UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

JUL 11 2007

Mr. Robert Brennis
Agent for Mionix Corporation
Lewis & Harrison
122 C Street, N.W., Suite 740
Washington, D.C. 20001

SUBJECT: Mycotek
EPA Registration Number: 83607-1
Application Dated: April 30, 2007
Receipt Date: May 3, 2007

Dear Mr. Brennis:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable with the conditions listed below:

Label Comments

Make the following changes to your labeling:

A. Make the following revision to page two:

Correct the last statement of the Environmental Hazards statement to read: "...For guidance contact your State Water Board *or* Regional Office of the EPA."

B. Make the following revisions to page three. Most of these revisions are to bring your label into agreement with PR Notice 2000-5 which identifies mandatory and advisory language as follows:

1. Revise the first set of "Dosing Application" instructions to read: "...This product *is to* be fed as early as..." and "...Additions of this product *are* made at a point in the system..."

2. Revise the section immediately following: "Control of Bacterial/Fungi and Algae on Pulp, Paperboard, Wallboard & Wet Lap" to read: "...which causes discoloration, *odor* and degradation..."

3. Revise the section which follows to read: "Application of this product *is* made at a point in the system where mixing action is good..."

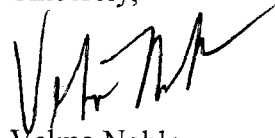

4. Revise the final section on this page to read: "...sheet pulp, this product *is* applied to the dewatered pulp surfaces via..."

General Comments

A stamped copy of the accepted labeling is enclosed. Submit one (1) copy of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions concerning this letter, please contact Tracy Lantz at (703) 308-6415.

Sincerely,

Velma Noble
Product Manager (31)
Regulatory Management Branch I
Antimicrobials Division (7510P)

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER. Corrosive. Causes irreversible eye damage and skin burns. May be fatal if swallowed. Harmful if absorbed through the skin. Do not get into eyes, on skin or on clothing. Wear goggles or face shield, protective clothing, and rubber gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARD

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS.

Do not mix with soap, anionic detergents or oxidizers.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

Pesticide Storage: Open dumping is prohibited. Store only in original container. Do not reuse empty container. Keep this product under locked storage sufficient to make it inaccessible to children or persons unfamiliar with its proper use.

Pesticide Disposal-Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

Container Disposal

Triple rinse (or equivalent), then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Do not use water containing residues from use of this product to irrigate crops for food or feed.

5/5

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PULP AND PAPER/WALLBOARD

Slimicide Applications

This product is for use as a slimicide in the manufacture of paper and paperboard that contacts food. Depending on the type of stock quality of raw water, complexity of the system, and degree of contamination. Apply 0.4 to 80 pounds of this product per ton (dry basis) of pulp or paper produced. If this product is used to treat whitewater alternatively apply 0.8 to 160 pounds of this product per 100,000 gallons of whitewater to be treated (1.0 to 200 ppm).

Dosing Application: This product is to be applied at a point in the system where it will be uniformly mixed, such as at the suction side of a pump. This product should be fed as early as possible in the system. Additions of this product should be made at a point in the system where mixing action is good. Suitable sites are the hydropulper, suction side of the machine chest or broke system pump. Badly fouled process systems must be cleaned before initial treatment.

Control of Bacterial, Fungi/Mold and Algae on Pulp, Paperboard, Wallboard & Wet Lap

This product is used to inhibit bacteria, fungi/mold and algae growth, which causes discoloration, odor and degradation in paper, paperboard, wallboard or wet lap.

Application of this product should be made at a point in the system where mixing action is good. Application can also be made at the size press or water box. Apply at a rate of 0.4 to 80 pound of this product per ton (dry basis) of pulp, paperboard, or wallboard produced.

Dosing Application: This product may be drip fed continuously from the drum, diluted and showered to the wet sheet or fed by suitable pumps.

For inhibition of bacteria, fungi/mold and algae growth which causes discoloration, odor and degradation on wet lap or sheet pulp, this product should be applied to the dewatered pulp surface via applicator rolls or showers. Application can also be made at the size press or water box.
