Naples, FL 34108

Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 – revise marketing statement
Product Name: Wasp Hornet Yellowjacket Attractant System
EPA Registration Number: 84565-3
Application Date: 6-5-21
OPP Submission Number: 1070714
OPP Case Number: 00305022

Dear Ms. Smith:

The U.S. Environmental Protection Agency (EPA) is in receipt of your application for notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Biopesticides and Pollution Prevention Division (BPPD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped “Notification” and will be placed in our records. You must submit one (1) copy of the final printed labeling with the modifications.

Should you wish to add/retain a reference to your company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA-approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance Assurance.

Notes:

- The **WASP HORNET YELLOWJACKET TRAP SYSTEM** contains three attractants, each with one active ingredient:
 - Heptyl butyrate (99.8%);
 - 2-Methyl-1-butanol (59.75%); and
 - Acetic acid (8.0%).
- The **AAA TRAP FOR WASPS, HORNETS & YELLOWJACKETS** includes the trap and the three attractants.
- The **AAA WASP HORNET YELLOWJACKET ATTRACTANT KIT** is the attractant refill for the AAA TRAP FOR WASPS, HORNETS & YELLOWJACKETS and contains the three attractants without the trap.

1 VIAL NET WT: 0.05 oz	Active ingredient: 2-Methyl-1-butanol 59.75% Other ingredients 40.25% Total 100.00%
1 GREEN TUBE NET WT: 0.88 oz	Active ingredient: Acetic Acid 8.0% Other ingredients 92.0% Total 100.0%

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

Caution. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling. Remove and wash contaminated clothing before reuse. This product contains wasp, hornet and yellowjacket attractant. Wasp, hornet and yellowjacket stings can cause allergic reactions and death. Seek immediate medical attention if stung and an allergic reaction occurs.

FIRST AID	
If in Eyes:	<ul style="list-style-type: none">• Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.• Call a poison control center or doctor for treatment advice.
Have the product container or label with you when calling a poison control center, doctor, or going for treatment. For emergency information concerning this product, call the National Pesticides Information Center (NPIC) at 1-800-858-7378 seven days a week, 6:30 AM to 4:30 PM Pacific Time.	

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For residential, commercial, and agricultural use. For non-food use only.

Do not hang trap if you are allergic to wasp, hornet or yellowjacket stings.

INITIAL SETUP

1. Remove twist-tie and enclosed Attractant Vial and Green Attractant Tube from top chamber.
2. Remove Yellow Attractant Tube from bottom chamber, but leave the cone in place and leave the felt pad in the center of the bottom cap.
3. Bait the bottom chamber first:
 - a. Cut tip of Yellow Attractant Tube and carefully empty contents onto felt pad.
 - b. Screw bottom cap back in place and set trap on a flat surface.
4. Next, bait the top chamber:
 - a. Remove Attractant Vial from its plastic pouch.
 - b. Pop open lid to Attractant Vial and snap into one of three notches next to the cone in the trap top cap. (Figure 1)
 - c. Cut tip of Green Attractant Tube and carefully pour liquid into top chamber.
 - d. Add water to top chamber so solution reaches the Start Line. Add 1-2 drops dishwashing liquid to the water mixture*.
 - e. Thread twist-tie through hole on top cap.
 - f. Screw top cap back on and hang trap outdoors. (Figure 2)
5. Wash hands with soap and water.

1. AAA TRAP FOR WASPS, HORNETS & YELLOWJACKETS, AND

2. AAA WASP HORNET YELLOWJACKET ATTRACTANT KIT

June 5, 2021 Proposed Notification Master Label

Based upon the September 23, 2020 Stamped Accepted Master Label

(Changes Are Noted)

Trap Placement:

1. Hang trap outdoors, at least 20 feet away from plants grown for food or feed, building entries, and any known wasp, hornet or yellowjacket nests. Hang traps in late evening or early morning when wasps, hornets and yellowjackets are less active.
2. In extreme hot and dry weather, hang trap in the shade.

Top Chamber:

* Adding dishwashing liquid to the water mixture in the top chamber will coat the insects' wings and make it harder for them to fly once trapped. In hot and dry weather, liquid level in top chamber may evaporate below the Start Line before the attractant is due to be replaced. Do not add additional water to bring the liquid back up to the start line, as it will reduce attractant effectiveness.

Use Rate:

Use 2-4 traps for a 10,000 square foot area, or 8 to 16 traps per acre. For areas with heavy infestation, use a maximum of 48 traps per acre.

Reusing the Trap:

The attractants in the AAA [Trap] [Attractant Kit] are designed to last 2 weeks. AAA [Trap] [Attractant Kit] refills, which last an additional 2 weeks, should be available for purchase wherever the AAA trap is sold. Refills are also available through various online retailers; please visit www.____.com for details.

1. Check to make sure all trapped insects are dead.
2. Empty dead insects and wipe insect residue from trap. (Top chamber cannot be emptied of insects without replacing the attractant.)
3. Keep felt pad in center of bottom cap to use with the Trap Refill. If pad is accidentally thrown away, a cotton ball can be used in its place.
4. Follow directions for baiting the bottom and top chambers in the initial setup instructions.

(Changes Are Noted)

Catching the Queens:

Wasp, hornet and yellowjacket queens hibernate during the winter, then emerge to look for nest sites. Paper wasp queens are the first to emerge, usually in late winter. Hornet and yellowjacket queens emerge later, during the first warm days of spring. When you use the AAA Trap at that time, you can capture some queens and reduce the likelihood that a nest will be established nearby. Insects caught this early in the season may not be numerous, but each queen captured represents one less nest later on. Once queens begin nest building, the AAA Trap may have periods of lower catches until worker populations grow.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in a cool, dry, well-ventilated location out of reach of children and pets.

DISPOSAL: Deposit used attractant and attractant packaging in trash for collection. Wash hands with soap and water.
