SUBJECT: Tile Doctor Shield
EPA Registration No. 86200-1
Application Dated: June 13, 2013
Receipt Date: June 13, 2013

Dear Ms. Khattar:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable.

- To make label changes required by Agency letter dated January 18, 2012.

General Comments

A stamped copy of the accepted labeling is enclosed. Should you have any questions concerning this letter, please contact Emilia Oiguenblik at (703) 347 0199 or Velma Noble at (703) 308-6233.

Sincerely,

Velma Noble
Product Manager (31)
Regulatory Management Branch I
Antimicrobials Division (7510P)

Bldg 2, Ste 1680

Atlanta, GA 30338

ENVIRONMENTAL HAZARDS:

Commercial and Industrial Uses:

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

De-activation may be required during clean up if a spill occurs. De-activation of Tile Doctor Shield can be achieved by the addition of an anionic surfactant or detergent (such as soap, sulfones, or sulfates) in quantity equivalent to that of the active ingredient.

Residential Uses:

This pesticide is toxic to fish. Do not contaminate water by cleaning of equipment or disposal of pesticide. Do not apply directly to water.

For All Uses:

For chemical emergency ONLY (spill, leak, fire, exposure or accident), call CHEMTREC at 800-424-9300.

PRODUCT FEATURES AND BENEFITS

Tile Doctor Shield imparts durable biostatic activity to the surface of a wide variety of substrates.

Tile Doctor Shield is effective against mold, mildew and algae as a static agent.

MASTER LABEL

Note to reviewer: Bold, italicized text is information for the reader and is not part of the label. [Bracketed text] is optional text. Text separated by "/" indicates and/or options.

Efficiency – through proper application, durable bacteriostatic, fungistatic and algaestatic static surfaces can be attained with a minimum amount of Tile Doctor Shield.

Provides freshness and combats deterioration and discoloration caused by bacteria, fungi and algae

ACCEPTED

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

FOR [COMMERCIAL] APPLICATIONS IN [HOMES,] [OFFICES] AND [INSTITUTIONS]

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide, registered under EPA Reg. No. 86200-1

APPROVED USES: Tile Doctor Shield is effective against odor causing bacteria, bacteria which cause staining and discoloration, fungi (mold and mildew) and algae as a static agent. Tile Doctor Shield can be used as a final bacteriostatic finish on the following items to impart bacteriostatic/ fungistatic (mold and mildew) activity:

[Carpet,] [Draperies,] [Upholstery,] [Furniture,] [Book Covers,] and [Pictures]; Interior Non-Food Contact Hard Surfaces *Including:* [Kitchen], [Bathroom], and [Household Surfaces], Floors and Floor Coverings, Natural Stone, Ceramic and Non-Ceramic Tile, Walls and Wall Coverings, Ceilings, Concrete, Chrome, Stainless Steel, Fiberglass, Vinyl, Porcelain, Wood and Glass Fixtures, and Aluminum

HOW TO USE:

Dry treated areas and articles such as clothing before use. Remove children and pets from treated area until completely dry. Clean surfaces prior to application. Tile Doctor Shield is to be applied to organic and inorganic surfaces as supplied by brushing, dipping, padding, soaking, spraying, or misting until adequately wet. After applying treatment, the surface should be allowed to dry at temperatures from ambient to a maximum of 160°C (320° F) to effect complete condensation of silanol groups and to remove water, solvents and/or traces of methanol from hydrolysis. If necessary, reapply Tile Doctor Shield every three months or when odor, staining and discoloration due to bacteria, mold stains, and mildew stains return.

For 8, 16 and 32 oz. containers:

For Pump/Trigger Spray Application: Using pump/trigger sprayer, spray entire area 4-6 inches from the surface making sure the surface is completely covered. Apply and then let stand until dry. If spotting occurs, wipe with moist cloth or sponge. Test for staining and colorfastness of fabrics and carpets by treating and drying a small, concealed area prior to application. When treating coarser substrates, more Tile Doctor Shield may be required due to absorption. 8 oz. of Tile Doctor Shield treats approximately 12 square feet, 16 oz. approximately 25 square feet, and 32 oz. approximately 50 square feet. One gallon of Tile Doctor Shield treats 200 square feet depending upon treated surface porosity and texture.

For 1, 5, 55 and 275 gal. containers:

For Commercial Spray Application: For commercial application equipment (i.e., carpet/upholstery steamers, rotary jet extraction cleaners, pressure sprayers), apply and then let stand until dry or let stand 3 minutes and wipe dry with cloth or sponge. If spotting occurs, wipe with moist cloth or sponge. Test for staining and color-fastness of fabrics and carpets by treating and drying a small, concealed area prior to

Notes: C.R. approved label 7.28.10; Notification: add marketing phrases and pictograms; update contact number; incorporate language from EPA Reg. application. When treating coarser substrates, more Tile Doctor Shield may be required due to absorption. Dry carpet areas and surfaces before re-entry and dry articles before use. One gallon of Tile Doctor Shield treats approximately 200 square feet.

For all containers:

For Dipping/Soaking Application: Use appropriate sized washbasin or tub for dipping/soaking the item you are treating. Use enough Tile Doctor Shield solution to completely submerge item. Completely submerge item in solution for 3 minutes. Remove item and dry. Test for staining and colorfastness of fabrics by treating and drying a small, concealed area prior to application. Do not reuse solution after dipping/soaking. The substrate can be dried at room temperatures or at temperatures to a maximum of 160° C (320° F).

For each application, determine optimum application and drying conditions, such as time and temperature before use. If desired, reapply Tile Doctor Shield if odor, staining and discoloration due to bacteria, mold or mildew occur.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

FOR PRODUCTS OTHER THAN HOUSEHOLD/RESIDENTIAL:

Containers of 5 gallons or less:

PESTICIDE STORAGE: Store in original, tightly closed container in an area inaccessible to children or persons unfamiliar with its use. Keep tightly closed until ready to use. Reclose tightly after each use. When stored in original, unopened containers at or below 25°C (77°F), Tile Doctor Shield has a minimum shelf life of 12 months from date of shipment.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into container for disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Dispose of rinsate by following instructions for pesticide disposal or store rinsate for later disposal. Then offer empty container for recycling, or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities.

Containers of more than 5 gallons:

PESTICIDE STORAGE: Store in original, tightly closed container in an area inaccessible to children or persons unfamiliar with its use. Keep tightly closed until ready to use. Reclose tightly after each use. When stored in original, unopened containers at or below 25°C (77°F), Tile Doctor Shield has a minimum shelf life of 12 months from date of shipment.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.
