Schaumburg, IL 60173

Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 and PRN 2007-4 – To Add an Alternate Brand Name Zoëcon Duplex-G, Update the EPA Registration Number, Add Container Handling Statements for Refillable Totes, Remove Optional Brackets in the Container Handling Section, and Add a Trademark Statement Related to the New Alternate Brand Name  
Product Name: RF2230 D-Granules  
EPA Registration Number: 89459-93  
Application Date: 04/10/2017  
OPP Decision Number: 529054

Dear Ms. Huebl:

The U.S. Environmental Protection Agency (EPA) is in receipt of your application for notification under Pesticide Registration Notice (PRN) 98-10 and PRN 2007-4 for the above referenced product. The Biopesticides and Pollution Prevention Division (BPPD) has conducted a review of this request for its applicability under PRN 98-10 and PRN 2007-4 and finds that the action requested falls within the scope of PRN 98-10 and PRN 2007-4.

The labeling submitted with this application has been stamped “Notification” and will be placed in our records. The alternate brand name Zoëcon Duplex-G has been added to the product’s records. Please be reminded that 40 CFR § 156.140(a)(4) requires that a batch code, a lot number, or other code identifying the batch of the product distributed and sold be placed on nonrefillable containers. The code/number may appear either on the label (and can be added by non-notification via PRN 98-10) or durably marked on the container itself. You must submit one (1) copy of the final printed labeling with the modifications.

Should you wish to add/retain a reference to your company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or

Page 2 of 2  
EPA Reg. No. 89459-93  
OPP Decision No. 529054

misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA-approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance Assurance.

If you have any questions, please contact Nicola Steinmetz by phone at (703) 347-8567 or via email at [steinmetz.nicola@epa.gov](mailto:steinmetz.nicola@epa.gov).

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeannine Kausch', with a stylized flourish at the end.

Jeannine Kausch, Product Manager 92  
Microbial Pesticides Branch  
Biopesticides and Pollution  
Prevention Division (7511P)  
Office of Pesticide Programs

Enclosure

**NOTIFICATION**

89459-93

The applicant has certified that no changes, other than those reported to the Agency have been made to the labeling. The Agency acknowledges this notification by letter dated:

07/24/2017

[Indicates optional text]

**RF2230 D-Granules**

Alternate brand name: Zoëcon® Duplex™-G

A DUAL ACTION extended residual BIOLOGICAL LARVICIDE AND INSECT GROWTH REGULATOR GRANULAR PRODUCT TO KILL MOSQUITO LARVAE AND PREVENT ADULT MOSQUITO EMERGENCE (including those mosquitoes that may transmit diseases, including West Nile Virus, Dengue, Chikungunya, and Zika Virus)

- Mosquito Larvicide
- Contains S-methoprene
- Contains *Bti* and S-Methoprene IGR
- Kills mosquito larvae and prevents adult mosquito emergence
- Contains *Bacillus thuringiensis v. israelensis*
- Prevents mosquitoes from becoming breeding, biting adults
- Up to 28 days residual control when applied at rates of 5 – 20 pounds per acre
- Easy to Apply Granules
- Microbial pesticide and biochemical pesticide mosquito control combined
- Controls *Aedes*, *Culex*, *Anopheles*, and other mosquitoes
- Controls mosquitoes for up to 28 days of continuous wet when applied at rates of 5 – 20 pounds per acre
- Controls mosquitoes for 14 days with as little as 2.5 pounds per acre
- Controls *Aedes aegypti* for up to 21 days at 5 pounds per acre

**ACTIVE INGREDIENT:**

<i>Bacillus thuringiensis</i> subspecies <i>israelensis</i> Strain BMP 144 solids, spores, and insecticidal toxins* .....	5.35%
(S)-Methoprene (CAS # 65733-16-6) .....	1.60%

<b>OTHER INGREDIENTS:</b> .....	93.05%
Total	100.00%

\*Equivalent to 375 International Toxic Units (ITU/mg).

Note: The percent active ingredient does not indicate product performance and potency measurements are not federally standardized.

**KEEP OUT OF REACH OF CHILDREN  
CAUTION**

EPA Reg. No. 89459-~~00~~-93  
EPA Est. No.

Lot No.

Net Weight:  
[This container is sold by weight not volume]

<b>FIRST AID</b>	
If in eyes	<ul style="list-style-type: none"> <li>• Hold eye open and rinse slowly and gently with water for 15-20 minutes.</li> <li>• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.</li> <li>• Call a poison control center or doctor for treatment advice.</li> </ul>
<b>HOTLINE NUMBER:</b> Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-248-7763 for emergency medical treatment information.	

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS - CAUTION:** Causes moderate eye irritation. Avoid contact with eyes or clothing. Due to the size and abrasiveness of the granule, use protective eyewear and clothing (e.g., waterproof gloves) to minimize exposure during loading and handling. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

Mixers/loaders and applicators not in enclosed cabs must wear a NIOSH-approved particulate respirator with any N, P or R filter with NIOSH approval number prefix TC-84A; or a NIOSH-approved powered air purifying respirator with an HE filter with NIOSH approval number prefix TC-21C. Repeated exposure to high concentrations of microbial proteins can cause allergic sensitization.

