Biopesticides and Pollution Prevention Division (7511P)
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

NOTICE OF PESTICIDE:

_Registration  ___Reregistration
(under FIFRA, as amended)

EPA Reg. Number: 90641-2
Date of Issuance: 8/27/2019

Term of Issuance: Unconditional

Name of Pesticide Product: Vectorite with CR-7

Name and Address of Registrant (include ZIP Code):
Bee Vectoring Technology Inc.
4160 Sladeview Crescent #7
Mississauga, Ontario L5L 0A1 Canada

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Biopesticides and Pollution Prevention Division prior to use of the label in commerce. In any correspondence on this product, always refer to the above EPA Registration Number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA or the Act).

Registration is in no way to be construed as an endorsement or recommendation of this product by the U.S. Environmental Protection Agency (EPA). In order to protect health and the environment, the Administrator, on his or her motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under the Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with FIFRA section 3(c)(5) provided that you:

1. Submit and/or cite all data required for registration or registration review of your product when the EPA requires all registrants of similar products to submit such data.

Signature of Approving Official:

Jeannine Kausch, Product Manager 92
Microbial Pesticides Branch
Biopesticides and Pollution Prevention Division (7511P)
Office of Pesticide Programs

Date: 8/27/2019
2. Submit storage stability and corrosion characteristics (Guidelines 830.6317 and 830.6320) data as these data requirements are not satisfied. A one-year study is required to satisfy these data requirements. You have 18 months from the date of this registration to provide these data to the EPA.

3. Make the following labeling change before you release this product for shipment:
   - Revise the EPA Registration Number to read, “EPA Reg. No. 90641-2.”

4. Submit one (1) copy of the final printed labeling for the record before you release this product for shipment.

Should you wish to add/retain a reference to your company’s website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA’s Office of Enforcement and Compliance Assurance.

Your release for shipment of this product constitutes acceptance of these terms. If these terms are not complied with, this registration will be subject to cancellation in accordance with FIFRA section 6. A stamped copy of the labeling is enclosed for your records. Please also note that the record for this product currently contains the following acceptable Confidential Statement of Formula (CSF):
   - Basic CSF dated 08/27/2019

Any CSFs other than that listed above are superseded.

If you have any questions, please contact Donna Kamarei of my team by phone at (703) 347-0443 or via email at kamarei.donna@epa.gov.

Sincerely,

Jeannine Kausch, Product Manager 92

Enclosure
Vectorite™ with CR-7

Vectorite with CR-7 is a broad-spectrum preventative {microbial biofungicide} {microorganism product} for the control or suppression of many important plant diseases (e.g., Botrytis or Gray Mold, Sclerotinia, and Monilinia) and is designed to be applied to crops by {commercially reared} {honey bees} {or} {bumble bees}, exclusively using Bee Vectoring Technology Inc. (BVT)-approved hive dispensers.

{Biofungicide}
{Powder Biofungicide for {Bumble} {or} {Honey} Bee Vectoring}

{ {For Organic Production} {For Use in Organic Production} {Can Be Used in Organic Production} }

Active Ingredient: Clonostachys rosea strain CR-7* .......... 5.00%
Other Ingredients: ............................................................. 95.00%
Total: ............................................................................ 100.00%

*Vectorite with CR-7 contains not less than 3 X 10^8 CFU/g.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID
If inhaled
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
• Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor or going for treatment. For information on this pesticide product (including general health concerns or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378, Monday through Friday, 8:00 AM to 12:00 PM Pacific Time. In the event of a medical emergency, call your poison control center at 1-800-222-1222.

