OFFICE OF CHEMICAL SAFETY AND POLLUTION PREVENTION

February 15, 2017

Angie Custer Regulatory Affairs Specialist Kop-Coat, Inc. 3040 William Pitt Way Pittsburgh, PA 15238

Subject: Notification per PRN 98-10 – Updating Product Number on the Label

Product Name: Woodtreat CM EPA Registration Number: 92617-2 Application Date: 01/18/2017 Decision Number: 525701

Dear Ms. Custer:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 for the above referenced product. The Antimicrobials Division (AD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action requested falls within the scope of PRN 98-10.

The label submitted with the application has been stamped "Notification" and will be placed in our records.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

If you have any questions, you may contact Farzana Olla at 703-347-0190 or via email at olla.farzana@epa.gov.

Sincerely,

Stacey Grigsby, Acting Product Manager, 34 Regulatory Management Branch II

Antimicrobials Division (7510P)

tacey Grissy

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL PRECAUTIONS AND RESTRICTIONS:

CONSULT SAFETY DATA SHEET BEFORE USING

Woodfreat® CM is an excellent protective fungicide against a broad spectrum of fungi. When applied to freshly sawn lumber, Woodfreat® CM is effective as a protective fungicide against molds, and staining organisms. Freshly cut wood must betreated as soon as possible. Effective control requires complete coverage of the wood surface by the fungicide as a preventative application prior to development of fungal organisms. Wood which has been colonized by mold or sapstain fungi prior to treatment will not be protected. Freshly treated lumber must be protected from rain which will reduce the effectiveness of the treatment. This product may be used as a supplemental surface fungide on dry or partially seasoned wood to prevent stain and mold during storage, transport or holding in concentration yards. Extremely hot and humid conditions davor the development of molds and sapstain fungi. Underthese conditions, usethe higher recommended rate. Continuously agitate the mixture during treatment.

BULK DIP VATS - For bundles of lumber which are to be treated in a dip tank or vat, add at a rate of 2 gallons of Woodtreat® CM to 100 gallons of water. The lumber must remain in solution for at least one minute and all unbre surfaces should be exposed to the treating solution. Constant agilation of the dip vat solution is required to maintain a uniform suspension of the treatment materials in the tank. During dipring, the cut boards should be loosely bundled and/or stickered to allow maximum penetration of the treatment material into the bundle.

NON-BULK VATS - For Individual boards which are treated in across the-chain vats (non-bulk vats), add at rate of 1/2/to 2 gallons of to Woodtreat® CM 100 gallons of vat water. Continuously agitate the mixture during treatment.

LOW VOLUME SPRAY MACHINES—For individual boards which are treated in low volume spray machines, add 1/4 to 1 gallon of Woodfreel80 CM to 20 gallons of water. Smooth surfaced lumber normally retains only about onn-half as much fungicide solution as rough out wood and, therefore, needs the higher rate to deposit the necessary amount of fungicide on the wood. Constant agitation is required in nurse tank to maintain a uniform suspension.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Pesticide Storage: Store in a tightly sealed original container in a cool, dry well ventilated location inaccessible to persons unfamiliar with its use. Do not freeze. Open dumping is prohibited. In case of spills and leaks, stop source as soon as possible and notify appropriate personnel. Utilize emergency response personal protection equipment rior to cleaning spill or leak. Evacuate all nonessential personnel. Disposal of spill in accordance with Pesticid

Disposal instructions.

Pesticidio Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. It these wastes cannot be disposed of by use according to labe instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste represental tive at the nearest PEA Regional Office of guidance.

Container Handling: (For containers < 5 gallons) Nonrefiliable container. Do not reuse or refill this container

Container vanouing: ("or containers" or gainors) involvements of containers. On not retainer for equivalently promptly after emplying. Triple rinse container for equivalently promptly after emplying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ix full with water. Replace and tighten consures. To protainer on its side and roll it back and forth resuring at least one complete revolution for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Turn the or store insate for later use or disposal. Repeat this procedure two more times. Then ofter for recycling if available.

Container Handling: (For containers >5 gallons) Nonrefillable container. Do not reuse or refill this conta Thiplie insea as follows: Fill container 14 full with water. Tip container on its side and roll back it back and forth, ensuring at least one complete revolution for 30 seconds. Stand the container on its end and tip it back and forth forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the reinsate into the application equipment or mix tank or store reinsate for later use or disposal. Repeat this procedure two more times. Offer for recycling if available. If not, puncture and dispose of in a sanitary landfill.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER. Corrosive. Causes irreversible eye damage. Do not get in eyes, on skin, or on clothing. Wear protective eyewear. May be fatal if swallowed. Harmful if inhaled, Avoid breathing (dast, vapor or spray mist). Wash thoroughly with scap and water after handling and before eating, drinking, chewing gum, using lobaccor or using the biolar. Remove and wash contaminated colhining before reuse. Protonged or frequently repeated skin contact may cause allergic reaction in some individuals.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

- Applicators and other handlers of the liquid concentrate
 1. Goggles or safety glasses with faceshield
 2. Coveralls over long-sleeved shirt and long pants
- KEEP OUT OF REACH OF CHILDREN

 The applicant has certified that not changes, other than those reported to the Agency have been made to the labeling. The Agency acknowledges this notification by letter dated:

 02/15/2017

USER SAFETY REQUIREMENTS

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

 Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing

ENVIRONMENTAL HAZARDS

This product is toxic to fish, aquatic invertebrates, and marine/estuarine organisms. DO NOT discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. DO NOT discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the Environmental Protection Agency.

PHYSICAL OR CHEMICAL HAZARDS

This product is incompatible with other products (e.g. oxidizers, strong acids, and bases such as potassium permanganate) which could cause violent reaction if mixed together. Store in a cool dry ventilated location, away from oxidizers, head, flame, or other incompatible conditions. Keep containers() closed D not store near feed, food, or within the reach of children. Do not freeze. Keep product tightly sealed in original containers.

IN CASE OF FIRE

oam, dry chemical or carbon dioxide to extinguish fire.

LIMIT OF WARRANTY AND LIABILITY

We warrant this material to comply with our published specifications and to be of good merchantable quality and such as will regularly pass in the trade for goods within the description, and further warrant such goods to be fit for the normal purposes for which goods are used. We assume no responsibility that the goods concerned in this contract are fit for any particular purpose for which they are being bought outside of the general purposes of goods of the description.
