

U.S. ENVIRONMENTAL PROTECTION AGENCY  
 Office of Pesticide Programs  
 Registration Division (7505P)  
 1200 Pennsylvania Ave., N.W.  
 Washington, D.C. 20460-0001

**EPA Reg. Number:**  
  
91234-33

**Date of Issuance:**  
  
10/02/2017

**NOTICE OF PESTICIDE:**

Registration  
 Reregistration  
 (under FIFRA, as amended)

**Term of Issuance:**  
Conditional

**Name of Pesticide Product:**  
A117.02™

**Name and Address of Registrant (include ZIP Code):**

Mr. Michael Kellogg  
 Agent for Atticus, LLC  
 c/o Pyxis Regulatory Consulting, Inc.  
 4110 136<sup>th</sup> St. Ct. NW  
 Gig Harbor, WA 98332

**Note:** Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(B). You must comply with the following conditions:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.

**Signature of Approving Official:**

Richard Gebken, Product Manager 10  
 Invertebrate & Vertebrate Branch 2  
 Registration Division (7505P)  
 Office of Pesticide Programs

**Date:**

10/02/2017

2. You are required to comply with the data requirements described in the DCI or EDSP Order identified below:
  - a. Propargite GDCI-097601-1421
  - b. Propargite EDSP-097601-0020
  - c. Propargite EDSP-097601-0021

You must comply with all of the data requirements within the established deadlines. If you have questions about the Generic DCI or EDSP Order listed above, you may contact the Chemical Review Manager in the Pesticide Reevaluation Division:

[http://www.epa.gov/oppsrrd1/contacts\\_prd.htm](http://www.epa.gov/oppsrrd1/contacts_prd.htm)

3. Be aware that proposed data requirements have been identified in a Work Plan or proposed DCI. For more information on these proposed data requirements, you may contact the Chemical Review Manager in the Pesticide Reevaluation Division:  
[http://www.epa.gov/oppsrrd1/contacts\\_prd.htm](http://www.epa.gov/oppsrrd1/contacts_prd.htm)
4. The data requirements for storage stability and corrosion characteristics (Guidelines 830.6317 and 830.6320) are not satisfied. A one year study is required to satisfy these data requirements. You have 18 months from the date of registration to provide these data.
5. Make the following label changes before you release the product for shipment:
  - Revise the EPA Registration Number to read, "EPA Reg. No. 91234-33."
6. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

- Basic CSF dated 05/05/2017

Page 3 of 3  
EPA Reg. No. 91234-33  
Decision No. 529609

If you have any questions, please contact Mr. Carmen J. Rodia, Jr. by phone at (703) 306-0327, or via email at [Rodia.Carmen@epa.gov](mailto:Rodia.Carmen@epa.gov).

Sincerely,

Richard Gebken  
Product Manager 10  
Invertebrate & Vertebrate Branch 2  
Registration Division (7505P)  
Office of Pesticide Programs

*Enclosures: Master Label Stamped "Accepted," dated 10/02/2017  
Product Chemistry Review, dated 07/19/2017  
Similarity Clinic Memorandum, dated 06/23/2017*

10/02/2017

Under the Federal Insecticide, Fungicide  
and Rodenticide Act as amended, for the  
pesticide registered under  
EPA Reg. No. 91234-33

## Sublabel A

[Note to reviewer: [Text] in brackets denotes optional text].

[Note to reviewer: {Text} in braces denotes where in the final label text will appear.]

### {BOOKLET FRONT PANEL LANGUAGE}

#### RESTRICTED USE PESTICIDE

Due to eye and skin effects. For retail sale to and use by Certified Applicators, or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

### A117.02

#### Agricultural Miticide

[Alternate Brand Names: Endomite, Decimite]

GROUP	12C	ACARACIDE
-------	-----	-----------

#### ACTIVE INGREDIENT:

(% by weight)

Propargite (Sulfurous acid, 2-[4-(1,1-dimethyl-ethyl) phenoxy]  
cyclohexyl-2-propynyl ester)\* ..... 69.6%

OTHER INGREDIENTS:..... 30.4%

TOTAL:..... 100.0%

\*Contains 6 lbs. active ingredient per gallon. Contains petroleum distillates.

#### KEEP OUT OF REACH OF CHILDREN

### DANGER • PELIGRO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.  
(If you do not understand the label, find someone to explain it to you in detail.)

#### FIRST AID

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person.

**HOT LINE NUMBER:** Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies, or pesticide incidents), you may call SafetyCall® at **1-844-685-9173**, 24 hours per day, 7 days per week. For chemical emergency: spill, leak, fire, exposure or accident, call CHEMTREC: **1-800-424-9300**.

**NOTE TO PHYSICIAN**

Contains petroleum distillates. Vomiting may cause aspiration pneumonia. Probable mucosal damage may contraindicate the use of gastric lavage.

See inside booklet for additional Precautionary Statements and Directions for Use.

Contains propargite, the active ingredient used in Comite® II.  
A117.02 is not manufactured or distributed by Arysta LifeScience North America, LLC seller of Comite® II.

EPA Reg. No. 91234-

EPA EST. No.

**Manufactured for:**

Atticus, LLC

501 Cascade Pointe Lane, Suite 102

Cary, NC 27513

## {LANGUAGE INSIDE BOOKLET}

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER

**Contains petroleum distillates.** Corrosive. Causes skin burns and irreversible eye damage. May be fatal if inhaled or swallowed. Harmful if swallowed or absorbed through skin. Do not breathe spray mist. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear protective eyewear such as goggles, face shield or safety glasses.

#### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below.

**All pesticide handlers (mixers/loaders, applicators, and other handlers) must wear:**

- Coveralls over long-sleeved shirt and long pants.
- Chemical-resistant footwear and socks.
- Chemical-resistant gloves made of barrier laminate, nitrile rubber  $\geq$  14 mils, neoprene rubber  $\geq$  14 mils, butyl rubber  $\geq$  14 mils, and/or viton  $\geq$  14 mils, except for flaggers and applicators using closed cabs.
- Chemical-resistant apron for mixers and loaders and persons exposed to the concentrate.
- For overhead exposure wear chemical resistant headgear.
- Wear a NIOSH-approved respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G), or a NIOSH-approved respirator with an organic-vapor cartridge or canister with any N, R, P or HE filter.

See Engineering Controls for further requirements.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

#### ENGINEERING CONTROLS

**Mixers/loaders supporting aerial applications to corn and cotton must:** use a closed system that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4), **and must:**

- Wear the personal protective equipment required in **PPE** above for mixers/loaders.

**Applicators using airblast spray equipment must:**

- Wear the personal protective equipment required in **PPE** above for mixers and loaders.
- Take off any PPE that was worn in the treated area before reentering the cab if the applicators are operating in a closed cab.

