Electronic Transmittal: cmaira@srcconsultants.com

Subject: PRIA Label and CSF Amendment – Add efficacy claims against Feline calicivirus, for inclusion on List N; update alternate CSF.
Product Name: BIO-OXYGEN CHEM DECON PART B
EPA Registration Number: 90920-2
Received Date: 3/29/2022
Action Case Number: 00351043

Dear Crystal Maira:

The amended label and CSF(s) referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, are acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6), you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

The review of this PRIA submission package also included the review of a Notification (Action Code: 00336845) submitted by the registrant 11/29/2021. The changes are acceptable and the notification has been closed, and our records have been updated to reflect the addition of those alternate CSFs accordingly

Please note that the record for this product currently contains the following CSF(s):

- Basic CSF dated 7/13/2021
- Alternate CSF 1 dated 11/29/2021

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Jamie Gobreski by phone at 202-566-0748 or via email at gobreski.jamie@epa.gov.

Sincerely,

A handwritten signature in black ink that reads "Steven Snyderman". The signature is written in a cursive, flowing style.

Steven Snyderman, Product Manager 33
Regulatory Management Branch II
Antimicrobials Division (7510M)
Office of Pesticide Programs

Enclosure: Stamped Final Label

BIO-OXYGEN® CHEM DECON PART B

[Alternate brand names:]

Bio-Oxygen® Mold 100 Part B, Bio-Oxygen® Sani-Cloud Part B, Bio-Oxygen® Interceptor Part B
Bio-Oxygen® Decon Pro Part B

Active Ingredient:

Hydrogen Peroxide7.9%

Other Ingredients:92.1%**Total:**100.0%**KEEP OUT OF REACH OF CHILDREN****DANGER**

[Note to Reviewer: In accordance with 40 CFR 156.68(d), all first aid statements, as prescribed, will appear on the front panel of the product label.]

FIRST AID	
IF IN EYES	Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.
IF ON SKIN	Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.
IF SWALLOWED	Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF INHALED	Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.
Have the product container or label with you when calling a poison control center or doctor or going for treatment.	
NOTE TO PHYSICIAN Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER. Corrosive. Causes irreversible eye damage. Causes skin irritation. Harmful if inhaled. Do not get in eyes, on skin, or on clothing. Avoid breathing vapor or spray mist. Wear protective eyewear such as goggles, face shield or safety glasses. Wear chemical resistant gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

(For containers less than 5 gallons in size, use the below statement)

For small spills, flush with copious amounts of water.

(For containers equal to or larger than 5 gallons in size, use the below statement)

For small spills, flush with copious amounts of water. Do not discharge effluent containing these products into lakes, streams, ponds, estuaries, oceans, or public waters unless these products are specifically identified and addressed in a NPDES permit.

THE INFORMATION IN THIS BOX IS NOT PART OF THE LABEL

Statements in brackets, [] are optional and/or instructional. Text that is both bold and italicized and/or italicized words are informational to the reader and are not for inclusion on market labels. The term "this product" used throughout this document may be replaced with the marketed product name.

Do not discharge effluent containing these products to sewer systems without previously notifying the sewage plant authority. For guidance contact your State Water Board or Regional office of the U.S. Environmental Protection Agency.

(Below use container handling language appropriate for the size)

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

STORAGE: Store in a dry place no lower in temperature than 50°F or higher than 120°F.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING

(For product in containers 5 gallons or less:)

Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows: Fill container 1/4 full with water and recap. Shake for 10 seconds. Drain for 10 seconds after the flow begins to drip. Follow Pesticide Disposal instructions for rinsate disposal. Repeat procedure two more times. Offer for recycling or reconditioning if available. If not available, discard in trash.

(For product in containers larger than 5 gallons:)

Nonrefillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows: Fill container 1/4 full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn container over onto its other end and tip it back and forth several times. Follow Pesticide Disposal instructions for rinsate disposal. Repeat procedure two more times. Offer for recycling or reconditioning if available. If not available, discard in trash.

[List of Approved Organisms:]

[[This product] is designed specifically as a general cleaner and disinfectant* for use in homes, hospitals, and commercial facilities.] [[This product] [It] is formulated to disinfect* hard, nonporous, inanimate environmental surfaces.] [[This product] [It] may be used in the kitchen on non-food contact surfaces. If used on food contact surfaces, rinse with potable water prior to food contact.] [In addition, this product deodorizes areas that are hard to keep fresh smelling and are prone to odors caused by microorganisms.]

