

U.S. ENVIRONMENTAL PROTECTION AGENCY
 Office of Pesticide Programs
 Antimicrobials Division (7510P)
 1200 Pennsylvania Ave., N.W.
 Washington, D.C. 20460

EPA Reg. Number:

92198-1

Date of Issuance:

4/25/18

NOTICE OF PESTICIDE:

Registration
 Reregistration
 (under FIFRA, as amended)

Term of Issuance:

Conditional

Name of Pesticide Product:

Fantex EHR-US

Name and Address of Registrant (include ZIP Code):

Carrie Daniels
 Agent for
 All In One Medical
 1150 Connecticut Ave NW, Suite 1100
 Washington, DC 20036

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA section 3(c)(7)(B). You must comply with the following conditions:

1. Submit and/or cite all data required for registration/reregistration/registration review of your product under FIFRA when the Agency requires all registrants of similar products to submit such data.

Signature of Approving Official:

Date:

4/25/18

Kathryn Montague, Chief
 RMBI, Antimicrobials Division (7510P)

2. You are required to comply with the data requirements described in the DCI identified below:
 - a. ADBAC GDCI-069175-30909, GDCI-069175-1750
 - b. DDAC GDCI-069149-30869, GDCI-069149-0681

You must comply with all of the data requirements within the established deadlines. If you have questions about the Generic DCI listed above, you may contact the Reevaluation Team Leader (Team 36): <http://www2.epa.gov/pesticide-contacts/contacts-office-pesticide-programs-antimicrobial-division>

3. Make the following label changes before you release the product for shipment:
 - Revise the EPA Registration Number to read, “EPA Reg. No. 92198-1.”
4. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

- Basic CSF dated 6/5/2017

If you have any questions, please contact Tara Flint via email at flint.tara@epa.gov or Eric Miederhoff at Miederhoff.eric@epa.gov.

Enclosure

Fantex EHR-US

Fantex EHR-US is effective in inhibiting the growth of bacteria, mold, mildew, and fungi that would otherwise cause odor, discoloration, or deterioration of untreated fibers and textiles.

Fantex EHR-US is intended for the treatment of fibers and textiles made from synthetic substances such as polyester, nylon, polypropylene, and polyethylene. The treated fibers and textiles are for use in commercial hospital privacy curtains and blinds.

For use only in the manufacture of commercial hospital privacy curtains and blinds, which must be registered with the EPA. Not for use for incorporation into clothing textiles.

Active Ingredients

Didecyl Dimethyl Ammonium Chloride	20.0%
Alkyl (C ₁₂ -67%; C ₁₄ -25%; C ₁₆ -7%; C ₁₈ -1%)	
Dimethyl Benzyl Ammonium Chloride.....	18.0%
Other Ingredients	62.0%
Total	100.0%

EPA Registration Number 92198-X EPA Establishment Number XXXXXX-XX-XXX

Manufactured By:
All In One Medical
Enterprise Drive
Four Ashes
Wolverhampton WV10 7DF
United Kingdom

Net Contents: _____
Batch Code: _____

DANGER
[Skull and crossbones graphic]

KEEP OUT OF REACH OF CHILDREN

FIRST AID

IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For non-emergency information concerning this product, call the National Pesticides Information Center (NPIC) at 1-800-858-7378 (NPIC Web site: www.npic.orst.edu). You may also contact 1-800-222-1222, the poison control center, for emergency medical treatment information.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

DANGER! CORROSIVE. Causes irreversible eye damage and skin burns. Fatal if swallowed, absorbed through skin, or inhaled. Do not get in eyes, on skin or on clothing. Do not breathe (vapor or spray mist). Wear protective eyewear such as goggles, face shield, or safety glasses. Wear coveralls over long-sleeved shirt and long pants, socks and chemical-resistant boots, and waterproof gloves (Barrier Laminate, or Butyl Rubber, or Nitrile Rubber, or Neoprene Rubber, or Natural Rubber, or Polyethylene, or Polyvinyl Chloride (PVC), or Viton, selection Category A). Wear a respirator with an organic-vapor removing cartridge with a prefilter approved for pesticides (A NIOSH approved particulate respirator with any N, R, or P filter, NIOSH approval number prefix TC- 84A; or a NIOSH approved powered air purifying respirator with an HE filter with NIOSH approval number prefix TC- 21C). Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS
DO NOT USE OR STORE NEAR HEAT OR FLAME!