- Store all such PPE in a chemical-resistant container, such as plastic bag, to prevent contamination of the inside of the cab or other enclosed area.

Direct flaggers need to wear the personal protective equipment required in **PPE** above for mixers/loaders, and applicators/handlers, unless they are in an enclosed vehicle which need not be pressurized. When handlers and/or applicators use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6), the PPE requirements may be reduced or modified as specified in the WPS.

#### **USER SAFETY RECOMMENDATIONS**

Users should:

- Wash hands before eating, drinking, chewing gum, or using the toilet.
- Remove contaminated clothing. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, change into clean clothing.

#### **ENVIRONMENTAL HAZARDS**

This pesticide is toxic to fish and aquatic invertebrates and may cause reproductive effects in wildlife. Do not apply directly to water or areas where surface water is present or to intertidal areas below the mean high water mark. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment wash water.

#### **PHYSICAL OR CHEMICAL HAZARDS**

Combustible. Do not use or store this product near heat or open flame. Do not mix or allow coming into contact with oxidizing agents. Hazardous chemical reaction may occur.

## DIRECTIONS FOR USE

### RESTRICTED USE PESTICIDE

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

#### AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and green-houses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow workers to enter treated areas during the restricted entry interval (REI) listed except as provided for by the WPS. The REI and Exceptions are listed in the Directions for Use associated with the crop. Notify workers of these exceptions (including when entry is permitted for each of the tasks named in the exception).

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls over long-sleeved shirt and long pants, chemical-resistant gloves made of barrier laminate, nitrile rubber  $\geq 14$  mils, neoprene rubber  $\geq 14$  mils, butyl rubber  $\geq 14$  mils, and/or viton  $\geq 14$  mils, chemical-resistant footwear plus socks and, protective eyewear.

**Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.**

#### SPRAY DRIFT PRECAUTIONS

**AVOIDING SPRAY DRIFT IS THE RESPONSIBILITY OF THE APPLICATOR AND GROWER.**

##### WHEN SPRAYING IN THE VICINITY OF AQUATIC AREAS:

- Do not apply by ground within 50 feet or by air within 75 feet of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds; estuaries and commercial fish farm ponds.
- The above excludes irrigation canals and wasteways as well as man-made irrigation conveyance structures and impoundments, unless an exclusion contains water year-round.
- Risk of exposure to sensitive aquatic areas can be reduced by making applications when the wind direction is away from the aquatic area.
- Consider inclusion of a drift control agent in the spray tank.

##### Wind direction and speed

- Only apply this product if the wind direction favors on-target deposition.
- Do not apply when the wind velocity exceeds 15 mph.

##### Temperature inversion

- Do not make aerial or ground applications into temperature inversions.

- Inversions are characterized by stable air and increasing temperatures with height above the ground. Mist or fog may indicate the presence of an inversion in humid areas. The applicator may detect the presence of an inversion by producing smoke and observing a smoke layer near the ground surface.

#### **Droplet size**

- For ground and aerial applications, apply the coarsest droplet size spectrum that provides sufficient coverage and mite control.

#### **Additional Requirements for Ground Applications**

- For ground boom applications, apply using a nozzle height of no more than 4 feet above the ground or crop canopy.
- For airblast applications, turn off outward pointing nozzles at row ends and when spraying the outer two rows. To minimize spray loss over the top in orchard applications, spray must be directed into the canopy.

#### **Additional Requirements for Aerial Applications**

- Mount the spray boom on the aircraft as to minimize drift caused by wingtip or rotor vortices. The minimum practical boom length must not exceed 75% of the wing span or 80% rotor diameter.
- Spray must be released at the lowest height consistent with pest control and flight safety. Do not release spray at a height greater than 10 feet above the crop canopy unless a greater height is required for aircraft safety.
- When applications are made with a cross-wind, the swath will be displaced downwind. The applicator must compensate for this displacement at the downwind edge of the application area by adjusting the path of the aircraft upwind.

**FOR CHEMIGATION APPLICATION**, refer to Chemigation Use Precautions for Corn section; Use rate table lists the application rate range.

### **RUNOFF PRECAUTIONS**

For several days after application and under certain conditions, propargite may have high potential for runoff into surface water.

Do NOT apply in the following areas:

- Areas with frequent flooding (Note: crop irrigation areas excluded).
- Areas where intense or sustained rainfall is forecasted to occur within the next 48 hours.

Careful application should be made in areas with the following conditions:

- Areas that visibly slope toward adjacent surface water and are poorly draining or have wet soil.
- Areas containing in-field canals or ditches which drain to surface water.
- Areas lacking a vegetated filter that are not separated from adjacent surface waters.

For recommendations specific to your area consult the local soil conservation service.

### **USE RESTRICTIONS**

- Do NOT apply in spray solutions above pH 10. A117.02 is best used in solutions of pH 7 or lower.

The following are registered-labeled uses for propargite:

- Field & Vegetable — Beans, dry; Corn (field, popcon, sweet); Cotton; Hops; Jojoba; Mint; Peanuts; Potatoes; Sorghum
- Seed crops only — Alfalfa; Carrot; Clover; Sugar beets

The following restrictions apply *unless* the crop is a registered use for propargite:

- Do NOT plant root crops in rotation for 6 months following last application of propargite.
- Do NOT plant any other crops in rotation for 2 months following last application of propargite.

### **PRODUCT USE INSTRUCTIONS**

A117.02 is a liquid emulsifiable concentrate used in sprays for controlling mites. A117.02 is not systemic in action, therefore requiring treatment of both the upper and lower leaf surfaces and fruit during application to ensure complete application. A117.02 is most effective in daytime temperatures averaging above 70°F.

### **MIXING INSTRUCTIONS**

1. Fill spray tank with water until three-quarters full
2. Based on the specified rate (see table) add A117.02 to the spray tank
3. Continue filling the spray tank with water until full
4. Agitate well
5. Spray vegetation and fruit thoroughly for best results

### **TANK MIX COMPATIBILITIES**

- Do NOT use penetrating surfactants. A non-penetrating surfactant can be added under certain conditions. For recommendations contact your local surfactant supplier.
- Do NOT apply with petroleum based foliar spray oils to prevent potential phytotoxicity.
- Do NOT add alkaline materials (i.e. lime, lime sulfur or Bordeaux). By doing so, the effectiveness of A117.02 will be reduced.

A117.02 is compatible with a variety of pesticides except those noted above. Follow all cautions and limitations listed on labeling of all products used in mixture. To ensure the product is compatible in your area it is recommended that smaller trials under local conditions are held prior to larger scale use. Variations in water quality (i.e., hardness and pH) may influence the effectiveness of the product.

