2. You are required to comply with the data requirements described in the DCI identified below:

a. Copper sulfate pentahydrate GDCI-024401-1268 You must comply with all of the data requirements within the established deadlines. If you have questions about the Generic DCI listed above, you may contact the Reevaluation Team Leader (Team 36): <u>http://www2.epa.gov/pesticide-contacts/contacts-office-pesticide-programsantimicrobial-division</u>

- 3. Make the following label changes before you release the product for shipment:
 - Revise the EPA Registration Number to read, "EPA Reg. No. 93647-1."
- 4. Submit one copy of the final printed label for the record before you release the product for shipment.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under the Federal Insecticide Fungicide and Rodenticide Act and is subject to review by the Agency. If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

If you fail to satisfy these data requirements, EPA will consider appropriate regulatory action including, among other things, cancellation under FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions. A stamped copy of the label is enclosed for your records. Please also note that the record for this product currently contains the following CSFs:

• Basic CSF dated 05/30/2018

If you have any questions, you may contact Joe Daniels at (703) 347-8669 or via email at daniels.joseph@epa.gov.

Enclosure

LAKE GUARD BLUE[™]

Algicide

A C C E P T E D 12/10/2018

Under the Federal Insecticide, Fungicide and Rodenticide Act as amended, for the pesticide registered under EPA Reg. No. 93647-1

ACTIVE INGREDIENT Copper sulfate pentahydrate†* ... 95.0% OTHER INGREDIENTS 5.0% TOTAL 100.0%

†CAS No. 7758-99-8 *Copper as metallic, 23.9%

KEEP OUT OF REACH OF CHILDREN DANGER / PELIGRO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

FIRST AID		
If in eyes	 Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for treatment advice. 	
If swallowed	 Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person. 	
lf on skin	 Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. 	
lf inhaled	 Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. 	
treatment. For Information Ce	uct container or label with you when calling a poison control center, doctor, or going for non-emergency information concerning this product, call the National Pesticides enter (NPIC) at 1-800-858-7378 (NPIC Web site: www.npic.orst.edu). For emergencies, n control center 1-800-222-1222.	
NOTE TO PH	YSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.	

EPA Reg. No. 93647-EPA Est. No. 93647-Net Contents: 10, 20, 25, 50, 2,204 lbs. Batch Code:

PRECAUTIONARY STATEMENTS Hazards to Humans and Domestic Animals

DANGER / PELIGRO

Corrosive. Causes irreversible eye damage. May be fatal if swallowed. Harmful if absorbed through skin or inhaled. Do not get in eyes, on skin, or on clothing. Avoid breathing dust. Wear protective eyewear, such as goggles, face shield, or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

For applications in waters destined for use as drinking water, those waters must receive additional and separate potable water treatment. Do not apply more than 1.0 ppm as metallic copper in these waters.

Environmental Hazards

This pesticide is toxic to fish and aquatic invertebrates. Waters treated with this product may be hazardous to aquatic organisms. Treatment of aquatic weeds and algae can result in oxygen loss from decomposition of dead algae and weeds. This oxygen loss can cause fish and invertebrate suffocation. To minimize this hazard, do not treat more than ½ of the water body to avoid depletion of oxygen due to decaying vegetation. Wait at least 14 days between treatments. Begin treatment along the shore and proceed outwards in bands to allow fish to move into untreated areas. Consult with the State or local agency with primary responsibility for regulating pesticides before applying to public waters, to determine if a permit is required.

Certain water conditions including low pH (\leq 6.5), low dissolved organic carbon (DOC) levels (3.0 mg/L or lower), and "soft" waters (i.e., alkalinity less than 50 mg/L) increases the potential acute toxicity to non-target aquatic organisms.

Personal Protective Equipment

Mixers, loaders, applicators, and other handlers must wear the following:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks
- Goggles or face shield

Some materials that are chemical-resistant to this product are polyvinyl chloride, nitrile rubber, or butyl rubber. If you want more options, follow the instructions for category A on an EPA chemical resistance category selection chart.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated by this product. Do not reuse them. Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

General information

Do not apply when wind speed favors drift beyond the area intended for treatment.

