Subject: Magnolia Chlorinating Tablets (1" and/or 3")
EPA Reg. No. 86145-7
Application Dated: July 27, 2011
Receipt Date: August 15, 2011

Dear Mr. Kurani:

The following notification submitted in connection with registration under the provisions of PR Notice 98-10, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(c)9 is acceptable.

Proposed Notification:

- Label revision in response to Agency letter dated 04/04/2011

Comments:

Based on a review of the material submitted, the following comments apply:

Bold the 'Container Handling' heading and increase the font to the size of the 'Storage' and 'Disposal' headings.

This application for notification to revise the product label, as referenced above, is acceptable. A copy has been placed in our records for future reference.

Should you have any questions or comments concerning this letter, please contact me at harris.monisha@epa.gov or call (703) 308-0410.

Sincerely,

Monisha Harris

Re: Product 86145-7 – Magnolia Chlorinating Tablets.

Dear Ms. Henson,

Enclosed please find form 8570-1 notifying the changes on the labels made per your conditional approval of Magnolia 1" or 3" Chlorinating Tablets.

Please note that the label enclosed clarifies the language changes made. We intend to market the product under "Magnolia Chlorinating Tablets" in two physical sizes of the tablets – 1 inch and 3 inch diameter.

Please make note of this changes on file to avoid any confusion on the labels.

Thank you for your consideration.

Yours truly,
JHK Distribution, Inc.

Harry Kurani
President

Magnolia Chlorinating Tablets

For control of Algae and Bacteria

3" Chlorinating Tablets

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID

If in Eyes: Hold eye open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice.

On Skin or Clothing: Take off all contaminated clothing. Rinse immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.

If Inhaled: Move person to fresh air. If person is not breathing, Call 911 or an ambulance, then give artificial respiration preferably mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice.

If Swallowed: Call a poison control center or doctor immediately for treatment advice. Promptly drink large quantity of water if able to swallow. DO NOT induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.

Have the product container label with you when calling poison control center, or going for treatment.

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

See side /back panel for precautionary statements.

NOTIFICATION

Date Reviewed: 8/29/2011
Reviewed By: M. [Signature]

Precautionary Statements:

Hazards to Humans and Domestic Animals

Danger: Corrosive Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or spray mists. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling the product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

Environmental Hazards: This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Physical and Chemical Hazards: Danger, Strong oxidizing agent, will burn with evolution of chlorine and equally toxic gases. Contact with water slowly releases irritating and hazardous chlorine containing gases. Decomposes at 460°F to 480°F with liberation of harmful gases. Mix only with water. Use clean dry utensils. Do not add this product in any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to the explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion.

In case of fire, if possible isolate container in open air or well ventilated area. Flood with large amount of water.

In case of contamination or decomposition, do not reseal container. Note: Do not allow this product on the following pool surfaces: vinyl, metallic, fiberglass, painted or colored plaster. Product will bleach color out.

Directions for Use

It is violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product is slow dissolving for use in erosion feeders.

1. Remove everything and rinse the feeder and lines with fresh water. Never mix this product with any other sticks, tablets or other chemicals.
2. Fill the feeder with tablets.
3. Adjust the feed rate so as to maintain a chlorine residual of 1.0 to 1.5 ppm.
4. Check the pH of the pool water daily and maintain the pH of water between 7.2 - 7.4.
5. If pool is not stabilized with cyanuric acid or equivalent, add stabilizer to a concentration of 30 ppm. Consult and follow that product's label to maintain the proper level of stabilizer in the water.

Pool Startup and Heavy Bather Load: At the start of the swimming season, in filled pools, upon filling a pool and after heavy swimmer load, super chlorination (shocking) is necessary. Super chlorinate a freshly filled pool with Magnolia Chlorinating Granules. Follow the label instructions for proper results. The end result is to establish a chlorine residual of 1.0 -1.5 ppm. A liquid or granular chlorinating agent such as Sodium Hypochlorite, Calcium Hypochlorite or Sodium Dichloro-s-triazinetriene, which will dispense chlorine rapidly, should be used for superchlorination. Consult the label on Sodium Hypochlorite, Calcium Hypochlorite, or Sodium Dichloro-s-triazinetriene for superchlorination instructions. Do not re-enter swimming pool until chlorine residual is 3ppm due to risk of bodily harm.

Storage and Disposal:

Do not contaminate water, food or feed by storage or disposal.

Storage: Keep product in tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition isolate container in open area if possible, and flood with large amounts of water.

Disposal: Pesticide wastes are toxic substances. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of according to label instructions, contact your State Pesticides or Environment Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for further guidance for its proper removal or disposal.

Container Handling: Non refillable container. Do not reuse or refill this container. Triple-rinse container promptly after emptying. Place in trash or offer for recycling if available.

If Partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instruction. Never place unused product down any indoor or outdoor drain.

Residue removal: Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour into application tank or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.
