 1200 Pennsylvania Avenue N.W.
 Washington, D.C. 20460

EPA Reg. Number: 86145-4	Date of Issuance: Jan. 19, 2010
------------------------------------	-------------------------------------------

Term of Issuance:
Conditional

Name of Pesticide Product: **Mag Shock**

NOTICE OF PESTICIDE:
 Registration
 Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

**JHK Distribution, Inc.
 2352 John Street
 Riverside, CA. 92503**

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.
 Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product (OPP Decision No. 417774) is conditionally registered in accordance with FIFRA sec 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and, submit acceptable responses required for re-registration of your product under FIFRA section 4.
2. Change EPA File Symbol 86145-U to EPA Registration Number 86145-4.

Submit one copy of the finished final printed label prior to releasing this product for sale.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e).

Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the conditionally approved label is enclosed for your records.

Signature of Approving Official:

PRECAUTIONARY STATEMENTS

HAZARD TO HUMANS AND DOMESTIC ANIMALS

DANGER: CORROSIVE Causes irreversible eye damage and skin burns. Harmful if swallowed or absorbed through skin. Open in a well ventilated area. Avoid breathing dust and fumes. Do not get in eyes or skin or on clothing. Wear goggles, face shield or safety glasses and rubber gloves. For additional protection of skin, wear long sleeves and long pants. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum using tobacco or using toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS. DANGER. If product is exposed to small amounts of water it can react violently to produce heat and toxic gas and spatter. Do not add water to this product. Add only into water. Do not mix this product with small amount of water. Only add this product directly to your pool. Do not allow to become wet or damp before use. Can react with other materials, including other water treatment products to cause fire, explosion, and the release of toxic gases. Keep all foreign matter including other water treatment products away from this product. Use only clean dry utensils to dispense this product. Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer. Avoid spilling this product. Exposure to heat can cause this product to decompose, leading to fire, explosion and the release of toxic gases. Store in a cool dry well ventilated area away from heat or open flame. Strong oxidizing agent. This product can increase fire intensity. Keep away from heat and from flame and burning material (like lighted cigarette).

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Pesticide wastes are toxic substances. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for further guidance for its proper removal or disposal.

WHY SHOULD YOU USE THIS PRODUCT: This is a highly effective multipurpose product that sanitizes, prevents algae and shock treats your pool. It is convenient, easy and won't over stabilize your pool. For clean pool water makers of MAG Shock recommend the following 4 step pool care program. Step 1: Test and balance water. Step 2: Sanitize. Step 3: Shock at least once a week and Step 4: Add algaecide as directed.

Additional shocking to keep water clean and clear is recommended after rain and heavy winds, high number of swimmers, increased water temperature, and/or increased frequency of pool usage. Read all precautionary statements before use.

How to use: Do not pre-mix this product before adding it to your pool. Only add this product directly to your pool or skimmer. Use only a clean dry plastic measuring cup to measure this product. **Method for dosing directly into the pool.** Add the recommended dosage of this product during evening hours while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. In any granules settle to the bottom of pool, use brush to disperse.

Method of Skimmer addition: Make sure that filter pump is on and properly circulating through the skimmer. Empty skimmer of all chemicals and/or debris. Contaminants may cause an explosion or the release of toxic gases. Do not use this method when an automatic chemical dispensing device (e.g. feeder) is present. Pour this product slowly into skimmer making sure that the material is drawn into the system at the same rate, do not allow this material to accumulate as toxic gases may be generated.

Water Balance: For best product performance, swimmer comfort and crystal clear water, use MAG Shock pool care products to maintain the following water balance. Acceptable range for Balance: pH 7.2 – 7.6. Total alkalinity 60-120 ppm. Calcium hardness above 200 ppm. Available chlorine 1-4 ppm. Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Use reliable test kits that measures all these ranges. Re-entry into treated pools is prohibited above levels of 4 ppm for risk of bodily injury.

Opening your Pool: For best results, see the “Water balance” section above before treatment. Adjust and maintain pH in the 7.2 to 7.6 range. Allow the pH adjusters to dissolve and disperse before adding this product to the pool. Follow “Pool shock Treatment” directions on this package. Allow 30 minutes for product for product to disperse. Test free available chlorine residual with a pool test kit. Repeat dosage as needed until the free available chlorine residual is 1-4 ppm. Re-entry into pool is prohibited above levels of 4 ppm for risk of bodily injury.

As a preventative treatment, you should shock treat your pool once a week to prevent pool problems. In addition to weekly shock treatment, you should shock treat to remedy problems which occur when bather loads are high, water appears to be hazy or dull, unpleasant odors or eye irritation occur, after heavy wind and rainstorms or if algae does develop with resulting green color and slimy feeling walls.

Pool Shock Treatment: Add the recommended dosages of this product while the filter pump is running. Adjust and maintain pH to 7.2 to 7.6 with pH plus or pH minus. Follow label directions. Allow the pH adjusters to dissolve and disperse before adding this product to the pool. When adding this product to your pool, broadcast this product evenly over a wide area of the deepest end of the pool.

Dosage Rate: Shock Treatment/Super Chlorination: For best results, see “Water Balance” and “How to Use” above before treatment. Every 7 days or as necessary to prevent pool problems shock treat/super chlorinate the pool by adding 14 to 28 ounces of this product per 10000 gallons of water to yield 5 to 10 ppm available chlorine by weight. Re-entry into treated pool is prohibited above level of 4 ppm for risk of bodily injury.

Algae Control: 1. Follow “Pool Shock Treatment” directions on this label. 2. Add this product as close as possible to any algae on the side or bottom of pool. 3. Do not enter pool until free available chlorine residual is 1-4 ppm. 4. If necessary repeat the treatment. 5. To prevent possible staining or bleaching take the following steps immediately after treatment. Thoroughly clean pool by brushing surface of algae growth, vacuum and cycle through filter. For preventative algae control, use your preferred algaecide product regularly.

Note: Do not allow direct contact of this product on the following pool surfaces: Vinyl, metallic, fiberglass, painted, or colored plaster. Product will bleach color out.

STORAGE AND DISPOSAL

STORAGE: Keep product in tightly closed container when not in use. Store in cool, dry well ventilated area. Keep away from heat or open flame.

For disposal of a contaminated and decomposing product: Do not re-seal container. Immediately remove container to an open and well ventilated outdoor area by itself. Flood with large amounts of water until material is dissolve. Dispose of container and any remaining material in an approved landfill area.

DISPOSAL: IF EMPTY: Nonrefillable container. Do not reuse or refill empty container. Offer for recycling if available.

IF PARTLY FILLED: Call your local solid waste agency or 1-800-CLEANUP for disposal instruction. Never place unused product down any indoor or outdoor drain.

RESIDUE REMOVAL: Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container $\frac{1}{4}$ full with water and recap. Shake for 10 seconds. Pour rinsate into application tank or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