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

[PRODUCT NAME] PREPARATION [OF USE-SOLUTION] DIRECTIONS – [Product name] is a binary (two-part) system. PART A is a surfactant formulation; PART B is a hydrogen peroxide-based formulation. Thoroughly mix EQUAL VOLUMES of PART A and PART B. Apply the solution as a spray onto surfaces as directed below.

(Note to Reviewer: For labels that list medical devices and/or stainless-steel surfaces, the following FDA/EPA Memorandum of Understanding statement must be used.) This product is not for use on medical device surfaces.

TO CLEAN: Thoroughly mix EQUAL VOLUMES of PART A and PART B. Prior to use on surfaces, remove visible soil[s], spray the mixture (PART A and PART B) onto the surface and allow to penetrate (about 2 minutes), and then clean thoroughly.

FOR STAIN REMOVAL: Thoroughly mix EQUAL VOLUMES of PART A and PART B. Spray liberally to coat surfaces and allow to remain wet for 30 minutes. Scrub surface with sponge to remove stains. Rinse treated area with water.

ALLERGEN[‡] REMOVAL: to [clean and] reduce specified allergens[‡]: Thoroughly mix EQUAL VOLUMES of PART A and PART B. [set trigger to spray]. Spray, [wait 10 minutes,] and wipe excess. [Rinse.] Allow to air dry. [If streaking is observed, wipe with a clean, damp [cloth] [or] [paper] [towel]].]

CARPET CLEANING: This product can be used to clean [and deodorize] carpets in [industrial], [institutional], [commercial], [and] [residential] areas. For use on wet-cleanable synthetic fibers. Do not use on wool. Test fabric for color fastness. Do not mix this product with other cleaning products. Vacuum carpet thoroughly prior to cleaning. Thoroughly mix EQUAL VOLUMES of PART A and PART B and apply to carpet by spray or by following the cleaning procedures specified by the manufacturer of the cleaning equipment. Do not over wet. After using this product set the carpet pile and protect the carpet from furniture legs and bases while drying.

DISINFECTION / VIRUCIDAL[^] / FUNGICIDAL DIRECTIONS: Pre-clean visibly soiled areas. To disinfect hard, nonporous surfaces, apply the mixture until thoroughly wet and allow to remain visibly wet for 10 minutes. No scrubbing is necessary. The product will not leave grit.

(Note to reviewer: The following statement will be used on all labels with directions for animal premises)

Statements in brackets, [] are optional and/or instructional. Text that is both bold and italicized and/or italicized words are informational to the reader and are not for inclusion on market labels. All directions may be written in numbered or paragraph form. The sequence of statements is optional unless otherwise specified in 40 CFR § 156.10. Variables such as capitalizing, bolding, italicizing, singularizing, pluralizing, and abbreviations as well the addition of commas or other punctuation are permitted variables unless specified in 40 CFR. Lists of uses, use sites and surfaces may be used partially or in their entirety. The terms center(s), facility(ies), area(s), units(s), clinic(s), room(s), lab(s), departments(s), suite(s), office(s) in the use site tables are interchangeable as applicable. All use surfaces and/or use sites on the label may be listed in conjunction with an image of the use surface and/or use site. The term "this product" used throughout this document may be replaced with the marketed product name.

Prior to use of this product, remove all animals [and] [or] [poultry] and feeds from [premises] [areas to be treated], animal transportation [vehicles] [trucks] [cars], and [enclosures] [coops] [crates] [kennels] [stables]. Remove all litter, droppings, and manure from floors, walls, and surfaces of barns, pens, stalls, chutes and other surfaces of facilities and fixtures occupied or traversed by [poultry or other] animals. Empty all troughs, racks and other feeding and watering appliances. Thoroughly clean surfaces with soap or detergent and rinse with water.

ANIMAL PREMISE DISINFECTANT / VIRUCIDE[^]: Surfaces should be visibly clean prior to disinfection. Apply the prepared use-solution to disinfect hard, non-porous surfaces with a [mechanical spray device,] [coarse spray] [trigger spray device]. Spray 6-8 inches from surface until thoroughly wet. Do not breathe spray. Thoroughly spray hard, non-porous surfaces used in handling animals, as well as forks, shovels, and scrapers used for removing litter and manure in the use solution. Treated surfaces must remain visibly wet for 10 minutes. Ventilate buildings, coops, and other closed spaces. Do not house [animals] [poultry] [livestock] or employ equipment until treatment has set or dried. Thoroughly scrub all treated feed racks, troughs, automatic feeders, fountains and waterers and other treated equipment which can contact food or water with soap or detergent, and rinse with potable water before reuse.