{For Additional Precautionary Statements and Directions for Use: See Inside Booklet.} {See insert label for Precautionary Statements, Directions for Use, and Storage and Disposal.}

EPA Reg. No.: (pending as File Symbol 90641-E)
EPA Est. No.:
Net Weight: xx oz {xx grams} of total Vectorite with CR-7
{XX VectorPak™ trays for bumble bee hives: each tray containing xx oz {xx grams} of Vectorite with CR-7}
{XX VectorPak™ cartridges for honey bee hives: each cartridge containing xx oz {xx grams} of Vectorite with CR-7}
{XX VectorPak™ {bags} {pouches} for honey bee hives: each {bag} {pouch} containing xx oz {xx grams} of Vectorite with CR-7}

[The net weight of the appropriate individual container will also be reflected on the tray/cartridge/bag/pouch label.]

{Batch} {Lot} No:
Not for sale or use after [date stamped here will be 6 months after the date of manufacture]

{Read the {WARRANTY} {CONDITIONS FOR SALE AND LIMITATIONS OF WARRANTY AND LIABILITY} section before use. Use of this product indicates acceptance of the terms presented in the {WARRANTY} {CONDITIONS FOR SALE AND LIMITATIONS OF WARRANTY AND LIABILITY} section.}
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if inhaled. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

Use of this product requires working in an environment with live bees and exercising caution when doing so is therefore required. Individuals can have allergic reactions to bee stings ranging from temporary pain and discomfort to a severe allergic reaction that may require emergency treatment. Refrain from working with or around bees, if you have confirmed severe allergic reactions to bee stings. Call 911 or other emergency services, if you're having a serious reaction to a bee sting that suggests anaphylaxis, even if it's just one or two signs or symptoms. If you were prescribed an emergency epinephrine autoinjector (EpiPen, Auvi-Q, and others), use it as your doctor directed.

When working with bee hives, follow local/industry guidelines to ensure safe working distance from dwellings, roads, and people.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Shoes plus socks

Mixers/loaders and applicators must wear a NIOSH-approved particulate respirator with any N, R, or P filter with NIOSH approval number prefix TC-84A; or a NIOSH-approved powered air purifying respirator with an HE filter with NIOSH approval number prefix TC-21C. Repeated exposure to high concentrations of microbial proteins can cause allergic sensitization.

In conjunction with the PPE specified above, protective bee suits must be worn by individuals who will interact with the bee hives (e.g., individuals that place or refill the {trays} {or} {cartridges} with fresh product).

Follow the manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. If worn, wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

For terrestrial uses - Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark. Do not contaminate water when disposing of equipment washwater or rinsate.
DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

Read entire label before using this product.

[The following two statements will only appear on final printed labeling with honey bee applications.] Commercial Honey Bee Management: This product has not been completely evaluated for effects on bee brood under the labeled use conditions. Monitor your hives and contact the registrant (1-647-660-5119) if effects are observed.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about restricted-entry interval. The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

There is no restricted-entry interval (REI) for this product.

PRODUCT INFORMATION

Vectorite with CR-7 is a broad-spectrum preventative product for the control or suppression of many important plant diseases (e.g., *Botrytis* or Gray Mold, *Sclerotinia*, and *Monilinia*) and for improvement of plant health, growth, and vigor. The carrier, *Vectorite* powder, is offered in {single-use} {VectorPak trays} {and} {or} {VectorPak cartridges} {or} {pre-filled VectorPak bags} {pouches} that are designed for optimum acquisition of the microbial active ingredient by {bumble bees} {or} {honey bees} and its subsequent delivery to plants during the bloom period. Vectorite with CR-7 must only be used with BVT-approved hive dispensers.

BIOLOGICAL PROPERTIES AND MODE OF ACTION

The active ingredient in Vectorite with CR-7, *Clonostachys rosea* strain CR-7, is a {biological control agent} {microorganism} that acts to outcompete plant pathogens on target crops, enhances plant resistance to pathogens (through induced systemic resistance or ISR), and improves plant health, growth, and vigor. *Clonostachys rosea* strain CR-7 was isolated from the root of a wheat plant in Canada.

