U.S. ENVIRONMENTAL PROTECTION AGENCY  
Office of Pesticide Programs  
Antimicrobials Division (7510P)  
1200 Pennsylvania Avenue NW  
Washington, D.C. 20460

EPA Reg. Number:

85808-R

Date of Issuance:

JUL 23 2013

Term of Issuance:

**Unconditional**

Name of Pesticide Product:

Stabicide 71

## NOTICE OF PESTICIDE:

☒ Registration☐ Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Schulke &amp; Mayr GmbH

Robert-Koch Str.2

22851 Norderstedt, Germany

**Note:** Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

The application referred to above, submitted under the Federal Insecticide, Fungicide and Rodenticide Act, as amended is acceptable under FIFRA sec. 3(c)(5), provided that you:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product when the Agency requires all registrants of similar products to submit such data.
2. A one year study is required to satisfy the storage and stability and corrosion characteristics requirements (Guidelines 830.6317 and 830.6320). You have 18 months from the date of registration to provide these data.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. The next label printing of this product must use this labeling unless subsequent changes have been approved. You must submit one (1) copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and it's implementing regulation at 40 CFR 152.3.

# Stabicide 71

[Alternate brand name: Grotamar 71]

[Industrial Microbicide for use in fuels]

[Inhibits the growth of Bacteria and fungi in fuels]]

**Active Ingredient:**

N,N'-methylenebis (5-methyloxazolidin)..... 99.09%

Other Ingredients.....0.91%

Total..... 100.00%

**Keep Out of Reach of Children**

**DANGER PELIGRO POISON**

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

FIRST AID	
<b>If inhaled</b>	<ul style="list-style-type: none"><li>• Move person to fresh air.</li><li>• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.</li><li>• Call a poison control center or doctor for further treatment advice.</li></ul>
<b>If in eyes</b>	<ul style="list-style-type: none"><li>• Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li><li>• Remove contact lenses, if present, after the first five minutes, then continue rinsing eye.</li><li>• Call a poison control center or doctor for treatment advice.</li></ul>
<b>If on skin</b>	<ul style="list-style-type: none"><li>• Take off contaminated clothing.</li><li>• Rinse skin immediately with plenty of water for 15-20 minutes.</li><li>• Call a poison control center or doctor for treatment advice.</li></ul>
<b>If swallowed</b>	<ul style="list-style-type: none"><li>• Call a poison control center or doctor immediately for treatment advice.</li><li>• Have person sip a glass of water if able to swallow.</li><li>• Do not induce vomiting unless told to by a poison control center or doctor.</li><li>• Do not give anything to an unconscious person.</li></ul>
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. <b>Note to Physician:</b> Probable mucosal damage may contraindicate the use of gastric lavage.

**ACCEPTED**

JUL 23 2013

Under the Federal Insecticide, Fungicide, and  
Rodenticide Act as amended, for the  
pesticide, registered under  
EPA Reg. No. 85808-R

(Note to reviewer: [bracketed text] is optional; (parenthetical text) is informational.)

## **PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Fatal if inhaled. Do not breathe vapors. Corrosive. Causes irreversible eye damage. Do not get in eyes, on skin, or on clothing. Wear long-sleeved shirt and long pants, socks, chemical-resistant gloves (such as nitrile or butyl), and protective eyewear. For closed loading systems that are engineered to eliminate contact with aerosols and vapors, workers must have access to a respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G), or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any R, P, or HE prefilter. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. Keep container closed when not in use. Use with adequate ventilation.

## **ENVIRONMENTAL HAZARDS**

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

## **CHEMICAL HAZARDS**

Do not mix with strong inorganic acids as this will lead to an excessive release of formaldehyde. Reaction may cause rapid increase of temperature.

## **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### **For Use in: Fuel preservation**

[Stabicide 71] [This product] is recommended for the decontamination and control of microorganisms in fuel systems. Stabicide 71 is recommended for controlling the growth of bacteria and fungi in dispersed and free-water commonly found in fuel systems.

Add [Stabicide 71] [this product] to spark ignition, petroleum distillate, biofuel or synthetic fuel (fuel grades boiling point below 390°C) in tanks or pipelines via closed [metered] system dosing. Stabicide 71 must be added, through a closed system, as a single dose or by proportional metering to achieve the appropriate Stabicide 71 concentration in the treated fuel system.

4/5

ACCEPTED

JUL 23 2013

(Note to reviewer: [bracketed text] is optional; (parenthetical text) is informational.)

Under the Federal Insecticide, Fungicide, and  
Rodenticide Act as amended, for the  
pesticide, registered under  
EPA Reg. No. 85808-R

For best performance, provide good distribution of [Stabicide 71] [this product] in the fuel by mixing or by adding the biocide before or during tank filling. Furthermore [Stabicide 71] [this product] must remain in contact with treated fuel system for a minimum of four hours and preferably eight hours to decontaminate the fuel and fuel-system walls.

For shock-treatment of heavily contaminated fuel systems, add 0.4 to 0.8 gal of [Stabicide 71] [this product] per 1000 gal of fuel and fuel associated water to achieve a concentration of 500 to 1000 ppm (w/w) in the treated fuel system.

For preventive treatment, a dose of 0.04 to 0.16 gal (5 to 20.5 oz) of [Stabicide 71] [this product] to 1000 gal of fuel is recommended to achieve a concentration of 50 to 200 ppm.

### Storage and Disposal

Do not contaminate water, food, or feed by storage and disposal.

**Pesticides Storage:** Keep container closed to prevent spills and contamination.

**Pesticide Disposal:** Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to the label instructions, contact your State Pesticide or Environmental Control Agency, or Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

**Spill and Leak Procedures:** Small releases can be cleaned up using a standard absorbent (i.e. polypads, vermiculite, dry sand). Evacuate immediate area of spill or leak. Place leaking container in well-ventilated area. Identify all sources of ignition before clean-up procedures begin. Wear long-sleeved shirt and long pants or chemical resistant suit, socks, chemical-resistant gloves (such as nitrile or butyl), and protective eyewear. Use a respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G), or a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any R, P, or HE prefilter for entry into affected area. Work upwind if possible. Allow spilled material to evaporate, or absorb onto absorbent material. Neutralize residue with citric acid or other neutralizing agent for bases. Test area with litmus paper to ensure neutralization is complete. Thoroughly aerate absorbent materials outdoors prior to disposing on site or at an approved disposal facility. Avoid run-off to storm sewers and ditches leading to natural waterways. Do not allow unprotected persons to enter spill area or clean up area without a respirator until formaldehyde (active constituent of Stabicide 71) levels are determined to be below 0.75 ppm, as determined by an OSHA approved method used in accordance with the manufacturer's instructions.

**Container Handling:** Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or reconditioning if appropriate or puncture and dispose of in a sanitary landfill, or by incineration, or by other procedures approved by state and local authorities.