For further compatibility information contact your supplier.

## INSTRUCTIONS AND RATES FOR USE ON BEARING CROPS

<b>Crop</b>	<b>BEANS, DRY (including dry lima beans) (West of Rocky Mountains)</b>				
<b>Mites Controlled</b>	Two-spotted spider				
<b>Application Rate (Fl. Ozs. / Acre)</b>	36-52	<b>Restricted Entry Interval (Days)</b>	9 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	14
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in a minimum of 20 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 5 gallons total volume per acre.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>• Do NOT apply more than 96 fl. ozs. (4.5 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>• Do NOT make more than 2 applications per season.</li> <li>• Do NOT apply within 21 days of the last application.</li> <li>• Do NOT feed or forage treated bean vines or bean trash after harvesting.</li> </ul>				
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>				

<b>Crop</b>	<b>CORN, FIELD CORN (Grain or Silage) POPCORN &amp; SEED CORN</b>				
<b>Mites Controlled</b>	Two-spotted spider, Banks grass				
<b>Application Rate (Fl. Ozs. / Acre)</b>	36-54	<b>Restricted Entry Interval (Days)</b>	13 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	30 <sup>2</sup>
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. At least 48 fl. ozs. per acre should be used under conditions of severe mite pressure. Treat early. Best results are achieved when mite populations are low, before the mites have damaged the plants. Treatment is recommended when mite populations are just beginning to build, and the corn is still small enough to allow good coverage. <b>Ensure applications are made only when corn leaves are dry, especially for white corn varieties. Additional adjuvants in aerial applications are not recommended for use on corn in California.</b> See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in a minimum of 20 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 2 gallons total volume per acre, except in California, Idaho, Oregon and Washington use a minimum of 10 gallons.			
	<b>Chemigation Application (Not in CA)</b>	Apply in 0.1 - 0.2 acre inches of water. (See CHEMIGATION PRECAUTIONS FOR CORN)			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>• Do NOT apply more than 54 fl. ozs. (2.5 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>• Do NOT make more than 1 application per season.</li> </ul>				
<b>Notes</b>	<ol style="list-style-type: none"> <li>1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i></li> <li>2) <b>Pre-Harvest Interval:</b> The grazing or cutting for silage within 30 days after treatment is prohibited.</li> </ol>				

<b>Crop</b>	<b>CORN, SWEET CORN (Fresh, Processing and Grown for Seed)</b>				
<b>Mites Controlled</b>	Two-spotted spider, Bank grass				
<b>Application Rate (Fl. Ozs. / Acre)</b>	36-54	<b>Restricted Entry Interval (Days)</b>	13 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	30 <sup>2</sup>
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. At least 48 fl. ozs. per acre should be used under conditions of severe mite pressure. Treat early. Best results are achieved when mite populations are low, before the mites have damaged the plants. Treatment is recommended when mite populations are just beginning to build, and the corn is still small enough (usually 3 to 4 feet) to allow good coverage. <b>Ensure applications are made only when corn leaves are dry. This is especially true for white corn varieties which are the most susceptible to plant injury. Additional adjuvants in aerial applications are not recommended for use on corn in California.</b> See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in a minimum of 20 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in 10 - 20 gallons total volume per acre.			
	<b>Chemigation Application (Not in CA)</b>	Apply in 0.1 - 0.2 acre inches of water. (See CHEMIGATION PRECAUTIONS FOR CORN)			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT make more than 1 application per season.</li> </ul>				
<b>Notes</b>	<ol style="list-style-type: none"> <li><b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i></li> <li><b>Pre-Harvest Interval:</b> The grazing or cutting for silage within 30 days after treatment is prohibited.</li> </ol>				

<b>Crop</b>	<b>COTTON (California &amp; Arizona Only)</b>				
<b>Mites Controlled</b>	Two-spotted spider, Pacific spider, Strawberry spider				
<b>Application Rate (Fl. Ozs. / Acre)</b>	Early Season	Mid-Season to Layby Ground	Mid-Season to Layby Aerial	Layby	Layby to Boll Opening
	18	26-34	34	34	34
<b>Restricted Entry Interval (Days)</b>	6 <sup>1</sup>		<b>Pre-Harvest Interval (Days)</b>		50
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. A117.02 may be phytotoxic to young cotton under certain conditions. Age and climatic conditions result in a physiological hardening when plants are generally between 6 and 12 inches tall. Applications can begin after plants are hardened. A117.02 may be used in concentrate sprayers designed for concentrate row crop applications. Maintain A117.02 dosage rate per acre. Commercially acceptable mite control may be difficult to obtain where synthetic pyrethroids are or have been used. See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in 15 - 30 gallons total volume per acre to early cotton; 25 - 40 gallons to mid-season to layby cotton; 25 - 50 gallons to layby cotton.			
	<b>Aerial Applications</b>	Apply in 10 - 15 gallons total volume per acre from mid-season to boll opening; aerial application is not recommended for early cotton. A117.02 may be applied in vegetable oils by air with ULV sprayers where approved.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Apply only before bolls open.</li> <li>Do NOT apply more than 70 fl. ozs. (3.3 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>Do NOT feed treated foliage or cotton trash to livestock.</li> <li>Do NOT apply after bolls have opened.</li> <li>Do NOT make more than 2 applications per season.</li> <li>Do NOT apply within 21 days of the last application.</li> </ul>				
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There</i>				

	<i>is no exception allowed for hand weeding.</i>
--	--

<b>Crop</b>	<b>COTTON (East of the Rocky Mountains)</b>						
<b>Mites Controlled</b>	Two-spotted spider, Pacific spider, Strawberry spider						
<b>Application Rate (Fl. Ozs. / Acre)</b>	Early Season	Mid-Season to Layby	Layby to Boll Opening	<b>Restricted Entry Interval (Days)</b>	6 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	50
	20	24-36	36				
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. A117.02 may be phytotoxic to young cotton under certain conditions. Age and climatic conditions result in a physiological hardening when plants are generally between 6 and 12 inches tall. Applications can begin after plants are hardened. A117.02 may be used in concentrate sprayers designed for concentrate row crop applications. Maintain A117.02 dosage rate per acre. Commercially acceptable mite control may be difficult to obtain where synthetic pyrethroids are or have been used. See Tank Mix Compatibilities section.						
	<b>Ground Applications</b>	Apply in 15 -30 gallons total volume per acre to early cotton; 25 - 40 gallons to mid-season to layby cotton; 25 - 50 gallons to layby to boll opening cotton.					
	<b>Aerial Applications</b>	Apply in 5 - 15 gallons total volume per acre from mid-season to boll opening; aerial application is not recommended for early cotton.					
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>• Apply only before bolls open.</li> <li>• Do NOT apply more than 70 fl. ozs. (3.3 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>• Do NOT feed treated foliage or cotton trash to livestock.</li> <li>• Do NOT apply after bolls have opened.</li> <li>• Do NOT make more than 2 applications per season.</li> <li>• Do NOT apply within 21 days of the last application.</li> </ul>						
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>						

