DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling

Proper Care and Use Clean and sanitize according to standard practice. Healthcare facilities must maintain the product in accordance with infection control guidelines. The use of this surface is a supplement to and not a substitute for standard infection control practices. Users must continue to follow all current infection control practices including those practices related to cleaning and disinfection of environmental surfaces. This surface has been shown to reduce microbial contamination but does not necessarily prevent cross contamination.

This surface may be subject to recontamination and the level of active bacteria at any time will depend on the frequency and timing of recontamination and cleanliness of the surface (among other factors). In order to have proper antimicrobial effect this product must be cleaned and maintained according to the directions for use.

Do not wax paint lacquer varnish or otherwise coat this product

Routine cleaning to remove dirt and filth is necessary for good sanitation and to assure the effective antibacterial performance of this surface. Cleaning agents typically used for traditional hard non porous touch surfaces are permissible. The appropriate cleaning agent depends on the type of soiling and the measure of sanitization required. Normal tarnishing or wear of this surface will not impair antibacterial effectiveness.

Not approved for direct food contact or food packaging uses

[Items exposed to outdoor environmental conditions are not representative of indoor laboratory test conditions and therefore may impart reduced efficacy if not cleaned when visibly soiled]

STORAGE AND DISPOSAL

Dispose of by recycling or put in trash

WARRANTY STATEMENT

If used as intended this product is wear resistant and the durable antibacterial properties will remain effective for as long as the product remains in place and is used as directed.
