Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 – Addition of
Optional Marketing Claims and Graphics
Product Name: Mint-X Multipurpose Flexible Plastic
EPA Registration Number: 85589-1
Application Date: July 22, 2016
OPP Decision Number: 519658

Dear Ms. Anastasiou:

The U.S. Environmental Protection Agency (EPA) is in receipt of your application for notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Biopesticides and Pollution Prevention Division (BPPD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped “Notification” and will be placed in our records. You must submit one (1) copy of the final printed labeling with the modifications.

Should you wish to add/retain a reference to your company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA-approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance Assurance.

Directions for use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For management of trash disposal to reduce Norway Rats and Raccoons from damaging garbage bags when left outdoors. When used indoors, Mint-X Trash Bags may be used as a typical household trash bag. Efficacy improves with repetitive use at same location as rats and raccoons learn to avoid Mint-X Trash Bags when used in and around the periphery of buildings, alleys or homes. Dispose of used trash bags as specified on this label.

Use this product as a typical trash bag.

[NOTE: To avoid danger of suffocation, keep all plastic bags away from babies and children. Do not use plastic bags in cribs, beds, carriages or playpens.]

[Do not use for food storage]

Storage and Disposal:

Do not contaminate water, food, or feed by storage and disposal. Dispose of used trash bags in accordance with state, local and federal regulations as ordinary trash.

Note: Bold, Italicized text is information for the reader and is not part of the label.

Optional User Tips for Trash Bags:

[For Optimal (Best) Results] [Optimal (Best) Practice Tips]
[(User) Recommendations][Suggested User Tips]:

1. Mint-X Trash Bags become more effective with repetitive usage.
2. Use only Mint-X Trash Bags. Do not commingle with other non-Mint-X Trash Bags.
3. The mint scent of the Mint-X Trash Bags is strongest within 3-5 days of removing bags from box. For best results, the time from bag removal from box to trash pickup should not exceed 3-5 days. After 3-5 days, place trash into a “fresh” Mint-X Trash Bag prior to leaving outside for trash pickup.
4. Clean out any trash container or storage area before using Mint-X, as any food residue will still attract rodents.

For best results visit www.mint-x.com/best-practices or call 877 MINT BAG

- Mint Scented Drawstring
- Scented Drawstring
- No More Bags Slipping Into The Can!
- The Mint-X Story;
- After 40 years of manufacturing and supplying heavy duty trash bags to New York City's largest apartment buildings, the inventor of Mint-X was asked to help solve a problem for his biggest customer. "Can't you put something in your trash that keeps rodents away?" That one question inspired the creation of an effective alternative to standard trash bags. The infusion of essential oils that combine to form the special mint formula in Mint-X® trash bags smells pleasant to humans but is overwhelming to raccoons and rats because of the keens sense of smell.