<b>Crop</b>	<b>FRUIT, ORANGES &amp; GRAPEFRUIT (Bearing) (Florida &amp; Texas Only)</b>					
<b>Mites Controlled</b>	Citrus red, Texas citrus, Six-spotted, Citrus rust, False spider, Broad spider					
<b>Application Rate (Fl. Ozs. / Acre)</b>	36-52	<b>Restricted Entry Interval (Days)</b>	20 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	21	
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. Do not apply petroleum oils 30 days prior to or 40 days after applying A117.02 as phytotoxicity may occur on leaves and or fruit. Do not apply A117.02 mixed with petroleum oils or any material containing petroleum-based solvents as phytotoxicity may occur on leaves and/or fruit. Do not mix A117.02 with or apply prior to, or after, alkaline materials such as lime, Bordeaux mixture or lime sulfur. Avoid A117.02 applications to immature leaves and fruit, and prevent spray solution from puddling, dripping, or running off leaves and/or fruit. See Tank Mix Compatibilities section.					
	<b>Ground Applications</b>	Apply in a minimum of 25 gallons total volume per acre. Apply in sufficient water for thorough coverage.				
	<b>Aerial Applications</b>	Apply in a minimum of 10 gallons total volume per acre. Apply in sufficient water for thorough coverage.				
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>• Do NOT apply more than 87 fl. ozs. (4.1 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>• Do NOT make more than 2 applications per season.</li> <li>• Do NOT apply within 28 days of the last application.</li> </ul>					
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>					

<b>Crop</b>	<b>JOJOBA</b>		
<b>Mites Controlled</b>	Tetranychus sp.		
<b>Application Rate (Fl. Ozs. / Acre)</b>	34	<b>Restricted Entry Interval (Days)</b>	2 <sup>1</sup>
<b>Application Instructions</b>	Apply to foliage when mite populations reach damaging numbers. See Tank Mix Compatibilities section.		
	<b>Ground Applications</b>	Apply in 20 - 40 gallons total volume per acre.	
	<b>Aerial Applications</b>	Apply in a minimum of 10 gallons total volume per acre.	
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT make more than 2 applications per season.</li> <li>Do NOT apply within 10 days of the last application.</li> </ul>		
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>		

<b>Crop</b>	<b>PEANUTS (Except California)</b>				
<b>Mites Controlled</b>	Two-spotted spider				
<b>Application Rate (Fl. Ozs. / Acre)</b>	36	<b>Restricted Entry Interval (Days)</b>	2 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	14
<b>Application Instructions</b>	<b>Ground Applications</b>	Apply in a minimum 20 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 5 gallons total volume per acre.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT apply more than 72 fl. ozs. (3.3 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>Do NOT make more than 2 applications per season.</li> <li>Do NOT apply within 14 days of the last application.</li> <li>Do NOT graze or feed livestock on treated areas or cut treated forage for hay.</li> </ul>				
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>				

<b>Crop</b>	<b>SORGHUM (East of Rocky Mountains)</b>				
<b>Mites Controlled</b>	Two-spotted spider, Banks grass				
<b>Application Rate (Fl. Ozs. / Acre)</b>	24-36	<b>Restricted Entry Interval (Days)</b>	2 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	60 <sup>2</sup>
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. Due to the large number of varieties of sorghum, it is recommended that a small test plot be treated to check for potential phytotoxicity before using A117.02 on a large area. See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in a minimum of 20 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 5 gallons total volume per acre.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT apply more than 36 fl. ozs. (1.7 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>Do NOT make more than 1 application per season.</li> </ul>				
<b>Notes</b>	<ol style="list-style-type: none"> <li><b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i></li> <li><b>Pre-Harvest Interval:</b> The grazing or cutting for silage within 30 days after treatment is prohibited. Do not harvest grain within 60 days of the application.</li> </ol>				

<b>Crop</b>	<b>SORGHUM (California Only)</b>				
<b>Mites Controlled</b>	Two-spotted spider, Banks grass				
<b>Application Rate (Fl. Ozs. / Acre)</b>	26-34	<b>Restricted Entry Interval (Days)</b>	2 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	45 <sup>2</sup>
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. Due to the large number of varieties of sorghum, it is recommended that a small test plot be treated to check for potential phytotoxicity before using A117.02 on a large area. See Tank Mix Compatibilities section.				
	<b>Aerial Applications</b>	Apply in a minimum of 10 gallons total volume per acre.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT make more than 1 application per season.</li> </ul>				
<b>Notes</b>	<ol style="list-style-type: none"> <li><b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i></li> <li><b>Pre-Harvest Interval:</b> The grazing or cutting for silage within 30 days after treatment is prohibited.</li> </ol>				

### CHEMIGATION USE PRECAUTIONS FOR CORN

- A. Apply this product only through sprinkler systems, including center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand move irrigation systems. Do not apply this product through any other type of irrigation system.
- B. Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water.
- C. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.
- D. Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label prescribed safety devices for public water systems are in place.
- E. A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make the necessary adjustments should the need arise.
- F. The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.
- G. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.
- H. The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being drawn from the supply tank when the irrigation system is either automatically or manually shut down.
- I. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
- J. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
- K. Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.
- L. Do not apply when wind speed favors drift beyond the area intended for treatment.

M. Constant agitation must be maintained in the chemical supply tank during the entire period of insecticide application.

N. Inject the product with a positive displacement pump into the main line ahead of a right angle turn, to insure adequate mixing.

O. Application of more than label recommended quantities of irrigation water per acre may result in decreased product performance by removing the chemical from the zone of effectiveness.

P. Do not apply when system connections or fittings leak, when nozzles do not provide uniform distribution or when lines containing the product must be dismantled and drained.

Q. Greater accuracy in calibration and distribution will be achieved by injecting a larger volume of more dilute mixture per hour. Pesticide should be applied continuously for the duration of the water addition.

R. Where sprinkler irrigation patterns do not overlap sufficiently unacceptable mite control may result. Where sprinkler distribution patterns overlap excessively crop injury may result.

S. Check with state lead agencies for state specific chemigation requirements.

#### **STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep this product in its tightly closed original container. Do not use or store this product near heat or open flame. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals, and away from other pesticides, fertilizers, food, or feed.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

#### **CONTAINER HANDLING:**

[For rigid, non-refillable containers ( $\leq 5$  gallons):] Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container  $\frac{1}{4}$  full with water and recap. Shake container for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer container for recycling, if available, or puncture and dispose of container in a sanitary landfill, or by other procedures approved by State and local authorities.

