U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Registration Division (7505P)
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

EPA Reg. Number: 82308-3
Date of Issuance: 11-5-07

Term of Issuance: Conditional

Name of Pesticide Product:

Glyphosate 2% RTU

NOTICE OF PESTICIDE:
 Registration
 Reregistration
(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

DeAngelo Brothers Inc.
100 North Conahan Drive
Hazleton, PA 18201

Note: Changes in labeling differing from the above registration number may be submitted to and accepted by the Registration Division. The registrant is responsible for the accuracy of the labeling. Always refer to the above EPA registration number.

On the Basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A) provided you agree in writing to:

- To the Warranty section change "Buyer assumes all..." to "To the extent consistent with applicable law, buyer assumes all..."
- To the Storage and Disposal section change "Storage" to "Pesticide Storage" and "Disposal" to "Pesticide Disposal".

Signature of Approving Official:

James Tompkins, Product Manager (25)
Herbicide Branch, Registration Division (7505P)

Date:

4/5/07

EPA Form 8570-6

You will submit one copy of your final printed labeling before you release the product for shipment. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). A stamped copy of labeling is enclosed for your records. If you have any questions please contact Erik Kraft at 703-308-9358.

GLYPHOSATE 2% RTU

Contains Glyphosate, the same active ingredient in RoundUp®

Ready-to-Use

ACCEPTED
with COMMENTS
in EPA Letter Dated

4-5-07
Under the Federal Insecticide,
Fungicide, and Rodenticide Act
as amended, for the pesticide
registered under EPA Reg. No.

82308-3

- [For Nonselective Postemergent Weed Control]
- [Covers Approximately 650 sq. ft. (24 fl. oz.)]
- [Systemic Weed and Grass Killer for Spot Treatment of Unwanted Weeds and Grasses]
- [Kills Weeds and Grasses Listed on This Label]
- [Will Not Remain In the Soil]
- [Weeds Start to Die in Less than 24 Hours]
- [Fast Acting Formula - Starts to Work in Hours]
- [Kills to the Root]
- [Kills Weeds Roots and All in 1 - 2 Weeks]
- [Rainproof in Hours]
- [For Use Around Flower Beds, Trees, Shrubs, Fences, Walks, Mulch Beds, Gravel and Driveways]
- [May be Used for Vegetable Garden Weed Control]
- [Kills Tough Brushy Weeds]
- [Kills Tough Weeds like Poison Ivy and Poison Oak]

For Outdoor Residential Use Only

ACTIVE INGREDIENTS:

Glyphosate, isopropylamine salt 2.0 %

OTHER INGREDIENTS: 98.0 %

Net Contents: 24 fl. oz. (709 mL) or 1 Gal. (3.78 L)

EPA Reg. No. 82308-XXX

EPA Est. No. XXXXX-XX-XXX

KEEP OUT OF REACH OF CHILDREN

CAUTION

See [Side Panel][Back Panel Booklet] for Additional Precautionary Statements

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BEFORE YOU USE read and follow all directions for use on this label.

GLYPHOSATE 2% RTU is a fast-acting, ready-to-use product that effectively kills unwanted weeds, grass, vines and brush - roots and all. It can be used on & around walkways, driveways & patios, in flower beds, vegetable & herb gardens and around fences, buildings, trees & shrubs. **GLYPHOSATE 2% RTU** also controls hard-to-kill weeds such as poison ivy, poison oak & blackberry.

IMPORTANT

- **GLYPHOSATE 2% RTU** will kill or injure all green vegetation contacted. If a desirable plant is accidentally sprayed, immediately rinse it off with plenty of water.
- Apply when wind is calm.
- Keep people and pets off treated areas until spray has dried to avoid tracking the product onto desirable plants (such as lawns).
- This product is not recommended for spot weed control in lawns since it also kills lawn grasses. To control these weeds without harming the lawn, use a selective herbicide such as [product to be inserted by distributor].
- All ornamental flowers, trees & shrubs as well as the following berries, fruits, vegetables and herbs may be planted 1 day after application: artichoke (Jerusalem), beans (all), beet greens, blackberry, blueberry, boysenberry, broccoli, Brussels sprout, cabbage (all), carrot, cauliflower, celery, chard (Swiss), chicory, collards, currant, dewberry, elderberry, endive, gooseberry, horseradish, huckleberry, kale, kohlrabi, leek, lentil, lettuce, loganberry, mustard greens, okra, dallieberry, onion, parsley, parsnip, potato, radish, rape greens, raspberry (black & red), rhubarb, rutabaga, spinach, sweet potato, turnip, & yams. These fruits, vegetables and herbs may be planted 3 days after application: corn, cucumber, eggplant, garlic, gourds, melons (all), pea (all), pepper (all) pumpkin, squash (summer & winter), tomatillo, tomato (by seed), & watercress.
- Tomatoes from transplants and all berries, fruits, vegetables and herbs not listed in the previous 2 bullet points may be planted 30 days after application.
- If used to control weeds around berries, wait 14 days after the last application before harvesting.

HOW IT WORKS

GLYPHOSATE 2% RTU is a nonselective systemic herbicide that is absorbed by plants through the leaves and then moves into the root system, killing weeds by inhibiting the ability to produce amino acids necessary for the plants survival. Excess product that is not absorbed by the plant breaks down into natural materials which will not move into or on the soil to desirable plants. Weeds will yellow and wilt within hours and will be completely killed in 1 to 2 weeks.

HOW TO USE**Shake well before using.**

For best results, apply to actively growing weeds. Apply on sunny days with daytime temperatures above 60 °F. Rain or watering 2 hours after application will not wash away effectiveness. Adjust nozzle to a coarse spray. Spray the weeds or grasses you want to kill until thoroughly wet but not dripping.

Note: To protect desirable plants from contact with this product, use a piece of cardboard or plastic. Keep children and pets off treated areas until sprays have dried.

To Kill Vines:

- For vines growing up non-living objects, such as poles & fences, or tree trunks with mature bark, cut the vines to a height of 3 - 4 feet and spray thoroughly.
- For vines growing up shrubs or trees with green bark, cut the vines at their base and spray thoroughly.

To Kill Brush:

- For brush taller than 5 feet, cut to the ground and spray regrowth.

To Kill Stumps:

- Cut living stump close to the ground,
- Immediately spray all remaining surfaces thoroughly.

KILLS

Alder	Dog Fennel	Maple	Sowthistle
Artichoke.	Elderberry	Mayweed	Spotted Spurge
Jerusalem	Elm	Milkweed	Sprangletop
Bahiagrass	Evening Primrose	Mock Orange	Spurge
Barberry	Fall Panicum	Mouseear Chickweed	Sumac
