

U.S. ENVIRONMENTAL PROTECTION AGENCY

Office of Pesticide Programs
Registration Division (7505P)
1200 Pennsylvania Ave., N.W.
Washington, D.C. 20460

EPA Reg.
Number:

90780-16

Date of Issuance:

5/12/20

NOTICE OF PESTICIDE:

☒ Registration
☐ Reregistration

(under FIFRA, as amended)

Term of Issuance:

Conditional Time-
Limited Expires: 5/12/21

Name of Pesticide Product:

TC Mouse Killer 120-Purple

Name and Address of Registrant (include ZIP Code):

Jane Rothwell
Sr. Analyst, Regulatory Affairs
The Scotts Company LLC d/b/a Tomcat Brands
Po Box 190
Marysville, OH 43040

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(A). You must comply with the following conditions:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.

Signature of Approving Official:

Venus Eagle, Product Manager 01
Invertebrate and Vertebrate Branch 3, Registration Division (7505P)

Date:

5/12/20

2. You are required to provide the missing raw validation data for Guideline 830.1800 Enforcement analytical method for MRID 48270101 or conduct a new study that includes raw data. This data must be submitted to the Agency within 120 days from the date of this letter.
3. You are required to comply with the data requirements described in the DCI identified below:
 - a. Bromethalin GDCI-112802-1717

You must comply with all of the data requirements within the established deadlines. If you have questions about the Generic DCI listed above, you may contact the Chemical Review Manager in the Pesticide Reevaluation Division:

<http://iaspub.epa.gov/apex/pesticides/f?p=chemicalsearch:1>

4. Make the following label changes before you release the product for shipment:
 - Revise the EPA Registration Number to read, “EPA Reg. No. 90780-16.”
5. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

- Basic CSF dated 04/23/2020
- Alternate CSF A dated 04/23/2020

If you have any questions, please contact Paul Di Salvo by phone at 703-347-0322, or via email at disalvo.paul@epa.gov.

Enclosure: Stamped Label

OUTER PACKAGE - COMPLETE LABEL

ACCEPTED

05/12/2020

Under the Federal Insecticide, Fungicide
and Rodenticide Act as amended, for the
pesticide registered under
EPA Reg. No. 90780-16

FIRST AID	
IF SWALLOWED:	<ul style="list-style-type: none">• Call a poison control center, doctor, or 1-877-465-5161 immediately for treatment advice• Have person sip a glass of water if able to swallow.• Do not induce vomiting unless told to do so by the poison control center or doctor
ON SKIN:	<ul style="list-style-type: none">• Wash with plenty of soap and water.
HAVE LABEL WITH YOU WHEN OBTAINING TREATMENT ADVICE	
TREATMENT FOR PET POISONING If an animal eats this bait, call a veterinarian at once.	
NOTE TO PHYSICIAN OR VETERINARIAN Contains the nerve poison bromethalin. This product is not an anticoagulant type rodenticide. For humans or animals ingesting bait and/or showing poisoning signs (such as muscle tremors, loss of hind limb use, or seizures for animals), limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.	

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Bait contents harmful if swallowed. Keep away from children, domestic animals and pets. Any person who retrieves carcasses or unused bait following application of this product must wear gloves.

USER SAFETY REQUIREMENTS: As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco, or using the toilet.

ENVIRONMENTAL HAZARDS

This product is extremely toxic to fish, birds and other wildlife. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions. Use only for the sites, pests and application methods described on this label.

USE RESTRICTIONS:

This bait station may be used in areas accessible to children and pets, consistent with all use restrictions and other requirements indicated on this label. Do not apply further than 50 feet from home or building.

For control only of house mice. This bait station can only be refilled with the block bait sold with this station. This product [TC Mouse Killer 120 PURPLE] must be used in and around buildings consistent with all use restrictions and other requirements indicated on this label. Do not place this bait station or stored block bait in any area where there is a possibility of contaminating food or surfaces that come into direct contact with food. Store bait block refills out of reach of children and pets.

[Note to PM: "Either Option 1 or Option 2 presentation will be listed on the final printed label.]

[Option 1]

SELECTION OF TREATMENT AREAS [Indoors & Outdoors]: Determine areas where house mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places.

APPLICATION DIRECTIONS:

While wearing gloves, place one block of bait in the bait station. See additional GRAPHICS AND TEXT. Place the bait station at point of highest activity along a wall or in corner where signs of house mice have been seen. If additional units are to be used, place bait stations at 8- to 12-foot intervals. While wearing gloves, replace bait in bait station if bait is consumed or contaminated and house mice still are using the bait station. Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are fresh signs of house mouse activity in infested areas. Mice will eat a small amount of bait and leave the station. You likely will not find a dead mouse in the station.

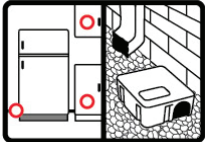

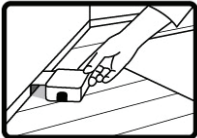

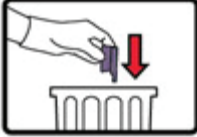

Note to PM: alternate language: "While still holding tab, squeeze prongs of bait cartridge [with your right hand] and pull it away from station."

Note to PM: Visual of “Loading bait into station can be in either photos shown above or icons as shown below with text from chart.

Follow-up: Wearing gloves, collect and properly dispose of any leftover bait or carcasses. Carcasses should be placed in an outdoor garbage can. To discourage re-infestation, eliminate food, water and harborage as much as possible. If re-infestation does occur, repeat treatment.

[Option 2] APPLICATION DIRECTIONS

1. Selection of Treatment Areas [Indoors & Outdoors] 	2. Remove Bait Cartridge 	3. Load Bait 	4. Placing Bait Stations 	5. Monitor 	6. Follow Up 
<p>Determine areas where house mice will most likely consume the bait. Generally, these areas are along walls, by gnawed openings, in corners and concealed places.</p>	<p>Flip station over to remove the cartridge from the bottom of the station. With your left hand, push tab up. While still holding tab, squeeze prongs of bait cartridge and pull it away from station.</p>	<p>While wearing gloves, place one block of bait in the bait station. Place bait into cartridge. Push the loaded cartridge into station until the cartridge clicks into place.</p>	<p>Place bait station at point of highest activity along a wall or in corner where signs of house mice have been seen. If additional units are to be used, place bait stations at 8- to 12-foot intervals.</p>	<p>Maintain an uninterrupted supply of fresh bait for at least 15 days or until there no longer are fresh signs of house mouse activity in infested areas. While wearing gloves, replace the block bait if it has been consumed or contaminated and house mice are still using the bait station. Mice will eat a small amount of bait and leave the station. You likely will not find a dead mouse in the station.</p>	<p>Wearing gloves, collect and properly dispose of any leftover bait and/or carcasses. Carcasses should be placed in an outdoor garbage can. To discourage re-infestation, eliminate food, water and harborage as much as possible. If re-infestation does occur, repeat treatment.</p>

STORAGE AND DISPOSAL

Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets.

Pesticide Disposal and Container Handling: Nonrefillable Container. Do not reuse or refill container except as described in the Directions For Use.

If Empty: Place in trash or offer for recycling if available.

If Partly Filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

Note to PM- Warranty/Guarantee or notice statements may or may not appear on market label

WARRANTY: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions

Notice: To the extent consistent with applicable law, buyer assumes all risks of use, storage or handling of this product not in accordance with directions.
