Subject: Notification per PRN 98-10 – Correct typographical error in symbol and brackets and
insertion of graphic in ART section
Product Name: 16HER016 GRANULES
EPA Registration Number: 92564-75
Application Date: April 29, 2020
Decision Number: 563448

Dear Ms. Pandya:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped “Notification” and will be placed in our records.

Should you wish to add/retain a reference to the company’s website on your label, then please be aware that the website becomes labeling under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product’s label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA’s Office of Enforcement and Compliance.

If you have any questions, please contact me at ondish.mindy@epa.gov or at (703)605-0723.

Sincerely,

A handwritten signature in black ink that reads "Mindy Ondish".

+ FIRST AID	
IF IN EYES:	Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
NOTE: Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may contact 877-229-3763 for emergency medical treatment information.	

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

- Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash waters or rinsate. 2,4-D and dicamba have properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

Dithiopyr is toxic to fish and highly toxic to other aquatic organisms including oysters and shrimp. Drift and runoff from treated turf may adversely affect aquatic organisms in adjacent aquatic sites

To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Sweeping any product that lands on a driveway, sidewalk, or street, back onto the treated area of the lawn or garden will help to prevent run off to water bodies or drainage systems. Do not apply when weather conditions favor drift from treated areas.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

<p>BEFORE USE</p> 	<p>RESTRICTIONS:</p> <ul style="list-style-type: none"> • Do not apply this product in a way that will contact any person or pet, either directly or through drift. Keep people and pets out of the area during application. • Do not allow people or pets to enter the treated area until dusts have settled. • Use this product only on established lawns listed[*] on this label – new lawns may be treated after the fourth mowing. Do not make sequential applications sooner than 30 days. • Apply only to actively growing turf. • Do not apply while turfgrass is just turning green in early spring. • Do not apply this product if the lawn appears unhealthy e.g., due to lack of water, diseases, heat stress, chemical injuries, etc. • Do not allow granules to come into contact with flowers, ornamental shrubs or trees, or other desirable broadleaf plants, as serious plant injury may occur. • Do not make more than two applications per site in any 12-month period. • Do not apply more than 2.4 lb. of this product per 1,000 sq. ft. per application. • Do not release spray at a height greater than 30 inches above the ground. <p>RESEEDING, OVERSEEDING, OR SPRIGGING</p> <p>Reseeding, overseeding, or sprigging of treated areas with this product should be delayed until 12 weeks from the time of application.</p> <p>Reseeding, overseeding or sprigging before 12 weeks after application may prevent establishment of desirable turfgrasses.</p> <p>When reseeding or overseeding, proper cultural practices such as soil cultivation, irrigation and fertilization should be followed.</p> <p>If overseeding with perennial ryegrass in the fall, overseed 8 weeks or later after a single application.</p>
<p>[WHERE TO USE]</p>	<p>Use only on established lawns of the following turf types: Bermudagrass**, Buffalograss, Kentucky Bluegrass, Ryegrass, Fescue, Seashore Paspalum and Zoysia.</p> <p>Do not use on Bahiagrass, Carpetgrass, annual bluegrass (<i>Poa annua</i>), bentgrass, Centipedegrass, St. Augustine grass (including Floratam) or Dichondra.</p> <p>**Application to Bermudagrass may cause temporary yellowing or discoloration but full recovery can be expected.</p>
<p>HOW TO USE</p> 	<ul style="list-style-type: none"> • Use rotary or drop type spreader to apply granules evenly over the lawn. To be sure you cover lawn areas uniformly, first treat the border of the lawn then fill in the center. Make parallel passes, walking at a steady pace to ensure even distribution of the granules. • If using a broadcast or rotary spreader, make sure each strip overlaps the previous strip to ensure complete coverage. (See Fig. A) • If using a drop spreader, make sure the wheels overlap the wheel marks in the grass from the previous strip to ensure complete coverage. (See Fig B.) • Sweep, brush, or blow any accidentally applied material off driveways, sidewalks etc. back on to the lawn. • After application, treated weeds may turn a slight purple color which is an indication that the herbicide is working.
<p>WHEN TO APPLY</p>	<ul style="list-style-type: none"> ○ This product may be applied as a single application or split applications in the spring and early summer or fall no closer than 30 days after the initial

<p>[FOR BEST RESULTS]</p> <p>[MOWING]</p> <p>[WATERING]</p>	<p>application.</p> <ul style="list-style-type: none"> • Apply in spring after the lawn is actively growing and has been mowed 2 times. • Apply in fall no closer than [2 weeks] [4 weeks] [6 weeks] [2-6 weeks] before the first historical frost date for your area. ○ For grassy weeds such as crabgrass apply in spring and/or early summer. For best results, apply two weeks before anticipated weed seed germination or when weeds are small and actively growing (when crabgrass is emerging and is visible in thin turf areas). ○ For broadleaf weed control, apply in spring and fall. • Apply when the air is calm to avoid drift onto desirable plants. ○ Apply when temperatures are between 50–90°F, and not above 85°F on Bermudagrass. ○ Lawns may be seeded 12 weeks after applying this product <ul style="list-style-type: none"> • [For best results,] apply to dew-wetted lawn. • [For best results,] apply when broadleaf weeds are young and actively growing. <ul style="list-style-type: none"> • If the lawn needs mowing, do it 1 to 2 days before (for best results) or 2 days after applying this product. • Clippings from the first three mowings should be left on the treated area. Do not use the clippings from the treated areas as mulch or compost around flowers, ornamentals, trees, or in vegetable gardens. <ul style="list-style-type: none"> • If lawn is dry, water 1 to 2 days before using this product. • Do not water for at least 24 hours after application or apply if rain is expected within 24 hours.
<p>HOW [IT] [THIS PRODUCT] WORKS</p>	<p>This product contains four proven weed killers to control lawn broadleaf listed[*] weeds & crabgrass, roots and all. Also, it prevents crabgrass and broadleaf weeds for three months by forming a barrier at the top layer of the soil. And it won't harm your lawn when used as directed. Listed[*] weeds begin to die in hours and are completely dead within 14-28 days. Plus, combined with fertilizer, feeds your lawn for quick greening and long-lasting feeding. Treated crabgrass starts to purple in 3 days – that's the sign that it's working.</p>