[For rigid, non-refillable containers ( $> 5$  gallons):] Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty remaining contents into application equipment or a mix tank. Fill the container  $\frac{1}{4}$  full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer container for recycling, if available, or puncture and dispose of

container in a sanitary landfill, or by other procedures approved by State and local authorities.

### **Conditions of Sale and Limitation of Warranty and Liability**

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials, resistant strains or other influencing factors in the use of the product, which are beyond the control of Atticus, LLC or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Atticus, LLC and Seller harmless for any claims relating to such factors.

To the extent allowed by applicable laws, Atticus, LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of the product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or Atticus, LLC and Buyer and User assume the risk of any such use. TO THE EXTENT ALLOWABLE BY APPLICABLE LAW, ATTICUS, LLC MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

To the extent allowed by applicable laws, in no event shall Atticus, LLC or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. TO THE EXTENT ALLOWABLE BY APPLICABLE LAW THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF ATTICUS, LLC AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF ATTICUS, LLC OR SELLER, THE REPLACEMENT OF THE PRODUCT.

Atticus, LLC and Seller offer this product, and Buyer and User accept it, subject to foregoing conditions of sale and limitations of warranty and of liability, which may not be modified except by written agreement signed by a duly authorized representative of Atticus, LLC.

## {BOOKLET FRONT PANEL LANGUAGE}

### RESTRICTED USE PESTICIDE

Due to eye and skin effects. For retail sale to and use by Certified Applicators, or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

## A117.02

*Agricultural Miticide*

*[Alternate Brand Names: Endomite, Decimite]*

GROUP	12C	ACARACIDE
-------	-----	-----------

#### ACTIVE INGREDIENT:

(% by weight)

Propargite (Sulfurous acid, 2-[4-(1,1-dimethyl-ethyl) phenoxy] cyclohexyl-2-propynyl ester)\* .....

69.6%

OTHER INGREDIENTS:.....

30.4%

TOTAL:.....

100.0%

\*Contains 6 lbs. active ingredient per gallon. Contains petroleum distillates.

**KEEP OUT OF REACH OF CHILDREN**

**DANGER • PELIGRO**

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.  
(If you do not understand the label, find someone to explain it to you in detail.)

#### FIRST AID

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control center or doctor for treatment advice.

**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control center or doctor for treatment advice.

**IF SWALLOWED:** Immediately call a poison control center or doctor. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person.

**HOT LINE NUMBER:** Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For additional information on this pesticide product (including health concerns, medical emergencies, or pesticide incidents), you may call SafetyCall® at **1-844-685-9173**, 24 hours per day, 7 days per week. For chemical emergency: spill, leak, fire, exposure or accident, call CHEMTREC: **1-800-424-9300**.

**NOTE TO PHYSICIAN**

Contains petroleum distillates. Vomiting may cause aspiration pneumonia. Probable mucosal damage may contraindicate the use of gastric lavage.

See inside booklet for additional Precautionary Statements and Directions for Use.

Contains propargite, the active ingredient used in Omite®-6E.  
A117.02 is not manufactured or distributed by Arysta LifeScience North America, LLC seller of  
of Omite®-6E.

EPA Reg. No. 91234-

EPA EST. No.

**Manufactured for:**

Atticus, LLC

501 Cascade Pointe Lane, Suite 102

Cary, NC 27513

## {LANGUAGE INSIDE BOOKLET}

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER

**Contains petroleum distillates.** Corrosive. Causes skin burns and irreversible eye damage. May be fatal if inhaled or swallowed. Harmful if swallowed or absorbed through skin. Do not breathe spray mist. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Wear protective eyewear such as goggles, face shield or safety glasses.

#### PERSONAL PROTECTIVE EQUIPMENT (PPE)

Some materials that are chemical-resistant to this product are listed below.

**All pesticide handlers (mixers/loaders, applicators, and other handlers) must wear:**

- Coveralls over long-sleeved shirt and long pants.
- Chemical-resistant footwear and socks.
- Chemical-resistant gloves made of barrier laminate, nitrile rubber  $\geq$  14 mils, neoprene rubber  $\geq$  14 mils, butyl rubber  $\geq$  14 mils, and/or viton  $\geq$  14 mils, except for flaggers and applicators using closed cabs.
- Chemical-resistant apron for mixers and loaders and persons exposed to the concentrate.
- For overhead exposure wear chemical resistant headgear.
- Wear a NIOSH-approved respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (MSHA/NIOSH approval number prefix TC-23C), or a canister approved for pesticides (MSHA/NIOSH approval number prefix TC-14G), or a NIOSH-approved respirator with an organic-vapor cartridge or canister with any N, R, P or HE filter.

See Engineering Controls for further requirements.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

#### ENGINEERING CONTROLS

**Mixers/loaders supporting aerial applications to corn and cotton must:** use a closed system that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4), **and must:**

- Wear the personal protective equipment required in **PPE** above for mixers/loaders.

**Applicators using airblast spray equipment must:**

- Wear the personal protective equipment required in **PPE** above for mixers and loaders.
- Take off any PPE that was worn in the treated area before reentering the cab if the applicators are operating in a closed cab.

- Store all such PPE in a chemical-resistant container, such as plastic bag, to prevent contamination of the inside of the cab or other enclosed area.

Direct flaggers need to wear the personal protective equipment required in **PPE** above for mixers/loaders, and applicators/handlers, unless they are in an enclosed vehicle which need not be pressurized. When handlers and/or applicators use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6), the PPE requirements may be reduced or modified as specified in the WPS.

#### **USER SAFETY RECOMMENDATIONS**

Users should:

- Wash hands before eating, drinking, chewing gum, or using the toilet.
- Remove contaminated clothing. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, change into clean clothing.

#### **ENVIRONMENTAL HAZARDS**

This pesticide is toxic to fish and aquatic invertebrates and may cause reproductive effects in wildlife. Do not apply directly to water or areas where surface water is present or to intertidal areas below the mean high water mark. Runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment wash water.

#### **PHYSICAL OR CHEMICAL HAZARDS**

Combustible. Do not use or store this product near heat or open flame. Do not mix or allow coming into contact with oxidizing agents. Hazardous chemical reaction may occur.

### **DIRECTIONS FOR USE**

#### **RESTRICTED USE PESTICIDE**

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

### **AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and green-houses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers, and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow workers to enter treated areas during the restricted entry interval (REI) listed except as provided for by the WPS. The REI and Exceptions are listed in the Directions for Use associated with the crop. Notify workers of these exceptions (including when entry is permitted for each of the tasks named in the exception).