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Fantex EHR-US is not approved for the control of human health-related microorganisms.

For use only in the manufacture of commercial hospital privacy curtains and blinds, which must be registered with the EPA. Not for use for incorporation into clothing textiles. Manufacturers using this product are responsible for providing data for the EPA registration of their product.

Blending and Formulating Instructions for the Listed Materials:

Fantex EHR-US is a materials preservative applied to natural and synthetic fibers and textiles. Materials treated with Fantex EHR-US are preserved by inhibiting the growth of bacteria, mold, mildew, and fungi that cause odor, deterioration, or discoloration in untreated fibers and textiles.

Fantex EHR-US may only be applied in industrial settings under controlled conditions. The application of Fantex EHR-US from dilution through the drying of treated fibers and textiles must be conducted in a closed, automated, mixing, loading, and delivery system. Appropriate PPE must be worn during the use and application of Fantex EHR-US.

Via closed systems, add the appropriate amount of Fantex EHR-US from the bulk container to a mixing tank; to result in a final dilution of 20% by volume. Store any unused portion of Fantex EHR-US or dispose of the empty container as described in the Storage and Disposal section. Dilute to the desired concentration by adding filtered or distilled water automatically by pipe. Ensure that the product is mixed thoroughly.

After mixing, the diluted Fantex EHR-US solution is piped directly into the kiss roller system, into an immersion tank, where the fibers or textiles are automatically processed by the application equipment.

The kiss roller rotates in the immersion tank to pick up the diluted Fantex EHR-US solution. The fabric or textile is passed over kiss roller and then immediately passes through a drying tunnel. For optimal performance, apply Fantex EHR-US during the last operation of finishing.

After drying, the treated fibers and textiles may be rolled or packaged for storage and/or shipment for use in the manufacture of the textile products described below.

Application Instructions

With most fiber and textile applications, optimal efficacy and durability can be achieved with a dilution of 20% Fantex EHR-US in water. -When the commercial Fantex EHR-US product is diluted to 20%, the original concentrations of the two active ingredients (20% Didecyl Dimethyl Ammonium Chloride and 18% Alkyl Dimethyl Benzyl Ammonium Chloride by weight) are diluted to 4.0% and 3.6%, respectively, prior to application.

The speed of the fiber or textile passing through the equipment (treatment time) and the use of rollers to squeeze out liquid affect the final loading of the solution applied to the fiber or textile. The loading range on the textiles is from 0.25 grams per square meter (gsm) to a maximum of 1.0 grams per square meter (gsm), with a typical loading range of 0.45 gsm. The user should test various Fantex EHR-US loading ranges to determine the most appropriate amount considering the type of material treated, the presence of additives/dyes, and the desired specific performance parameters.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Store in a safe manner. Store in original container only. Store in cool, dry place. Keep container tightly closed when not in use.

Pesticide Disposal: The pesticide wastes are acute hazards. Improper disposal of excess pesticide or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance.

Container Disposal:

[Option 1 – Refillable container]

Refillable container. Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller.

To clean the container before final disposal, empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.

When empty, return to the point of sale.

[Option 2 – Nonrefillable HDPE container]

Nonrefillable container. Do not reuse or refill this container. Completely empty container into application equipment. Triple rinse the container (or equivalent) promptly after emptying. Triple Rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container $\frac{1}{4}$ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling, if available, or dispose of empty container in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

[Option 3 – Nonrefillable HDPE Drum]

Nonrefillable container. Do not reuse or refill this container. Completely empty container into application equipment. Triple rinse the container (or equivalent) promptly after emptying. Triple Rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container $\frac{1}{4}$ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling, if available, or dispose of empty container in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

STATEMENT OF WARRANTY AND DISCLAIMER

Seller warrants that the product conforms to the chemical description and is reasonably fit for the purpose stated on the label when used in accordance with the directions under normal conditions of use. To the extent consistent with applicable law, neither this warranty nor any other warranty of merchantability nor fitness for a particular purpose expressed or implied extends to the use of this product contrary to labeling instructions or under abnormal conditions, or under conditions not reasonably foreseeable to seller and buyer assumes the risk of any such use. It is further suggested that the customer complete independent testing of the finished product to validate pesticide claims. To the extent consistent with applicable law, any damages arising from a breach of this warranty shall be limited to direct damages and shall not include consequential commercial damages such as loss of profits or values or any other special or indirect damages.
