Dear Dana Lateulere:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6), you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

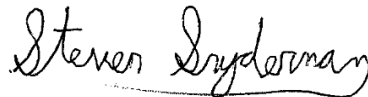

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6.

TO [CLEAN] [AND] [,] DISINFECT [AND DEODORIZE] HARD, NONPOROUS SURFACES: If present, use a wipe to remove visible soil prior to disinfecting. Unfold [a] [clean] wipe and thoroughly wet surface. Allow surface to remain visibly wet for contact time(s) listed on the label. Repeated use of wipe may be needed [Use enough wipes] to ensure that the surface remains visibly wet for contact time(s) listed on the label. Let air dry. A potable water rinse is required for food contact surfaces.

A precleaning step is required to kill *Mycobacterium bovis* BCG (TB). These directions also apply to *Mycobacterium bovis* BCG (TB) at 68°F (20°C). [If label includes cleaning claims for grease, soap scum, grime, dirt, messes, soil, add the following as the first sentence: A precleaning step is required for [grease], [soap scum], [grime], [dirt], [messes], [soil]].

[The following sets of directions are optional and for hospital/medical facility use only:

Tuberculosis (TB) [Outbreaks]: This product is effective against *Mycobacterium bovis* BCG (Tuberculosis) in one minute at 68°F (20°C). Unfold [a] [clean] wipe and thoroughly wet surface.

Allow surface to remain visibly wet for one (1) minute. Let air dry. For heavily soiled surfaces, use a wipe to

preclean prior to disinfecting. Although efficacy at a one (1) minute contact time has been shown to be adequate against TB, this time is not sufficient for other organisms on the label. For all other organisms see directions for contact times.

and/or

Ultrasound transducers and probes: For use on external surfaces of ultrasound transducers and probes only.

To disinfect: Preclean gel from external surface of ultrasound transducer or probe to be disinfected by using a clean washcloth. Then thoroughly wet the probe with a wipe. Allow surface to remain visibly wet for contact time(s) listed on the label. Use enough wipe(s), if needed, to ensure continuously visibly wet contact time(s) listed on the label. Repeated use of wipe may be needed [Use enough wipes] to ensure that surface remains visibly wet for contact time(s) listed on the label. Let air dry.

†SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS

Personal protection: When using this product, wear disposable protective gloves, protective gowns, masks and eye coverings [per facility protocol] when handling HIV-1 (AIDS Virus) infected blood or body fluids.

Cleaning procedure: All blood and other body fluids must be thoroughly cleaned from surfaces and objects before disinfection by the germicidal wipe. Open, unfold and use first germicidal wipe to remove visible soil.

Disposal of infectious materials: Used wipe, blood and other body fluids should be disposed of according to local regulation for infectious waste disposal.

Contact time: Use second germicidal wipe to thoroughly wet surface. Allow surface to remain visibly wet two (2) minutes, let air dry.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. *[Statement not required for residential or household use products.]*

Storage: Do not store near heat or open flame. When not in use keep center cap of lid closed to prevent moisture loss.

Towelette Disposal: Do not reuse towelette. Dispose of used towelette in trash. Do not flush in toilet.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Offer for recycling. If recycling is not available, put in trash collection.
