Please note that the product claims continuous and ongoing bacterial action when scheduled cleaning practices and methods are followed.

A stamped copy of the labeling is enclosed for your records.

If you have questions concerning this letter, please contact Karen M. Leavy at (703)-308-6237.

Sincerely,

Marshall Swindell  
Product Manager 33  
Regulatory Management Branch I  
Antimicrobial Division(7510P)

**Sublabel I : Complete Label**

**ANTIMICROBIAL COPPER ALLOYS GROUP IV<sup>+</sup>**

\*NOTE: Product labels will bear the name of a copper alloy specified in the approved registration. Distributors may substitute a Product Brand Name in place of the name of the copper alloy on the label.

Laboratory testing has shown that when cleaned regularly:

[This surface continuously reduces bacterial\* contamination, achieving 99.9% reduction within two hours of exposure.]

[This surface kills greater than 99.9% of Gram-negative and Gram-positive bacteria\* within two hours of exposure.]

[This surface delivers continuous and ongoing antibacterial\* action, remaining effective in killing greater than 99.9% of bacteria\* within two hours.]

[This surface kills greater than 99.9% of bacteria\* within two hours, and continues to kill 99% of bacteria\* even after repeated contamination.]

[This surface helps inhibit the buildup and growth of bacteria\* within two hours of exposure between routine cleaning and sanitizing steps.]

\* Testing demonstrates effective antibacterial activity against *Staphylococcus aureus*, *Enterobacter aerogenes*, Methicillin-Resistant *Staphylococcus aureus* (MRSA), *Escherichia coli* O157:H7, and *Pseudomonas aeruginosa*.

The use of a Copper Alloy surface is a supplement to and not a substitute for standard infection control practices; users must continue to follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces. The Copper Alloy surface material has been shown to reduce microbial contamination, but it does not necessarily prevent cross contamination.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

[The directions in bracketed text below may be included in an insert. If so, there will be a statement to see the insert for additional directions for use of the product.]

[Directions for Use in the insert also may include installation and operation instructions, user manuals, and similar instructional materials appropriate for the end use product. No additional pesticidal claims will be made as part of these materials.]

***Proper Care and Use of Antimicrobial Copper Alloys:*** The use of Antimicrobial Copper Alloys does not replace standard infection control procedures and good hygienic practices. Antimicrobial Copper Alloys surfaces must be cleaned and sanitized according to standard practice. Health care facilities must maintain the product in accordance with infection control guidelines; users must continue to follow all current infection control practices, including those practices related to disinfection of environmental surfaces.

Copper Alloy surfaces may be subject to recontamination and the level of active bacteria at any particular time will depend on the frequency and timing of recontamination and cleanliness of the surface (among other factors). In order for the copper alloy surface to have proper antimicrobial effect, the product must be cleaned and maintained according to the directions included on this label.

**This product must not be waxed, painted, lacquered, varnished, or otherwise coated.**

Routine cleaning to remove dirt and filth is necessary for good sanitation and to assure the effective antibacterial performance of the Antimicrobial Copper Alloy surface. Cleaning agents typically used for traditional touching surfaces are permissible; the appropriate cleaning agent depends on the type of soiling and the measure of sanitization required. [Normal tarnishing or wear of Antimicrobial Copper Alloy surfaces will not impair the antibacterial effectiveness of the product.]

This product can not be used for any direct food contact or food packaging uses.

[Antimicrobial Copper Alloys may be used in hospitals, other healthcare facilities, and various public, commercial, and residential buildings for the non-food contact surfaces listed below.] [The following statement will appear on the label if the use involves potential exposure to outdoor conditions: Surfaces that may be exposed to outdoor environmental conditions (e.g., handrails, shopping carts, child seats and ATM machines) are not representative of indoor laboratory test conditions, and therefore, may impart reduced efficacy when cleaned when visibly soiled.]

***Healthcare Facilities***