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls over long-sleeved shirt and long pants, chemical-resistant gloves made of barrier laminate, nitrile rubber  $\geq$  14 mils, neoprene rubber  $\geq$  14 mils, butyl rubber  $\geq$  14 mils, and/or viton  $\geq$  14 mils, chemical-resistant footwear plus socks and, protective eyewear.

**Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.**

### **SPRAY DRIFT PRECAUTIONS**

**AVOIDING SPRAY DRIFT IS THE RESPONSIBILITY OF THE APPLICATOR AND GROWER.**

#### **WHEN SPRAYING IN THE VICINITY OF AQUATIC AREAS:**

- Do not apply by ground within 50 feet or by air within 75 feet of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds; estuaries and commercial fish farm ponds.
- The above excludes irrigation canals and wasteways as well as man-made irrigation conveyance structures and impoundments, unless an exclusion contains water year-round.
- Risk of exposure to sensitive aquatic areas can be reduced by making applications when the wind direction is away from the aquatic area.
- Consider inclusion of a drift control agent in the spray tank.

#### **Wind direction and speed**

- Only apply this product if the wind direction favors on-target deposition.
- Do not apply when the wind velocity exceeds 15 mph.

#### **Temperature inversion**

- Do not make aerial or ground applications into temperature inversions.
- Inversions are characterized by stable air and increasing temperatures with height above the ground. Mist or fog may indicate the presence of an inversion in humid areas. The applicator may detect the presence of an inversion by producing smoke and observing a smoke layer near the ground surface.

#### **Droplet size**

- For ground and aerial applications apply the coarsest droplet size spectrum that provides sufficient coverage and mite control.

#### **Additional Requirements for Ground Applications**

- For ground boom applications, apply using a nozzle height of no more than 4 feet above the ground or crop canopy.
- For airblast applications, turn off outward pointing nozzles at row ends and when spraying the outer two rows. To minimize spray loss over the top in orchard applications, spray must be directed into the canopy.

#### **Additional Requirements for Aerial Applications**

- Mount the spray boom on the aircraft as to minimize drift caused by wingtip or rotor vortices. The minimum practical boom length must not exceed 75% of the wing span or 80% rotor diameter.
- Spray must be released at the lowest height consistent with pest control and flight safety. Do not release spray at a height greater than 10 feet above the crop canopy unless a greater height is required for aircraft safety.
- When applications are made with a cross-wind, the swath will be displaced downwind. The applicator must compensate for this displacement at the downwind edge of the application area by adjusting the path of the aircraft upwind.

**FOR CHEMIGATION APPLICATION**, refer to Chemigation Use Precautions for Potatoes section; Use rate table lists the application rate range.

#### **RUNOFF PRECAUTIONS**

For several days after application and under certain conditions, propargite may have high potential for runoff into surface water.

Do NOT apply in the following areas:

- Areas with frequent flooding (Note: crop irrigation areas excluded).
- Areas where intense or sustained rainfall is forecasted to occur within the next 48 hours.

Careful application should be made in areas with the following conditions:

- Areas that slope toward adjacent surface water and are poorly draining or have wet soil.
- Areas containing in-field canals or ditches which drain to surface water.
- Areas lacking a vegetated filter that are not separated from adjacent surface waters.

For recommendations specific to your area consult the local soil conservation service.

#### **USE RESTRICTIONS**

- Do NOT apply in spray solutions above pH 10. A117.02 is best used in solutions of pH 7 or lower.

The following are registered-labeled uses for propargite:

- Field & Vegetable — Beans, dry; Corn (field, popcon, sweet); Cotton; Hops; Jojoba; Mint; Peanuts; Potatoes; Sorghum
- Seed crops only — Alfalfa; Carrot; Clover; Sugar beets

The following restrictions apply *unless* the crop is a registered use for propargite:

- Do NOT plant root crops in rotation for 6 months following last application of propargite.
- Do NOT plant any other crops in rotation for 2 months following last application of propargite.

#### **PRODUCT USE INSTRUCTIONS**

A117.02 is a liquid emulsifiable concentrate used in sprays for controlling mites. A117.02 is not systemic in action therefore, requiring treatment of both the upper and lower leaf surfaces and fruit during application to ensure complete application. A117.02 is most effective in daytime temperatures averaging above 70°F.

### MIXING INSTRUCTIONS

1. Fill spray tank with water until three-quarters full
2. Based on the specified rate (see table) add A117.02 to the spray tank
3. Continue filling the spray tank with water until full
4. Agitate well
5. Spray vegetation and fruit thoroughly for best results

### TANK MIX COMPATIBILITIES

- Do NOT use penetrating surfactants. A non-penetrating surfactant can be added under certain conditions. For recommendations contact your local surfactant supplier.
- Do NOT apply with petroleum based foliar spray oils to prevent potential phytotoxicity.
- Do NOT add alkaline materials (i.e., lime, lime sulfur, or Bordeaux). By doing so, the effectiveness of A117.02 will be reduced.

A117.02 is compatible with a variety of pesticides except those noted above. Follow all cautions and limitations listed on labeling of all products used in mixture. To ensure the product is compatible in your area it is recommended that smaller trials under local conditions are held prior to larger scale use. Variations in water quality (i.e., hardness and pH) may influence the effectiveness of the product.

For further compatibility information contact your supplier.

## INSTRUCTIONS AND RATES FOR USE ON BEARING CROPS

<b>Crop</b>	<b>ALMONDS (California &amp; Arizona Only)</b>				
<b>Mites Controlled</b>	Clover, European red, Strawberry spider, Two-spotted spider, Pacific spider				
<b>Application Rate (Fl. Ozs. / Acre)</b>	32-64	<b>Restricted Entry Interval (Days)</b>	22 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	28
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in a minimum of 50 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 15 gallons total volume per acre. One application of A117.02 may be applied by air to almonds over one ground application of A117.02 or other propargite formulation.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>• Do NOT make more than 2 applications per season.</li> <li>• Do NOT apply within 21 days of the last application.</li> </ul>				
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>				

<b>Crop</b>	<b>FIELD CORN (California Only)</b>				
<b>Mites Controlled</b>	Two-spotted spider, Banks grass				
<b>Application Rate (Fl. Ozs. / Acre)</b>	36-54	<b>Restricted Entry Interval (Days)</b>	13 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	30 <sup>2</sup>
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. At least 48 fl. ozs. per acre should be used under conditions of severe mite pressure. Treat early. Best results are achieved when mite populations are low, before the mites have damaged the plants. Treatment is recommended when mite populations are just beginning to build, and the corn is still small enough to allow good coverage. <b>Ensure applications are made only when corn leaves are dry, especially for white corn varieties. Additional adjuvants in aerial applications are not recommended for use on corn in California.</b> See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in 20 - 50 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 10 gallons total volume per acre.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT apply more than 54 fl. ozs. (2.53 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>Do NOT make more than 1 applications per season.</li> </ul>				
<b>Notes</b>	<ol style="list-style-type: none"> <li><b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i></li> <li><b>Pre-Harvest Interval:</b> The grazing or cutting for silage within 30 days after treatment is prohibited.</li> </ol>				

