Dear Jolynn Morris,

This letter acknowledges receipt of an amendment for the above-listed amended Special Local Need (SLN) registration pursuant to Section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. The original SLN registration permits use of the product Onager Miticide (hexythiazox) for control of Twospotted, Pacific, and Strawberry spider mites in alfalfa and clover grown for seed. This amended SLN updates the label by extending the expiration date to December 31, 2028.

The Agency has completed a review of this use and acknowledges the State's amended SLN registration. Please inform the registrant that we have placed a copy of the amended SLN label in our files. If you have any questions, please contact Stacey Groce via email at Groce.Stacey@epa.gov.
