Product Information

PAPA RICHTER'S ROACH RIDDER contains Orthoboric acid, which does not provide rapid knockdown or rapid kill of insects. Insects are attracted to feed on the bait, and may return to nesting areas before they die. Good control of insect populations requires that PAPA RICHTER'S ROACH RIDDER be used for a period of several weeks or months along with good hygiene practices.

PAPA RICHTER'S ROACH RIDDER is packaged in convenient bait stations with sticky backs to aid in placement.

Insects Controlled

PAPA RICHTER'S ROACH RIDDER kills German cockroaches, silverfish, and indoor ants **except fire ants, harvester ants, pharaoh ants, and carpenter ants.**

Application Directions

PAPA RICHTER'S ROACH RIDDER may be used in residential houses, multi-family, commercial, industrial, municipal, institutional, research, recreational, health care, educational, hospitality, and agricultural buildings, and other structures including garages, transport vehicles, sewers, animal rearing establishments, and food handling and food processing establishments.

The sticky dot may mar some painted surfaces. Avoid placement on visible painted surfaces.

To place bait stations, remove PAPA RICHTER'S ROACH RIDDER Caps from the backing paper. Stick the cap in an out-of-the way location, such as behind refrigerators, on the backs of drawers, and back corners of cabinets. Do not remove backing paper if sliding under refrigerators or ranges.

DO NOT PLACE CAPS WHERE THEY WILL BE ACCESSIBLE TO PETS OR CHILDREN.

Food Areas:

Food areas include areas for receiving, packaging (canning, bottling, wrapping, boxing), storage, edible waste storage, and enclosed processing systems (mills, dairies, syrup, edible oils). Food areas may also include food serving areas.
