Subject: Labeling Notification per Pesticide Registration Notice (PRN) 98-10 – Correcting misspelling in product name
Product Name: Maxttrac
EPA Registration Number: 91610-1
EPA Receipt Date: 05/17/2023
Action Case Number: 00452197

Dear Dr. Kintz-Early:

The U.S. Environmental Protection Agency (EPA) is in receipt of your application for notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Biopesticides and Pollution Prevention Division (BPPD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The labeling submitted with this application has been stamped “Notification” and will be placed in our records. The brand name has been changed to Maxttrac. You must submit one (1) copy of the final printed labeling with the modifications.

Should you wish to add/retain a reference to your company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the EPA. If the website is false or misleading, the product will be considered to be misbranded and sale or distribution of the product is unlawful under FIFRA section 12(a)(1)(E). 40 CFR § 156.10(a)(5) lists examples of statements the EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the EPA find or if it is brought to our attention that a website contains statements or claims substantially differing from statements or claims made in connection with obtaining a FIFRA section 3 registration, the website will be referred to the EPA’s Office of Enforcement and Compliance Assurance.

If you have any questions, please contact Nina Naimy via email at naimy.nina@epa.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "James Parker", is written over a thin blue horizontal line.

TO INSTALL OR REPLACE [THE] ATRAKTA® MOSQUITO LURE

(Atrakta® is a lure designed to attract mosquitoes to traps where they die [including those mosquitoes which may transmit Zika virus, West Nile virus, Encephalitis and Chikungunya virus]). Replace the lure after thirty [30] days of use.

1. Disconnect power supply.
2. Using a pen (or similar object), pierce through the aluminum film on the cap.
[Picture or Illustration]
3. Insert the attractant [cartridge] [lure] into the attractant holder on the trap. Make sure the cap portion of the attractant is facing the front *[Picture or Illustration]*.
4. Replace [cartridge] [lure] after 30 days of use. For best results use this lure in Dynatrap DT160.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

Pesticide Storage: Store in a cool, dry place out of reach of children until ready to use.

Pesticide Disposal and Container Handling: Nonrefillable container; do not reuse or refill this container. Dispose of used container in the trash.

WARRANTY AND DISCLAIMER

{Insert company name } makes no warranty of merchantability, fitness for any particular purpose or otherwise, express or implied, concerning this product or its uses which extend beyond the use of the product under normal conditions in accordance with the statements made on this label.
