### Personal Protective Equipment (PPE)

Applicators and other handlers must wear long-sleeved shirt and long pants, shoes plus socks. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables are given, use detergent and hot water. Keep and wash PPE separately from other laundry.

### User Safety Recommendations

**Users should:** Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove clothing immediately if pesticide gets inside, then thoroughly wash and put on clean clothing.

### Environmental Hazards

For terrestrial uses, do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Woody vegetation may be controlled by injection of EZ-Ject™ selective injection herbicide shells. This product is recommended for woody brush, tree and vine control on the following sites: forestry, roadsides, rights-of-way, industrial, residential, fencerows, railroads and standing water and wetlands. For trees and brush in standing water or wetlands this product may be injected only into stems above the water level. Do not apply directly to water or inject into stems below the water level.

This product moves throughout the tree from the point of injection to all roots and shoots. Symptoms appear gradually (normally within 2 to 4 weeks) beginning with wilting, yellowing and browning of the foliage. This is followed by deterioration of all roots and shoots.

Inject the shells using only the EZ-Ject™ shell injection equipment. The shells must penetrate through the outer bark into living phloem tissue to provide effective results. For trees with less and 2.5 inch DBH (diameter at breast height), inject one shell per stem. Inject one shell every 4 inches, evenly around the trunk of the tree, below all major branches. Tree may be injected at any time of the year except when wood is frozen.

The species of woody brush, trees and vines controlled by this product include:

Dear Mr. Tompkins:

**Subject:** EZ-Ject™, Inc.  
Imazapyr - EZ-Ject  
EPA Reg. No. 83220-2

On behalf of **EZ-Ject, Inc.**, RegWest Company, LLC is submitting the attached materials as a notification of label revision and final printed labeling for subject product. RegWest will act as sole agent in this endeavor.

Attached are the following:

1. Application for Pesticide: Other (Notification)
2. One **Reference Label** (illustrating the revision)
3. One **New Label** (incorporating the revision)
4. Three final printed labels

We are making one label revision and that is to change the name of the active ingredient from

Imazapyr (CAS No. 81510-83-0)

to

Isopropylamine salt of Imazapyr  
(2-[4-5-dihydro-4-methyl-4-(1-methylethyl)-5-oxo-1H-imidazol-2-yl]-3-pyridinecarboxylic acid)

This revision is necessary to remain consistent with our Imazapyr source product.

Please contact me at (970) 353-0611 or [kim@regwest.com](mailto:kim@regwest.com) if you require additional information or have any questions.