*Clonostachys* is ecologically a pioneer colonizer of senescing or stressed plant tissues. *Clonostachys rosea* strain CR-7 is applied preventatively, so it has enough time to block *Botrytis* and other pathogens by spatial occupation of flower and leaf tissues. Tissue stress or senescence (such as by pathogens) triggers rapid growth of *Clonostachys rosea* strain CR-7, such that it densely occupies the tissues before pathogens such as *Botrytis*. Pathogens do not displace *Clonostachys* species under normal conditions.

After application to the plant, *Clonostachys rosea* strain CR-7 establishes within the tissues and remains alive but localized where it was applied. Retreatment is necessary to cover new foliage and flowers.
Retreatment may also be necessary following a fungicide application, such as in an integrated pest management (IPM) program. Plant health benefits often result in greater yields or quality of produce at harvest, especially when crops are stressed by pathogens or environmental conditions.

**INTEGRATED PEST MANAGEMENT (IPM)**

Vectorite with CR-7 can be integrated into an overall disease and pest management strategy. Some fungicides could temporarily inhibit the colonization of the active ingredient on the plant; however, the use of Vectorite with CR-7 in the BVT system continuously replenishes the microorganism. Follow disease management practices that are known to reduce disease development. Consult local agricultural authorities for specific IPM strategies developed for your crop(s) and location. If certain conditions persist where the bees cannot fly, and pest or disease pressure becomes excessive, close hives before spraying chemical or biological pesticides to protect the bees. Reopen the hives after the proper interval indicated on the label of the product sprayed. For any chemical or biological pesticide sprayed, consult the label for any potential effect on bees.

**COMPATIBILITY**

Vectorite with CR-7 must be used as is and is not to be altered or mixed with other components.

**CROP TOLERANCE**

Vectorite with CR-7 applied by {bumble} {or} {honey} bees has been shown to provide good crop safety under normal growing conditions.

**USE INSTRUCTIONS**

[Begin Optional Bumble Bee Section]

**Commercial Bumble Bees – Hive Placement and Replacement:**

Bumble bees deliver product up to 400 yards, so place hives accordingly. Follow your bumble bee supplier’s instructions for hive replacement. Depending on the type of hive, replace hives every 4-10 weeks, or if hives suffer a large population loss and/or are no longer active.

The BVT system comprises a bumble bee domicile (hive) with its in-lid dispenser that accepts the Vectorite with CR-7 VectorPak trays.

Manage bumble bees according to standard practices for the cropping system (indoor or outdoor) used in the region. Inspect the bee colonies (within the domicile or hive) for strength and incidence of disease before use. Reject or remove weak or dead colonies from the site. Place the hives level in suitable places for deployment on the target crop (in a greenhouse or hoop house, or in or at the edge of the field) at the density as directed in the **PLANT DISEASES AND APPLICATION RATES** table. Do not place hives in low areas subject to water pooling or flooding. If in the field, place the hives on stands and provide waterproof covers for shade and protection from rain, with all of this being held in place with weight to prevent wind damage to the hives. Keep the area around the entrances of the hives free of weeds and grass that would impede bee activity.

When interacting with the hives, work smoothly and avoid jarring them and agitating the bees within. Use protective clothing that is standard for working with bees. Follow the stepwise instructions (including in the hive packaging) for proper set-up of bee hives.
The health of the hives is the responsibility of the grower. If a hive arrives dead, it must be replaced. Adding new trays and ensuring the hives are open are also the responsibility of the grower.

If Applying Pesticides Other Than Vectorite with CR-7:

Close the gates of the hives to prevent any bees from flying during the spray. Reopen the gates after the proper interval per the label of the applied pesticide. There is a potential hazard for bumble bees, if a hive is closed greater than 24 hours in hot weather (temperatures exceeding 80°F) and/or there is low food supply within the hive.

