\*KILLS ANTS (excludes carpenter, harvester, fire, and pharaoh ants). This product must only be used to fumigate outdoor ant mounds. ANT ZAP acts by displacing oxygen and suffocating the listed target pests. Do not use this product in such a way that non-target animals will be exposed. General ANT ZAP set up: Secure the cylinder to the device by threading counter-clockwise until there is no leakage.

Treatment of Ant Mounds

**Step 1:** Secure the cylinder on the applicator by threading counter- clockwise to secure an airtight seal. **ALWAYS HOLD CYLINDER UPRIGHT while in use.** **Step 2:** A Small amount of talcum powder applied where probe meets shield greatly reduces the ant's ability to crawl up probe. Ensure holes on probe are below mound surface. **Step 3:** Treat each individual mound at Four (4) separate locations at 5 second intervals or until cylinder is completely exhausted. **Step 4:** The effects of ANT ZAP are immediate, but the soil conditions may effect the time needed for treatment. Additional applications may be needed based upon the size of the mound and activity of the ants.
