Office of Pesticide Programs
Antimicrobials Division (7510C)
1200 Pennsylvania Avenue NW
Washington, D.C. 20460

PA Reg. Number: 87262-2

Date of Issuance:

MAR 11 2011

Term of Issuance:

Unconditional

Name of Pesticide Product:

Mayospense 7700-30

NOTICE OF PESTICIDE:

- x Registration
Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Compass Chemical International, LLC
5544 Oakdale Road
Smyrna, GA 30064

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product (OPP Decision Number: D-437386) is unconditionally registered in accordance with FIFRA sec 3(c)(7)(a) provided that you:

- 1. Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for re-registration of your product under FIFRA section 4.
2. Make the labeling changes listed below before you release the product for shipment:
a. Revise the EPA Registration Number to read, "EPA Reg. No. 87262-2".

Signature of Approving Official:

Stacey Brugh

Date:

MAR 11 2011

 TOTAL: ..... 100.0%

**KEEP OUT OF REACH OF CHILDREN  
 CAUTION**

FIRST AID	
If in Eyes	-Hold eye open and rinse slowly and gently with water for 15-20 minutes. -Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. -Call a poison control center or doctor for further treatment advice.
If on Skin	-Take off contaminated clothing. -Rinse skin immediately with plenty of water for 15-20 minutes. -Call a poison control center or doctor for further treatment advice.
If Swallowed	-Call poison control center or doctor immediately for treatment advice. -Have person sip a glass of water, if able to swallow. -Do not induce vomiting unless told to do so by the poison control center or doctor. -Do not give anything by mouth to an unconscious person.
If Inhaled	-Move person to fresh air. -If person is not breathing, then give artificial respiration, preferably by mouth-to-mouth if possible. -Call a poison control center or doctor for further treatment advice.
<b>HOTLINE NUMBER</b>	
Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.	

**IN CASE OF EMERGENCY ENDANGERING LIFE OR PROPERTY, CALL: 800-424-9300**

**PRECAUTIONARY STATEMENTS  
 HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION:** Harmful if Swallowed, absorbed through the skin, or inhaled. Causes moderate eye irritation. Avoid contact with eyes, skin or clothing. Avoid breathing vapors. Wash thoroughly with soap and water after handling and before eating, drinking, and chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds or estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharging. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Mayospense 7700 is used to control the growth of algae in swimming pools, heated swimming pools, exterior whirlpools, hot baths, and decorative fountains. It is used to control algae, bacteria, and fungi in recirculating commercial and industrial cooling water towers.

### RECIRCULATING COOLING WATER TOWERS

Prior to using Mayospense 7700 in recirculating cooling water towers, systems shall be cleaned to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 1.8-4.4 fluid ounces of Mayospense 7700 per 1000 gallons of water to provide 8-20 ppm Mayospense 7700, based on the total weight of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 0.4-4.4 fluid ounces of Mayospense 7700 per 1000 gallons of water (2-20 ppm) every 2-5 days or as needed. The frequency of addition depends upon the relative amount of bleed-off and the severity of the microbiological problem. Slug additions shall be made in the cooling water tower sump.

### INDUSTRIAL AIR WASHING SYSTEMS

Mayospense 7700 is used to control bacteria in industrial air washing systems that maintain effective mist eliminating components. Prior to its use, systems must be cleaned to remove bacterial slime and other deposits. An initial slug dose of 6.66-11.1 fluid ounces of Mayospense 7700 per 1000 gallons of water is required. Repeat initial dosage until control is evident. Subsequent slug additions of 4.5-11.1 fluid ounces of Mayospense 7700 per 1000 gallons of water should be employed every 1-5 days, or as needed. The frequency of addition depends upon the relative amount of bleed-off and severity of the bacterial problem. Slug additions may be made to the water collection trays of the air wash system.

### SWIMMING POOLS, HEATED SWIMMING POOLS, EXTERIOR WHIRLPOOLS, AND HOT BATHS

For maximum effectiveness of Mayospense 7700 in swimming pools, heated swimming pools, exterior whirlpools, and hot baths, those with heavy growths of algae must be cleaned prior to using Mayospense 7700. For pools having just visible algae growth, add an initial dose of 22-34 fluid ounces of Mayospense 7700 per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 12-22 fluid ounces of Mayospense 7700 per 10,000 gallons of water. To maintain pools free of visible algae growth, subsequent additions of 4-8 fluid ounces of Mayospense 7700 per 10,000 gallons of water must be made every 5-7 days after the initial treatment.

Uniform distribution of Mayospense 7700 throughout the water in the pool is necessary for maximum effectiveness. Mayospense 7700 is compatible with those chemicals normally used to treat pools and is effective at both acid and alkaline pH. Mayospense 7700 can be used in pools treated with chlorine chemicals and may reduce the amount of those chemicals normally required. However, do not mix Mayospense 7700 with concentrated dry or liquid chlorine products.

### DECORATIVE FOUNTAINS

Mayospense 7700 is used to control the growth of algae in decorative fountains. Systems containing heavy growths of algae must be manually cleaned prior to treatment. Fountains with just visible algae growth require an initial dose of 2-4 fluid ounces of Mayospense 7700 per 1000 gallons of water in the system. To treat a freshly cleaned and filled fountain, add 1-3 fluid ounces of Mayospense 7700 per 1000 gallons of water. Maintenance dosages of 0.4-1.0 fluid ounces of Mayospense 7700 per 1000 gallons of water must be added every 5-7 days as needed. Additions of Mayospense 7700 should be made at a point to ensure uniform distribution throughout the system. Mayospense 7700 may be used in fountains treated with chlorine chemicals, but do not mix Mayospense 7700 with concentrated dry or liquid chlorine products.

### PAPER MANUFACTURE

Mayospense 7700 will retard microbial growth that causes degradation of cooked starch used in paper manufacture. Mayospense 7700 is added at a rate of 25-250 ppm based on the total weight of the starch and water. The treatment rate necessary to retard spoilage of the starch will vary with the extent of contamination of the make-up water and the length of storage.

**NOTE:** Do not use in paper and paperboard that will contact food.

### STORAGE AND DISPOSAL

**DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.**

**PESTICIDE STORAGE:** Do not stack more than four (4) drums high. Leaking or damaged drums should be placed in over-pack drums for disposal. Spills should be absorbed in sawdust or sand and disposed of in a sanitary landfill. Keep container closed when not in use.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on-site or at an approved waste disposal facility.

**CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill. Triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose in a sanitary landfill, incineration, or, if allowed, by state and local authorities, burning. If burned, stay out of smoke.
