

CANDIDATE LIST FOR ENDANGERED SPECIES EFFECTS DETERMINATIONS
for the time period July 1, 2003 to January 1, 2004

Fifteen determinations and requests for consultations, as appropriate, are scheduled for completion during this time period. Below are candidates the Agency anticipates it will consider during this 6-month time period. However, the Agency may, at its discretion, substitute other pesticides for those listed below. In order that the public may better focus their input, we have provided, for each candidate pesticide, the types of uses likely to be subject to review and the types of species for which potential effects may be assessed during this 6-month time period.

Candidates for Endangered Species Effects Determinations - 7/1/03 to 1/1/04		
PESTICIDE	USES	SPECIES
2,4-D	all	Pacific salmonids
atrazine	all	Pacific salmonids
azinphos methyl	all	Pacific salmonids
bromacil	rights-of-way	California salmonids
bromoxynil	all	Pacific salmonids
captan	all	Pacific salmonids
chlorothalonil	all	Pacific salmonids
dichlobenil	all	Pacific salmonids
disulfoton	all	Pacific salmonids
diuron	all	Pacific salmonids
ethoprop	all	Pacific salmonids
hexazinone	alfalfa, forest trees	California salmonids
iprodione	all	Pacific salmonids
naled	all	Pacific salmonids
pendimethalin	all	Pacific salmonids
phenamiphos	all	Pacific salmonids
phorate	all	Pacific salmonids
phosmet	all	Pacific salmonids
simazine	all	Pacific salmonids
terbacil	all	Pacific salmonids
triclopyr BEE	all	Pacific salmonids