FOR HATCHERY DISINFECTION / VIRUCIDE[^]: Remove remaining eggs and chicks, and all visible particular and other hatching-related debris. Thoroughly wash all surfaces with a recommended detergent or cleaning solution and then rinse with potable water. Apply a prepared use-solution of [product name] to treat hatchers, setters, trays, racks, carts, sexing tables, delivery trucks and other hard, non-porous surfaces. Treated surfaces must remain visibly wet for 10 minutes. Allow to air dry. Allow to air dry before re-introducing eggs.

FOR DISINFECTING RENDERING PLANTS: Can be used to disinfect hard, non-porous equipment, utensils, walls, and floors in poultry and animal render plants [including] [offal rooms,] [exterior walls,] [and] [loading platforms]. Cover or remove all food and packaging materials. Remove all visible soils prior to application. Apply a prepared use-solution and scrub to loosen all soils. Surfaces must remain visibly wet for 10 minutes, and then be thoroughly rinsed with potable water before operations are resumed.

FOR VEHICLE DISINFECTION / VIRUCIDE[^]: Surfaces should be visibly clean prior to disinfection. To [clean and] disinfect hard, non-porous surfaces on vehicles including mats, crates, cabs, and wheels, apply a prepared use-solution to hard, non-porous surfaces on vehicles until thoroughly wet. Treated surfaces must remain visibly wet for 10 minutes.

MOLD REMOVAL: This product kills mold on hard non-porous surfaces. Pre-clean visibly soiled areas, then spray and wet surfaces with the prepared product mixture. The surface must remain wet for at least 10 minutes. Allow the surface to completely dry. Reapply as necessary.

DEODORIZING: [Product name] is an effective deodorizer when applied to areas affected with odors. Always check fabric surfaces for colorfastness when applying [Product name]. Remove visible soil. To eliminate odors, mix equal parts of [Product Name] PART A and [Product Name] PART B and apply to surfaces until they appear wet. Allow product to air dry.

FOR USE AS A DEODORIZER AFTER SEWER BACKUP & RIVER FLOODING [Not for use in CA]: To use as a deodorizer, properly mix [product name] PART A and [product name] PART B according to mixing instructions. Remove visible soil along with non-salvageable materials. Saturate all affected areas with a [mechanical spray device,] [hand pump,] [coarse spray,] [or] [trigger spray device] before and after cleaning and extraction. Spray 6 – 8 inches from the surface. Do not breathe spray. Use proper ventilation.

[WATER] [AND] [SMOKE] DAMAGE RESTORATION [Not for use in CA]: Effective against odor caused by [smoke] [and] [water] damage. [This product is particularly suitable for use in water damage restoration.] Mix [product name] PART A and [product name] PART B according to mixing instructions. Remove visible soil along with non-salvageable materials. Saturate all affected areas with a [mechanical spray device,] [hand pump,] [coarse spray,] [or] [trigger spray device] before and after cleaning and extraction. Spray 6 – 8 inches from the surface and allow surface to remain visible wet for at least 10 minutes. Do not breathe spray. Use proper ventilation.

THE INFORMATION IN THIS BOX IS NOT PART OF THE LABEL

Statements in brackets, [] are optional and/or instructional. Text that is both bold and italicized and/or italicized words are informational to the reader and are not for inclusion on market labels. All directions may be written in numbered or paragraph form. The sequence of statements is optional unless otherwise specified in 40 CFR § 156.10. Variables such as capitalizing, bolding, italicizing, singularizing, pluralizing, and abbreviations as well the addition of commas or other punctuation are permitted variables unless specified in 40 CFR. Lists of uses, use sites and surfaces may be used partially or in their entirety. The terms center(s), facility(ies), area(s), units(s), clinic(s), room(s), lab(s), departments(s), suite(s), office(s) in the use site tables are interchangeable as applicable. All use surfaces and/or use sites on the label may be listed in conjunction with an image of the use surface and/or use site. The term "this product" used throughout this document may be replaced with the marketed product name.

FOR USE AS A DEODORIZER FOR HVAC SYSTEMS DUCTWORK [Not for use in CA]: Properly mix [product name] PART A and [product name] PART B according to mixing instructions. Apply the mixture and let air dry to eliminate odors. When fogging to eliminate odors, apply 1 quart per 2000 cubic feet following fogger manufacturer's directions for use. If fogging, remove all people and animals from the area. Applicators must vacate area immediately following initiation of the fogging apparatus.