**ENVIRONMENTAL HAZARDS**

Do not contaminate water when disposing of equipment washwater or rinsate.

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply directly to treated, finished drinking water reservoirs or animal watering troughs.

RF2230 D-Granules is a unique combination of a *Bacillus thuringiensis v. israelensis (Bti)* biological larvicide and S-Methoprene Insect Growth Regulator (IGR) that provides dual action control. RF2230 D-Granules provides quick kill of existing mosquito larvae and residual control of subsequent broods. This dual combination larvicide is highly effective against multiple broods of mosquitoes in a variety of habitats. RF2230 D-Granules, when applied to the water column, releases effective levels of *Bti* to begin killing larvae within 24 hrs. after application. Once the *Bti* has killed existing larvae, the IGR in RF2230 D-Granules provides residual control and prevents adult mosquito emergence for up to 28 days when applied at rates of 5 – 20 pounds per acre.

RF2230 D-Granules releases effective levels of the *Bti* biological larvicide for up to 72 hours after application and S-Methoprene insect growth regulator prevents the emergence of adult mosquitoes. Continue applications throughout the entire season to maintain control. IGR treated larvae continue to develop normally to the pupal stage where they die.

Rotary and fixed-wing aircraft equipped with granular spreaders capable of applying rates listed below may be used to apply RF2230 D-Granules. Ground equipment that will achieve even coverage at these rates may also be used.

Apply RF2230 D-Granules uniformly and repeat at intervals of 14 to 28 days.

**NOTE:** RF2230 D-Granules has no effect on mosquitoes that have reached the pupal or adult stage prior to treatment.

**APPLICATION TIMING:** Apply RF2230 D-Granules at any stage of larval mosquito development. Granules may be applied 7 to 14 days prior to flooding (i.e., "pre-hatch" or "pre-flood") in areas which flood. In such areas, one application of RF2230 D-Granules can prevent adult mosquito emergence from several subsequent floodings. The actual length of control depends on the duration and frequency of flooding events.

**APPLICATION RATES:** RF2230 D-Granules controls the major species of mosquitoes including: *Aedes*, *Anopheles*, *Culex*, and *Culiseta*. Apply RF2230 D-Granules at 2.5 - 20 lb/acre (5.6 - 11.2 kg/ha). Within these ranges, use lower rates when water is shallow [ $< 6''$ - $12''$ ] and vegetation and/or organic matter are minimal, and use higher rates when water is deep [ $> 1$  foot] and vegetation and/or organic matter are heavy. In water depths greater than 2 feet, double the highest application rate for each subsequent foot of water. Depending on water depth and degree of organic matter, lower use rates may provide less IGR residual. Application of RF2230 D-Granules to sites subject to water flow or exchange will diminish the product's effectiveness and may require higher application rates and/or more frequent applications. Lower residual activity may be seen at rates used at 5 pounds per acre or less; for consistent 28-day control, use rates at 7.5 pounds per acre or higher.

**APPLICATION SITES:**

RF2230 D-Granules may be applied to both crop and non-crop areas as directed above to temporary and permanent sites that support mosquito larval development. Examples of such sites include: snow pools, salt and tidal marshes, freshwater swamps and marshes (cattail, red cedar, and white maple marshes), woodland pools and meadows, dredging spoil sites, drainage areas, ditches, wastewater treatment facilities, livestock runoff lagoons, retention ponds, harvested timber stacks, swales, storm water drainage areas, sewers, catch basins, tree holes, water-holding receptacles (e.g., tires, urns, flower pots, cans, and other containers), irrigated and non-irrigated pastures, hoof prints and other natural and manmade water-holding sites, containers and depressions. Examples of crop areas include: irrigated croplands; pastures; rangeland; vineyards; rice fields (domestic and wild); date palm, citrus, fruit, and nut orchards; berry fields; bogs and row crops.

**STORAGE AND DISPOSAL:** Do not contaminate water, food or feed by storage or disposal.  
**Pesticide Storage:** Store closed containers in a cool, dry place. **Pesticide Disposal:** Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.  
**Container Handling:** **Plastic Container:** Nonrefillable container. Do not reuse or refill this container. Offer for recycling if available or puncture and dispose of in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke. **Paper/Plastic Bags:** Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment. Then offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke. **Refillable Totes (2000 lb):** Refillable container. Refill this container with this product only. Do not reuse this container for any other purpose. Return empty totes to [company name] for cleaning and recycling. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. If the container is not returned to [company name], to clean the container before final disposal, complete empty container by tapping sides and bottom to loosen clinging material into application equipment or a mix tank. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, by incineration or by other procedures approved by state and local authorities.
