DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

1. Remove bottom cap of trap.
2. Cut and remove clear plastic surrounding attractant cartridge.
3. Insert cartridge, vented end up, into center receptacle of bottom cap.
4. Reassemble and hang trap.
5. Wash hands with soap and water.

Use Rate: Use 2-4 traps for a 10,000 square foot area or 8 to 16 traps per acre. For areas with heavy infestation, use a maximum of 48 traps per acre.

CAUTION: Due to the extreme effectiveness of the attractant, use caution when placing and maintaining traps. Place and maintain traps in late evening or early morning when yellowjackets are less active. People allergic to yellowjacket stings should allow others to place and maintain traps for them. Yellowjacket stings can be fatal.
