

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION IX

**75 Hawthorne Street
San Francisco, CA 94105-3901**

JUN 28 2004

**OFFICE OF THE
REGIONAL ADMINISTRATOR**

The Honorable Kenny C. Guinn
Governor of Nevada
Capitol Building
Carson City, Nevada 89701

Dear Governor Guinn:

Fine-particle pollution represents one of the most significant barriers to clean air facing our nation today. These tiny particles – about 1/30th the diameter of a human hair – have been scientifically linked to serious human health problems. Their ability to be suspended in air for long periods of time makes them a public health threat far beyond the source of emissions. An important part of our nation's commitment to clean, healthy air deals with reducing levels of this fine-particle or PM2.5 pollution.

In February, Nevada submitted its recommended boundaries for PM2.5 attainment and nonattainment areas. This letter is to inform you that at this time the EPA agrees with your recommendation that the entire State of Nevada be designated attainment/unclassifiable. We intend to make our final designations in November.

The Bush Administration has made the reduction of fine-particle pollution a critical element of a comprehensive national clean air strategy. This strategy includes EPA's recent rule to reduce pollution from nonroad diesel engines. This rule is an important component of EPA's efforts to help states and localities meet the more protective national fine-particle and 8-hour ozone air quality standards, and will allow many areas of the country to achieve cleaner air.

We look forward to a continued dialogue with you as we work together to implement the PM2.5 standard. Should you have any questions, I invite you to contact me or have your staff call Deborah Jordan (415-947-8715) at our Regional Air Office. Again, we congratulate you on the clean air fine-particle status that Nevada has achieved.

Sincerely,

A handwritten signature in black ink, appearing to read "Wayne Nasti".

Wayne Nasti
Regional Administrator