Placing or Replacing VectorPak Trays:

Vectorite with CR-7 VectorPak trays for bumble bees are preloaded with product. Place one tray per each hive. To place or replace the trays:

1. Close both the in and out gates to the hive.
2. Open the {bee hive lid} {box lid} to reveal the plastic inner bee liner and the flip lid.
3. Open the flip lid, take out {any used} {blank} {or} {empty} tray(s) from the dispenser, and dispose of according to label instructions.
4. Take the new, unopened tray and lightly shake to make the powder level.
5. Remove the foil by pulling the corner and peeling back. Properly dispose of the foil.
6. Place the new tray in the dispenser and close the flip lid.
7. Close the {bee hive lid} {box lid}.
8. Open both gates fully.
9. Check the PLANT DISEASES AND APPLICATION RATES table (below) to see frequency of tray changes (tray flips). The best time to {change trays} {flip trays} is in the early morning hours before the bees are active.

[End Optional Bumble Bee Section]

[Begin Optional Honey Bee Section]

Commercial Honey Bees – Hive Placement and Replacement:

For honey bees, contact a qualified beekeeper for advice about handling.

Although honey bees can forage several miles, they only deliver product up to 400 yards; thus, place hives accordingly. Ask a qualified beekeeper about hive placement and stocking density to maximize foraging and Vectorite with CR-7 delivery. Replace hives as instructed by a beekeeper or if hives suffer a loss and are no longer active.

Manage honey bees according to standard beekeeping practices for the region in which they are being used (state and local apiarists can assist). Inspect hives for strength and incidence of disease before use. Reject and remove weak or dead colonies from the site. Place the hives level in suitable places for deployment on the target crop (in or at the edge of the field) at the density as directed in the PLANT DISEASES AND APPLICATION RATES table. Do not place hives in low areas subject to flooding. Keep the area around the entrances of the hives free of weeds and grass that would impede bee activity.

To allow the bees to become familiar with the system and the crops, install a dispenser in the hive a few days before loading a blank VectorPak cartridge. When interacting with the hives, work smoothly and
avoid jarring them and agitating the bees within. Use protective clothing that is standard for working with bees.

[Directions for placing or replacing VectorPak cartridges]
Placing or Replacing VectorPak Cartridges:

Vectorite with CR-7 VectorPak cartridges for honey bees are preloaded with product. Place one cartridge per each hive. To place or replace the cartridges:
1. Turn the cartridge latch counterclockwise and pull the cartridge (drawer) out from the dispenser.
2. Take out {any used} {blank} {or} {empty} cartridge(s), and dispose of according to label instructions.
3. Take the new, unopened cartridge and lightly shake to make the powder level.
4. Remove the foil by pulling the corner and peeling back. Properly dispose of the foil.
5. Place the new cartridge in the dispenser and press until there is an audible “click.” Turn the latch clockwise to secure the cartridge in place.
6. Push the cartridge (drawer) back into the dispenser.
7. Check the PLANT DISEASES AND APPLICATION RATES table (below) to see frequency of cartridge changes {cartridge flips}. The best time to {change cartridges} {flip cartridges} is in the early morning hours before the bees are active.

[Filling VectorPak Cartridges with the Contents of VectorPak {Bags} {Pouches}]
Filling VectorPak Cartridges with the Contents of VectorPak {Bags} {Pouches}:

Vectorite with CR-7 VectorPak {bags} {pouches} for honey bees are premeasured with product to fill VectorPak cartridges. To fill the cartridges:
1. Turn the cartridge latch counterclockwise and pull the cartridge {drawer} out from the dispenser.
2. Open the cartridge lid.
3. Tear open the {bag} {pouch} and fully empty the contents into the cartridge.
4. Use the edge of the {bag} {pouch} to evenly spread and level the contents of the cartridge. Dispose of the empty {bag} {pouch} according to label instructions.
5. Close the cartridge lid.
6. Push the cartridge {drawer} back into the dispenser and secure it by turning the latch clockwise.
7. Check the PLANT DISEASES AND APPLICATION RATES table (below) to see frequency for refilling cartridges with the contents of a new {bag} {pouch}. The best time to refill cartridges is in the early morning hours before the bees are active.

[End Optional Honey Bee Section]

PREHARVEST INTERVAL (PHI)
There is no PHI for this product. Vectorite with CR-7 can be applied up to the day of harvest.