<b>Crop</b>	<b>HOPS (for basal treatment only in conjunction with sucker sprays)</b>				
<b>Mites Controlled</b>	Two-spotted spider				
<b>Application Rate (Fl. Ozs. / Acre)</b>	32	<b>Restricted Entry Interval (Days)</b>	21 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	14
<b>Application Instructions</b>	For basal treatment only to control early/beginning mite populations before they move up the vine or into the canopy. DO NOT APPLY OTHER THAN BASAL OR SUCKER TREATMENTS. See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in 20 - 50 gallons total volume per acre.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT feed hop refuse or cones to livestock, however, spent hops from the extract operation may be fed.</li> <li>Do NOT make more than 2 applications per season.</li> <li>Do NOT apply within 21 days of the last application.</li> </ul>				
<b>Notes</b>	<ol style="list-style-type: none"> <li><b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i></li> </ol>				

<b>Crop</b>	<b>MINT</b>				
<b>Mites Controlled</b>	Two-spotted spider, Mint bud (squirrely mint effect)				
<b>Application Rate (Fl. Ozs. / Acre)</b>	32-44	<b>Restricted Entry Interval (Days)</b>	7 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	14
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in 20 - 50 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 10 gallons total volume per acre.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT apply more than 88 fl. ozs. (4.1 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>Do NOT feed mint spent hay to livestock.</li> <li>Do NOT make more than 2 applications per season.</li> <li>Do NOT apply within 14 days of the last application.</li> </ul>				
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions and PPE requirements for early entry. <i>There is no exception allowed for hand weeding.</i>				

<b>Crop</b>	<b>POTATOES (Pacific Northwest Only)</b>				
<b>Mites Controlled</b>	Two-spotted spider				
<b>Application Rate (Fl. Ozs. / Acre)</b>	32-44	<b>Restricted Entry Interval (Days)</b>	2 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	14
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. See Tank Mix Compatibilities section.				
	<b>Ground Applications</b>	Apply in 20 - 50 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 10 gallons total volume per acre.			
	<b>Chemigation Application (Not in CA)</b>	Apply in 0.1 - 0.2 acre inches of water. (See CHEMIGATION PRECAUTIONS FOR CORN AND POTATOES)			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>Do NOT apply more than 88 fl. ozs. (4.1 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>Do NOT make more than 2 applications per season.</li> <li>Do NOT apply within 21 days of the last application (14 days in Washington State only).</li> </ul>				
<b>Notes</b>	1) <b>REI Exception:</b> See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>				

<b>Crop</b>	<b>WALNUTS</b>				
<b>Mites Controlled</b>	Two-spotted spider, European red				
<b>Application Rate (Fl. Ozs. / Acre)</b>	32 - 68	<b>Restricted Entry Interval (Days)</b>	30 <sup>1</sup>	<b>Pre-Harvest Interval (Days)</b>	21
<b>Application Instructions</b>	Apply high rate to areas with high mite infestation and to areas which historically have had high mite infestations. Use a minimum of 64 fl. ozs. of A117.02 per acre on large mature trees.				
	<b>Ground Applications</b>	Apply in a minimum of 100 gallons total volume per acre.			
	<b>Aerial Applications</b>	Apply in a minimum of 20 gallons total volume per acre. Use 48-64 fl. ozs. of A117.02 when applied by air.			
<b>Restrictions</b>	<ul style="list-style-type: none"> <li>• Do NOT apply more than 136 fl. ozs. (6.4 lbs. propargite a.i.) of A117.02 per acre per calendar year.</li> <li>• Do NOT make more than 2 applications per season.</li> <li>• Do NOT apply within 21 days of the last application.</li> </ul>				
<b>Notes</b>	1) <b>REI Exception:</b> In addition to early entry exceptions allowed by the Worker Protection Standard, you may enter or allow workers to enter treated areas to harvest by tree shaking after 21 days following application, as long as the workers wear long pants, long sleeved shirt and shoes plus socks. See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. <i>There is no exception allowed for hand weeding.</i>				

## DOSAGE INSTRUCTIONS FOR USE ON NON-BEARING CROPS ONLY

**A117.02 may be used on the following crops when they will not bear fruit within one year of application.** This includes fruit and nut trees and berries in both commercial plantings and nurseries, including transplant areas, excluding residential areas. The non-bearing crops which may be so treated are:

CROP	MITES CONTROLLED	APPLIC. RATE (fl. ozs. per acre)	(REI) RESTRICTED ENTRY INTERVAL (DAYS)	APPLICATION INFORMATION
Berries: Aronia berry; Bearberry; Bilberry; Blackberry; Blueberry; Blueberry, Lowbush; Boysenberry; Caneberries; Cloudberry; Currant, black; Currant, red; Dewberry; Elderberry; Gooseberry; Highbush cranberry; Huckleberry; Jostaberry; Juneberry; Lingonberry; Mulberry; Partridgeberry; Raspberry; Salal; Seagrape; Serviceberry; Strawberry	European red spider Two-spotted spider Pacific spider McDaniel Strawberry spider	32	10	<b>Nursery (transplant): Strawberries:</b> Leaf damage to strawberries has been observed under the following conditions:  1) When A117.02 is applied with other chemicals or spray adjuvants; 2) when temperatures on the application date reach 75°F, or within a few days thereafter; 3) when rain falls on the application date or within a few days thereafter. BY USING THIS PRODUCT, THE USER AND GROWER ACCEPT ALL RISKS OF PLANT DAMAGE ARISING FROM THE CONDITIONS DESCRIBED ABOVE. See COMPATIBILITIES section.
Citrus: Calamondin; Citron, Citrus; Citrus hybrids; Grapefruit; Kumquat; Lemon; Lime; Lime, sweet; Orange, sour; Orange, sweet; Orange, trifoliolate; Pummelo; Sapote, white; Tangelo; Tangerine			16	See COMPATIBILITIES section.
Currants, Dates, Figs			2	See COMPATIBILITIES section.
Nut Trees: almond, hazelnut, macadamia, pecan, pistachio, walnut			22	See COMPATIBILITIES section.
Persimmons			2	See COMPATIBILITIES section.
Tree Fruit: apples, apricots, cherries, nectarines, peaches, plums/prunes, quince  pears (for basal treatment only in combination with knockdown herbicides)*			2	<b>Apples:</b> Leaf injury may occur if Diazinon WP is used and air temperatures are expected to exceed 95°F the day of spraying apples.  Use caution in areas East of the Rockies when poor drying conditions exist and when air temperatures exceed 85°F during application. Optimum temperatures range for application is 65° to 85°. Apply under optimal drying conditions. Caution should be taken when applying to drought stressed trees.  Do not mix with petroleum oil or oil based formulations of other products. Do not apply petroleum oils 14 days prior to or 14 days after applying A117.02.  See COMPATIBILITIES section.
<b>Ground Application:</b> Apply in 50-400 gallons total volume per acre				
<b>NON-BEARING RESTRICTIONS:</b> Do not make more than 2 applications per season; the minimal spray interval is 21 days. See AGRICULTURAL USE REQUIREMENTS for general REI exemptions.				