FOR NON-PUBLIC HEALTH TREATMENT OF NON-POROUS ANIMAL DRINKING LINES [Not for use in CA]:

Prior to use in animal drinking lines, remove all animals, livestock, and birds from the [(building) (premises)]. Animals, livestock, and birds may not be introduced until water lines have been treated and followed with a potable water rinse. Properly mix [product name] according to mixing instructions. Fill the system by pumping or drawing the [product name] mixture through the system. The [Product name] mixture must fill the lines. Make sure drinkers are working and trigger to ensure the [product name] mixture streams over the nipple. Surfaces must remain visibly wet for 10 minutes. Use a potable water rinse to thoroughly flush the system. This application is for non-public health uses only.

SWIMMING POOL APPLICATIONS [Not for use in CA]: When used as directed, this product may be used as an algacide to treat walls of swimming pools.

ALGAEICIDE USE [Not for use in CA] - After draining or before filling pool, spray, and scrub walls with product. Allow to remain on surface for 30 minutes prior to rinsing.

Choose from the selections in the following tables as appropriate, location optional:

(Note to reviewer: Each entry below represents a graphic depicting either the corresponding type of surface or corresponding use site/area. No people, animal or food will be depicted in graphics. For microwave and refrigerator surfaces, only exterior images will be depicted. For use sites/areas, the graphics will only represent individual objects or outsides or insides of buildings as described below. Toy graphics will be submitted to Agency for review.)

Table 1 Medical/Dental Use Sites:

[Product name] is recommended for use on hard non-porous surfaces in

Ambulances	[ICUs] [Intensive Care Units]	Outpatient facilities
Anesthesia equipment surfaces	Hospice [care] [centers][facilities]	Patient [waiting] rooms
Blood Banks	Hospital rooms	Patient areas
Blood Draw Facilities	Hospitals	Patient restrooms
[Blood][Plasma] donation [facilities] [centers]	Imaging [facilities] [centers]	[Pediatric Intensive Care Units] [PICUs]
Central [Sterile] Services [Departments]	Inpatient facilities	Physical therapy facilities
Central Supply [Departments]	Maternity wards	Psychiatric facilities
Clinics	Medical offices	Radiology [room] [areas]
[Critical care units] [CCUs]	Medical wards	Rehabilitation [centers] [facilities]
Dental [offices] [facilities]	Memory centers	Respiratory therapy areas
Dialysis [facilities] [centers]	[Mobile] medical [trailers] [trucks] [facilities]	Urgent care [facilities] [centers]
Diagnostic [centers] [facilities]	Nurse stations	Vaccine sites
Doctor offices	Nursing homes	Vision centers
[Emergency] [Medical] [transport] vehicles	Operating rooms	Walk-in clinics
Emergency rooms	Operating theaters

[Hard] [laminated] plastics	Sealed quartz	Wood siding
Metals	Sealed stone	Baked enamel
Painted [surfaces][walls]	Sealed stone[-like] composites	Linoleum

Emerging Viral Pathogens

This product qualifies for emerging viral pathogen claims per the EPA's "Guidance to Registrants: Process for Making Claims Against Emerging Viral Pathogens not on EPA-Registered labels" when used in accordance with the appropriate use directions indicated below.

This product qualifies for emerging pathogen claims against the following viral categories:

- Enveloped Viruses
- Large, Non-enveloped Viruses

For an emerging viral pathogen that is a/an...	...follow the directions for use for the following organism(s) on the label:
Enveloped virus	Feline calicivirus, Strain F-9 (ATCC VR-782) (as a surrogate for Human Norovirus)
Large, non-enveloped virus	Feline calicivirus, Strain F-9 (ATCC VR-782) (as a surrogate for Human Norovirus)

[Product name] has demonstrated effectiveness against viruses similar to [name of emerging virus] on hard, non-porous surfaces. Therefore, [product name] can be used against [name of emerging virus] when used in accordance with the directions for use against Feline calicivirus on hard, non-porous surfaces. Refer to the [CDC or OIE] website at [pathogen-specific website address] for additional information.

{OR}

[Name of illness/outbreak] is caused by [name of emerging virus]. [Product name] kills similar viruses and therefore can be used against [name of emerging virus] when used in accordance with the directions for use Feline calicivirus on hard, non-porous surfaces. Refer to the [CDC or OIE] website at [website address] for additional information.

* when used according to disinfection directions on hard, non-porous surfaces

* (Note to Reviewer: The symbol * will appear as a qualifier for bacteria only if the claim is appearing on a separate part of the container label.)
