Medina, OH 44256

Subject: Label Notification per PRN 2007-4 – Revising Container Handling Statement
Product Name: **Dichlor Shock**
EPA Registration Number: **88259-3**
Application Date: October 21, 2015
Decision Number: 510859

Dear Mr. Kutcel:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 2007-4 for the above referenced product. The Antimicrobials Division (AD) has conducted a review of this request for its applicability under PRN 2007-4 and finds that the action requested falls within the scope of PRN-2007-4.

The label submitted with the application has been stamped "Notification" and will be placed in our records.

Please be reminded that 40 CFR Part 156.140(a)(4) requires that a batch code, lot number, or other code identifying the batch of the pesticide distributed and sold be placed on non-refillable containers. The code may appear either on the label (and can be added by non-notification via PR Notice 98-10) or durably marked on the container itself.

If you have any questions, please contact Killian Swift at 703-308-6346 or by email at Swift.Killian@epa.gov.

Sincerely,

A handwritten signature in blue ink, which appears to read "Wanda G. H. for", is written over the typed name.

Demson Fuller, Product Manager 32
Regulatory Management Branch II
Antimicrobials Division (7510P)
Office of Pesticide Programs

NOTIFICATION

88259-3

The applicant has certified that no changes, other than those reported to the Agency have been made to the labeling. The Agency acknowledges this notification by letter dated:

11/18/2015

{ All text in brackets [xxx] is optional and may or may not be included on a final label. }
{ All text in braces {xxx} is administrative and will not appear on a final label. }

DICHLOR SHOCK

ACTIVE INGREDIENT:

Sodium Dichloro-s-triazinetriene Dihydrate.....99.0%

OTHER INGREDIENTS.....1.0%**TOTAL**.....100.0%**MINIMUM AVAILABLE CHLORINE:** 55.5%**EPA REG. NO.** 88259-3**EPA EST. NO.** xxxxx-xx-xxx**NET WEIGHT:** 55 lbs**BATCH CODE**

KEEP OUT OF REACH OF CHILDREN

DANGER

FIRST AID	
IF IN EYES	<ul style="list-style-type: none">▪ Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.▪ Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.▪ Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING	<ul style="list-style-type: none">▪ Take off contaminated clothing.▪ Rinse skin immediately with plenty of water for 15-20 minutes.▪ Call a poison control center or doctor for treatment advice.
IF SWALLOWED	<ul style="list-style-type: none">▪ Call a poison control center or doctor immediately for treatment advice.▪ Have person sip a glass of water if able to swallow.▪ Do NOT induce vomiting unless told to do so by the poison control center or doctor.▪ Do not give anything by mouth to an unconscious person.
IF INHALED	<ul style="list-style-type: none">▪ Move person to fresh air.▪ If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.▪ Call a poison control center or doctor for further treatment advice.
For emergency information on DICHLOR SHOCK call the national Pesticides Information Center at 1-800-858-7378, 6:30 AM to 4:30 PM Pacific time (PT), seven days a week. During other times, call the poison control center 1-800-222-1222. Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate for the use of gastric lavage.	

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND ANIMALS

DANGER: HIGHLY CORROSIVE. Causes irreversible eye damage. Causes burns to skin. Irritating to nose and throat. May be fatal if swallowed. Will burn with the evolution of chlorine and equally toxic gases. Do not get in eyes, on skin or clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust or fumes. Wash thoroughly with soap and water after handling, and before eating, drinking, chewing gum, using tobacco, or using the toilet.

ENVIRONMENTAL HAZARDS STATEMENT

This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product directly into lakes, streams, ponds, rivers, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewage systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS: STRONG OXIDIZING AGENT

Strong oxidizing agent. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at temperatures above 437⁰F (225⁰C) with liberation of harmful gases. When ignited, will burn with the evolution of chlorine and equally toxic gases.

Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, emission of hazardous gases, possible fire and explosion.

IN CASE OF FIRE OR SMOKE:

Call the fire department. Do not attempt to extinguish the fire without a self contained breathing apparatus (SCBA). Do not let the fire burn. Flood with copious of water. Do not use ABC or other dry chemical extinguishers, as there is the potential for violent reaction.

IN CASE OF CONTAMINATION OR DECOMPOSITION:

Do not reseal container. Neutralize material to a non-oxidizing state for safe disposal.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

SWIMMING POOL SANITIZER

When used as directed, this product is an effective chlorinating sanitizer. Use of this product helps you maintain crystal blue and sparkling water. This product controls bacteria and algae as well as prevents algae growth. This product is suitable for all pool types.

BEFORE APPLYING PRODUCT:

First, ensure all swimming pool equipment is working properly. Clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6. Then add stabilizer to establish a minimum stabilizer level of 30-40 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Next, superchloriate the swimming pool water to 1 to 4 ppm chlorine residual. When using other products, be sure to follow completely the directions on those products.

MAINTENANCE DOSES:

With a pump running, broadcast 4 ounces of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. To treat smaller pools, add one level teaspoon of this product per 200 gallons of water. Repeat additions until a residual of 1-4 ppm chlorine is established as determined by the use of a test kit or test strip. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of the pool. **NEVER ALLOW UNDISSOLVED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES.** Regular use of a test kit or strip is necessary to determine when it is necessary to add another dose of this product to maintain a residual of 1-4 ppm available chlorine in the swimming pool water. An average daily dose requirement is ½- ¾ teaspoon of this product per 200 gallons of water.

SUPERCHLORINATION SHOCK:

With a pump running, broadcast 1 pound of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of the pool. **NEVER ALLOW UNDISSOLVED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES.**

In water temperatures less than 70 degrees F, or as alternate application procedure, pre-dissolve this product to apply evenly to the deep end of the swimming pool. Dissolve this product outdoors, in a clean plastic bucket stirring with a clean plastic or wooden spoon. Add this product to water; **NEVER** add water to product. **NEVER** add more than 1 pound of this product to less than 3 gallons of cool water. Do not mix with other products when pre-dissolving.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

SPA AND HOT TUB SANITIZER

When used as directed, this product is effective as a sanitizing agent for spa and hot tub water.

BEFORE APPLYING PRODUCT:

First, ensure all spa or hot tub equipment is working properly, then clean or backwash filter following manufacturer's directions. Next, adjust pH to between 7.2 and 7.6.

MAINTENANCE DOSES:

With a pump running, add ½ teaspoon per 100 gallons of water (or 5 teaspoons per 1,000 gallons) as an initial treatment. Repeat at 15 to 20 minute intervals until a residual of 3-5 ppm.

SUPERCHLORINATION SHOCK:

Use one teaspoon of this product per 100 gallons of water (or ¼ cup per 1000 gallons). Superchlorination may be needed on a nightly basis in a heavily used spa or as infrequently as one a week in a moderately used spa.

Reentry into treated swimming pools is prohibited above levels of 4 ppm chlorine residual due to risk of body injury.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE:

Keep product dry in its original, tightly closed container when not in use. Store container in a cool dry, well-ventilated area away from heat or open flame. Storage area should be locked and inaccessible to children.

PESTICIDE DISPOSAL:

Pesticide Wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

~~**Plastic Container:** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill or by incineration or if allowed by State and local authorities, by burning. If burned, stay out of smoke.~~

CONTAINER HANDLING: Nonrefillable/container. Do not reuse or refill the container. Triple rinse (or equivalent) empty container then offer for recycling, if available, or discard in trash.