\*for basal treatments only (in combination with knockdown herbicides) to control early season/beginning mite populations (European red mite, Two-spotted spider mite, Pacific spider mite) before they climb up into the trees.

## DOSAGE INSTRUCTIONS FOR USE ON CONIFERS

CROP	MITES CONTROLLED	APPLIC. RATE (fl. ozs. per acre)	APPLICATION INFORMATION
CONIFERS in Plantations, Nurseries, Shade houses & Containers (Pacific Northwest ONLY, except CA)	Spider mites	32 – 48	<p>For control of spider mites on evergreen conifers grown for Christmas trees and ornamental uses. This is to include trees grown on plantations, in nurseries, shade houses, and containers. This may include, but is not limited to Douglas Fir, Grand fir, Shasta fir, Noble fir, Scotch pine, Colorado blue spruce, and similar species.</p> <p>Apply high rate to areas with high mite infestation and areas which historically have had high mite infestations. Also, use the higher rate range for larger trees. See COMPATIBILITIES section.</p>
<p><b>Ground Application:</b> Apply in 20 – 200 gallons total volume per acre. Adjust gallonage to obtain thorough coverage depending upon tree size, mite population, and equipment design.</p>			
<p><b>Aerial Application:</b> Apply in 10 – 20 gallons total volume per acre. For aerial applications, use a minimum of 30 p.s.i. For better coverage, use ½ the recommended rate/acre and fly over treated areas twice at right angles to each other.</p>			
<p><b>CONIFER RESTRICTIONS:</b> Do not make more than 2 applications per season; the minimal spray interval is 28 days. The Restrictive Entry Interval (REI) is 14 days. See AGRICULTURAL USE REQUIREMENTS for general REI exemptions. There is no exception allowed for hand weeding.</p>			

### CHEMIGATION USE PRECAUTIONS FOR POTATOES

- A. Apply this product only through sprinkler systems, including center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand move irrigation systems. Do not apply this product through any other type of irrigation system.
- B. Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water.
- C. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts.
- D. Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label prescribed safety devices for public water systems are in place.
- E. A person knowledgeable of the chemigation system and responsible for its operation, or under the supervision of the responsible person, shall shut the system down and make the necessary adjustments should the need arise.
- F. The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from backflow.
- G. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.
- H. The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system interlock to prevent fluid from being drawn from the supply tank when the irrigation system is either automatically or manually shut down.
- I. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
- J. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.
- K. Systems must use a metering pump, such as a positive displacement injection pump (e.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock.
- L. Do not apply when wind speed favors drift beyond the area intended for treatment.
- M. Constant agitation must be maintained in the chemical supply tank during the entire period of insecticide application.

- N. Inject the product with a positive displacement pump into the main line ahead of a right angle turn, to insure adequate mixing.
- O. Application of more than label recommended quantities of irrigation water per acre may result in decreased product performance by removing the chemical from the zone of effectiveness.
- P. Do not apply when system connections or fittings leak, when nozzles do not provide uniform distribution or when lines containing the product must be dismantled and drained.
- Q. Greater accuracy in calibration and distribution will be achieved by injecting a larger volume of more dilute mixture per hour. Pesticide should be applied continuously for the duration of the water addition.
- R. Where sprinkler irrigation patterns do not overlap sufficiently unacceptable mite control may result. Where sprinkler distribution patterns overlap excessively crop injury may result.
- S. Check with state lead agencies for state specific chemigation requirements.

### **STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep this product in its tightly closed original container. Do not use or store this product near heat or open flame. Store in a cool, dry (preferably locked) area that is inaccessible to children and animals, and away from other pesticides, fertilizers, food, or feed.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER HANDLING:**

[For rigid, non-refillable containers (≤ 5 gallons):] Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake container for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer container for recycling, if available, or puncture and dispose of container in a sanitary landfill, or by other procedures approved by State and local authorities.

[For rigid, non-refillable containers (> 5 gallons):] Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer container for recycling, if available, or puncture and dispose of container in a sanitary landfill, or by other procedures approved by State and local authorities.

### **Conditions of Sale and Limitation of Warranty and Liability**

The Directions for Use of this product must be followed carefully. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as manner of use or application, weather or crop conditions, presence of other materials, resistant strains or other influencing factors in the use of the product, which are beyond the control of Atticus, LLC or Seller. All such risks shall be assumed by Buyer and User, and Buyer and User agree to hold Atticus, LLC and Seller harmless for any claims relating to such factors.

To the extent allowed by applicable laws, Atticus, LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated in the Directions for Use, subject to the inherent risks referred to above, when used in accordance with directions under normal use conditions. This warranty does not extend to the use of the product contrary to label instructions, or under abnormal conditions or under conditions not reasonably foreseeable to or beyond the control of Seller or Atticus, LLC and Buyer and User assume the risk of any such use. TO THE EXTENT ALLOWABLE BY APPLICABLE LAW, ATTICUS, LLC MAKES NO WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

To the extent allowed by applicable laws, in no event shall Atticus, LLC or Seller be liable for any incidental, consequential or special damages resulting from the use or handling of this product. TO THE EXTENT ALLOWABLE BY APPLICABLE LAW THE EXCLUSIVE REMEDY OF THE USER OR BUYER, AND THE EXCLUSIVE LIABILITY OF ATTICUS, LLC AND SELLER FOR ANY AND ALL CLAIMS, LOSSES, INJURIES OR DAMAGES (INCLUDING CLAIMS BASED ON BREACH OF WARRANTY, CONTRACT, NEGLIGENCE, TORT, STRICT LIABILITY OR OTHERWISE) RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT, SHALL BE THE RETURN OF THE PURCHASE PRICE OF THE PRODUCT OR, AT THE ELECTION OF ATTICUS, LLC OR SELLER, THE REPLACEMENT OF THE PRODUCT.

Atticus, LLC and Seller offer this product, and Buyer and User accept it, subject to foregoing conditions of sale and limitations of warranty and of liability, which may not be modified except by written agreement signed by a duly authorized representative of Atticus, LLC.