PLANT DISEASES AND APPLICATION RATES
[Note to reviewer: The replacement timing for the VectorPak trays, cartridges, bags, and pouches is dependent upon their net weight. Larger sizes will be replaced less frequently. Replacement frequency will be within 2-21 days with a tighter range indicated on the final printed labeling.]

## CROP OR CROP GROUPING

### Kiwifruit

**Disease:** Botrytis

4-6 hives/acre. Place bee hives 4 days prior to first bloom, place product at first bloom, and replace product, as indicated immediately below, throughout bloom.

[Bumble bee label] Replace VectorPak trays every \{xx-xx days\} during bloom.

[Honey bee label] {Replace VectorPak cartridges} {or} {Refill dispenser cartridges with VectorPak \{bag\} \{pouch\} contents} every \{xx-xx days\} during bloom.

### Legumes Vegetables (Succulent or Dried)

Beans, Broad Bean, Chickpea (Garbanzo Bean), Lentil, Peas, Pigeon Pea, Soybean

**Disease:** Colletotrichum (Anthracnose), Botrytis

2 hives/acre. Place bee hives 4 days prior to first bloom, place product at first bloom, and replace product, as indicated immediately below, throughout bloom.

[Bumble bee label] Replace VectorPak trays every \{xx-xx days\} during bloom.

[Honey bee label] {Replace VectorPak cartridges} {or} {Refill dispenser cartridges with VectorPak \{bag\} \{pouch\} contents} every \{xx-xx days\} during bloom.

### Oilseeds: Rapeseed, Canola, Mustard Seed, Sunflower

**Disease:** Sclerotinia

1-6 hives/acre for rapeseed, canola, and mustard seed. 0.3-1 hive/acre for sunflower. Place bee hives 4 days prior to first bloom, place product at first bloom, and replace product, as indicated immediately below, throughout bloom.

[Bumble bee label] Replace VectorPak trays every \{xx-xx days\} during bloom.

[Honey bee label] {Replace VectorPak cartridges} {or} {Refill dispenser cartridges with VectorPak \{bag\} \{pouch\} contents} every \{xx-xx days\} during bloom.

### Pome Fruit:

Apple, Mayhaw, Pears, Quince, and Other Pome Fruit

**Disease:** Alternaria, Monilinia

4-6 hives/acre. Place bee hives 4 days prior to first bloom, place product at first bloom, and replace product, as indicated immediately below, throughout bloom.

[Bumble bee label] Replace VectorPak trays every \{xx-xx days\} during bloom.

[Honey bee label] {Replace VectorPak cartridges} {or} {Refill dispenser cartridges with VectorPak \{bag\} \{pouch\} contents} every \{xx-xx days\} during bloom.
### CROP OR CROP GROUPING

| Stone Fruit: Apricot, Cherries, Nectarine, Peach, Plums, Prune (Fresh), and Other Stone Fruit | Monilinia | 4-6 hives/acre. Place bee hives 4 days prior to first bloom, place product at first bloom, and replace product, as indicated immediately below, throughout bloom.  
[Bumble bee label] Replace VectorPak trays every {xx-xx days}\(^{\dagger}\) during bloom.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**Pesticide Storage:** Store in a dry, refrigerated place (~39°F (~4°C)) in original container. Keep from overheating.

**Pesticide Disposal:** To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry). Do not hold product for use in the subsequent season.

