**Subject:** FIFRA 24(c) Registration – SLN Amendment Acknowledgment Letter  
**SLN Registration Number:** LA130004  
**EPA Decision Number:** 582242  
**SLN Expiration Date:** 1/11/2024  
**Parent EPA Reg. No.:** 5481-681  
**Product Name:** Classic Herbicide  
**Active Ingredient:** Chlorimuron ethyl

Dear Mr. Johnson:

This letter acknowledges receipt of the amendment to the above-listed Special Local Need (SLN) registration pursuant to Section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended. The SLN registration permits use of Classic Herbicide (containing Chlorimuron ethyl) to control weeds in fields to be planted to sugarcane. This amendment is due to a transfer of the product to AMVAC but all other use directions remain unchanged from the previous label.

The Agency has completed a review of this amended use and acknowledges the State's amended SLN registration. Please inform the registrant that we have placed a copy of the SLN label in our files. If you have any questions, please contact Emergency Response Team member Andrea Conrath [(202) 566-2568; [conrath.andrea@epa.gov](mailto:conrath.andrea@epa.gov)].

Sincerely,

A handwritten signature in black ink, appearing to read "Eric Bohnenblust", is positioned above the typed name.

Eric Bohnenblust, Ph.D., Chief  
Minor Use and Emergency Response Branch  
Registration Division / Office of Pesticide Programs

**This label is valid until January 11, 2024 or until otherwise revised, amended, cancelled, or suspended.**

**Directions for Use**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Always read this label and the entire label on the product container before buying or using this product.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label for EPA Reg. No. 5481-681.

**Use Information**

**Application Rate:** Apply this product at 0.5 to 2.0 ounces per acre to fallow fields that will be planted to sugarcane.

**Restrictions:**

Do not apply to soils with a pH >7.5.

Do not make more than a single application of this product per crop per year.

Do not harvest sugarcane for 14 months after application of this product.

**Timing to Crop:** Make fallow applications of this product at least 60 days prior to sugarcane planting. Planting sugarcane fewer than 60 days following an application of this product may result in unacceptable crop response.

**Timing to Weeds:** For best weed control including yellow nutsedge and morningglory, applications should be made preemergence to newly prepared seedbeds that are free of clods and vegetation. If weeds are present at time of application, the addition of a burndown herbicide is recommended for improved postemergence control. Observe directions for use and precautions and restrictions on the label of the burndown herbicide.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

**Important:** Read the entire Directions for Use and the Conditions of Sale and Limitation of Warranty and Liability before using this product.
