Dear Ms. Plato Roberts:

The amended labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable.

This approval does not affect any terms or conditions that were previously imposed on this registration. You continue to be subject to existing terms or conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. You must submit one (1) copy of the final printed labeling before you release this product for shipment with the new labeling. In accordance with 40 CFR § 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR § 152.3.

Should you wish to add/retain a reference to your company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the U.S. Environmental Protection Agency (EPA). If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration

Maximum dose (for .98 g mg units), 410 Synergy Shield Verbenone /acre. At high beetle pressure, place 1- 2 Synergy Shield Verbenone per susceptible tree.

Minimum dose (7.8 g units) 20 Synergy Shield Verbenone /acre. At low beetle pressure, place 1 Synergy Shield Verbenone /tree in a grid pattern [Optional Text: "with 46 foot centers"].

Maximum dose (7.8 g units), 60 Synergy Shield Verbenone /acre. At high beetle pressure, place 1-2 Synergy Shield Verbenone /tree in a grid pattern [Optional Text: "with 20 foot centers"].

Timing: Place Synergy Shield Verbenone at least 2 weeks prior to expected flight of the pest. Under normal weather conditions Synergy Shield Verbenone is effective for 70 - 100 days. Use a second treatment as needed.