**Container Handling:** VectorPak trays} and} {or} {VectorPak cartridges} and} {or} {VectorPak bags} {pouches} are nonrefillable. Do not reuse or refill these containers. After use, offer for recycling if available or dispose of in a sanitary landfill or by other procedures approved by state and local authorities. **WARRANTY} {CONDITIONS FOR SALE AND LIMITATIONS OF WARRANTY AND LIABILITY**}

**IMPORTANT: READ BEFORE USE**

Read the entire Directions for Use, Conditions, Disclaimer of Warranties, and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product at once for a refund of the purchase price. By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties, and Limitations of Liability. These terms may only be modified by a written document signed by a duly authorized representative of Bee Vectoring Technology Inc.
CONDITIONS: The directions for use of this product must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, the quality of the bees used, presence of other materials, or the manner of use or application, all of which are beyond the control of Bee Vectoring Technology Inc. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, all such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, Bee Vectoring Technology Inc. MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, THAT EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL. No distributor of Bee Vectoring Technology Inc.’s products is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, Bee Vectoring Technology Inc. DISCLAIMS ANY LIABILITY WHATSOEVER FOR SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

LIMITATIONS OF LIABILITY: TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, THE EXCLUSIVE REMEDY OF THE USER OR BUYER FOR ANY AND ALL LOSSES, INJURIES, OR DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, WHETHER IN CONTRACT, WARRANTY, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL NOT EXCEED THE PURCHASE PRICE PAID, OR AT Bee Vectoring Technology Inc.’s ELECTION, THE REPLACEMENT OF PRODUCT.

CAUTION

FIRST AID
If inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.
- Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor or going for treatment. For information on this pesticide product (including general health concerns or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378, Monday through Friday, 8:00 AM to 12:00 PM Pacific Time. In the event of a medical emergency, call your poison control center at 1-800-222-1222.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION
Harmful if inhaled. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

Use of this product requires working in an environment with live bees and exercising caution when doing so is therefore required. Individuals can have allergic reactions to bee stings ranging from temporary pain and discomfort to a severe allergic reaction that may require emergency treatment. Refrain from working with or around bees, if you have confirmed severe allergic reactions to bee stings. **Call 911 or other emergency services**, if you’re having a serious reaction to a bee sting that suggests anaphylaxis, even if it’s just one or two signs or symptoms. If you were prescribed an emergency epinephrine autoinjector (EpiPen, Auvi-Q, and others), use it as your doctor directed.

When working with bee hives, follow local/industry guidelines to ensure safe working distance from dwellings, roads, and people.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Shoes plus socks

Mixers/loaders and applicators must wear a NIOSH-approved particulate respirator with any N, R, or P filter with NIOSH approval number prefix TC-84A; or a NIOSH-approved powered air purifying respirator with an HE filter with NIOSH approval number prefix TC-21C. Repeated exposure to high concentrations of microbial proteins can cause allergic sensitization.
In conjunction with the PPE specified above, protective bee suits must be worn by individuals who will interact with the bee hives (e.g., individuals that place or refill the [trays] [or] [cartridges] with fresh product).

Follow the manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables are available, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove PPE immediately after handling this product. If worn, wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

For terrestrial uses - Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in a dry, refrigerated place (~39°F (4°C)) in original container. Keep from overheating.

Pesticide Disposal: To avoid wastes, use all material in this container by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry). Do not hold product for use in the subsequent season.

Container Handling: [VectorPak trays] [and] [or] [VectorPak cartridges] [or] [VectorPak bags] [pouches]) are nonrefillable. Do not reuse or refill these containers. After use, offer for recycling if available or dispose of in a sanitary landfill or by other procedures approved by state and local authorities. If the outer box is contaminated, dispose of it in the same manner as required for [VectorPak trays] [and] [or] [VectorPak cartridges] [or] [VectorPak bags] [pouches].

EPA Reg. No.: (pending as File Symbol 90641-E)
EPA Est. No.: XXXXX-XX-XXX

Net Weight: xx oz [xx grams] of total Vectorite with CR-7

{XX VectorPak™ trays for bumble bee hives: each tray containing xx oz [xx grams] of Vectorite with CR-7}
{XX VectorPak™ cartridges for honey bee hives: each cartridge containing xx oz [xx grams] of Vectorite with CR-7}
{XX VectorPak™ bags} [pouches] for honey bee hives: each [bag] [pouch] containing xx oz [xx grams] of Vectorite with CR-7

[The net weight of the appropriate individual container will also be reflected on the tray/cartridge/bag/pouch label.]
