**DIRECTIONS FOR USE:**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Product EP 10% is a stable broad-spectrum biocide that is effective over a wide pH range (pH 3- pH 11). Product EP 10% can be added at any stage in the processing. It is stable and retains its efficacy at processing temperatures up to 572° F (300° C). Product EP 10% is compatible in a wide range of formulations, and it is unaffected by the presence of particulate matter and most surfactants. Typical applications and the suggested range of concentrations are outlined in the technical datasheet; however, formulations vary and it is essential when first using Product EP 10%, to first challenge test formulations before deciding on an optimum concentration.

Product EP 10% suppresses the growth of algae, mold, mildew, fungi, and bacteria which cause unpleasant odors, discoloration, staining, deterioration or corrosion only. Manufactured products incorporating Product EP 10% may not make any public health claims relating to antimicrobial activity without first obtaining an EPA registration for the manufactured product which permits such claims. When incorporated into treated articles, this product does not protect users of any such treated articles or others against food borne or disease causing bacteria, viruses, germs, or other disease causing microorganisms.

Maximum Use Rate: 20,000 ppm of product (400 ppm of silver chloride) by weight of goods (equivalent to 5 lb of product to 100 lb of goods).
