1. Cut plastic on top at dotted line.
2. Pull open and attach string or wire.
3. Add water to fill line on bag. Attractant pouch inside will dissolve and activate within 2-5 hours.
4. Hang outdoors away from human activity, and at least 20 feet from a known yellowjacket nest.

**Use Rate:** Use 2-4 traps for a 10,000 square foot area or 8 to 16 traps per acre. For areas with heavy infestation, use a maximum of 48 traps per acre.

**CAUTION:** Due to the extreme effectiveness of the attractant, use caution when hanging traps. Place traps in late evening or early morning when yellowjackets are less active. People allergic to yellowjacket stings should allow others to hang traps. Yellowjacket stings can be fatal.