Do not apply to shallow water bodies less than three feet deep, or to areas where surface water is stagnant.

Water hardness, the temperature of the water, the type and amount of algae/cyanobacteria to be controlled, and the amount of water flow are to be considered in using Lake Guard Blue[™] to control algae/cyanobacteria. Algal growth is difficult to control with Lake Guard Blue[™] when water temperatures are low (less than 15.5°C) or when the water alkalinity is above 50 ppm. It is best to apply Lake Guard Blue[™] on a sunny day in the morning hours.

Application rates

Water bodies, such as impounded waters, lakes, ponds, and reservoirs contaminated with algae/cyanobacteria can be treated with Lake Guard Blue[™]. Monitor water bodies systematically for the presence of harmful algae/cyanobacteria. Evaluation of the bloom condition should be made by a professional. Begin treatment before algal/cyanobacterial cell numbers reach 20,000 cells/mL (=10 µg chlorophyll-a/liter). Do not treat heavy blooms (>20,000 cells per mL or >10 µg chlorophyll-a/liter) as it is most likely to cause a mass of death of cells to float which may result in bad odor and oxygen loss in the water column which in turn may cause fish kill. In order to minimize this hazard, it is advised not to cover more than one-half of the water surface in a single treatment and wait at least 14 days between treatments. NOTE: Use the lower recommended dose-rate in soft waters (less than 50 ppm methyl orange alkalinity) and the higher dose-rate in hard waters (above 50 ppm alkalinity). Always consult State Fish and Game Agency before applying this product to municipal waters. NOTE: The active ingredient in the Lake Guard Blue[™] is copper sulfate pentahydrate which becomes less effective with the increase of alkalinity. Its effectiveness is significantly reduced when the bicarbonate alkalinity exceeds 150 ppm.

Treatment is applied per surface area according to the table below. Determination of the infested area is performed as follows: (1) in small infested water bodies of less than 250 acres, obtain surface area by measuring of regular shaped water bodies or mapping of irregular water bodies or by reference to previously recorded engineering data or maps, (2) In water bodies larger than 250 acres (or smaller water bodies with a defined contaminated zone), calculate the required treatment rate based on the surface outline of the infested area.

Phylum	Treatment Rates*	
Cyanobacteria	2.2 to 17.8** lbs./acre	
Green algae	2.2 to 17.8** lbs./acre	
Diatoms	2.2 to 13.4** lbs./acre	
Protozoa (Flagellates)	2.2 to 17.8** lbs./acre	
* Use the lower recommended rate in soft waters (less than 50 ppm methyl		
orange alkalinity) and the higher rate in hard waters (above 50 ppm alkalinity).		
** In late-treated heavy infestations, the maximum Lake Guard Blue™		
application may reach as high as 35 lbs./acre as long as final copper ions		
concentration do not exceed 1.0 ppm.		
The minimum retreatment interval is 14 days.		

Application method

Apply Lake Guard Blue[™] using equipment designed for granular dusting. Dusting can be done manually from the bank, a boat, or from an airplane, depending on the total area of the water body and the optimal application strategy. Apply in small/medium water bodies (under 250 acres) from the edge of the water body, in upstream/downwind locations to minimize risk to the operator and allow the wind and currents to carry the particles alongside algae/cyanobacteria aggregates. When using a boat, apply the required rate downwind in the vicinity of algal/cyanobacterial concentrates. For large water bodies, apply treatment upstream/downwind using boats or aerial application at close proximity to algal/cyanobacterial's concentrations. Always apply the granules upstream/downwind to allow winds and currents to carry the algicide particles to the desired location around algae/cyanobacteria aggregation.

NOTE: If treated water is to be used as a source of potable water, the residual copper ions must not exceed 1 ppm (equals to ~4.0 ppm Lake Guard Blue[™]).

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. PESTICIDE STORAGE: Keep pesticide in original container. Do not use in food or drink containers. PESTICIDE DISPOSAL: Pesticide wastes may be hazardous. Improper disposal of excess pesticide, spray, mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment, then offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration.

Manufactured for: BlueGreen Water Technologies, Ltd. 43 Brodezki Street POB 39995 Tel Aviv, 6139803 Israel
