STORAGE AND DISPOSAL

STORAGE: Tightly close containers of unused Bactimos. Store in cool, dry place.
DISPOSAL: Do not reuse empty container. Perforate or crush and discard container according to local trash disposal regulations and in a safe place.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

APPLICATION RATES

Mosquito Larvae: 0.025, 0.05, or 0.1 mg product/liter (ppm) treated water (or) 0.125, 0.25, or 0.5 lb/acre for average 50 cm depth (or) 2.4, or 4.8 oz/Acre for average 20 inches depth. Use the higher rate in deeper, polluted, or brackish water and when larvae are nearly fully grown or in fourth instar. Apply in enough liquid to cover the area. Apply only when mosquitoes are laying and not pupae.

When mixing with water for spray application, partially fill the tank and add the required amount of BACTIMOS. Mix thoroughly and finish filling the tank. Aerate before use. Apply in a uniform way. Allow 24 hours minimum for control. Repeat treatments as needed.

Use water in spray application at recommended rates and 1 to 3 million of water per acre. Spray at low pressure.

Small Quantity Water Dilution Rates

Recommended Rate	Tablespoons per Gallon
------------------	------------------------

1/2 oz. or more of product in water	1
1/4 oz. or more of product in water	2
