

JENNIFER M. GRANHOLM
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF ENVIRONMENTAL QUALITY
LANSING

STEVEN E. CHESTER
DIRECTOR

December 18, 2007

VIA E-MAIL and U.S. MAIL

Ms. Mary Gade, Regional Administrator
United States Environmental Protection Agency
Region 5
77 West Jackson Boulevard (R-19J)
Chicago, Illinois 60604-3507

Dear Administrator Gade:

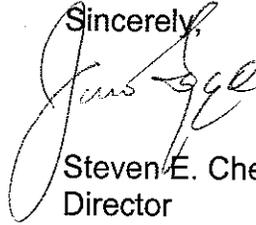

In response to the United States Environmental Protection Agency's (EPA's) request for designation recommendations on the revised 24-hour National Ambient Air Quality Standard (NAAQS) for fine particulate (PM_{2.5}) consistent with Section 107(a) of the Clean Air Act, the Michigan Department of Environmental Quality (MDEQ) hereby submits the attainment and nonattainment designation recommendation for areas of the state of Michigan with appropriate boundaries indicated. These recommendations are based on ambient air quality monitoring data for 2004-2006.

The MDEQ recommends that Wayne County be designated as a 24-hour PM_{2.5} nonattainment area. Wayne County should be a distinct and separate nonattainment area. The concentration of industrial source contributors on a microscale level to high PM_{2.5} days experienced in southwest Detroit and Dearborn indicate a need for a unique plan for this county. St. Clair County should also be designated as a separate nonattainment area, as there is some indication of significant contribution of emissions from Sarnia, Ontario on some high PM_{2.5} days. The counties of Monroe, Washtenaw, Livingston, Oakland, and Macomb should be designated as another separate nonattainment area. On the west side of Michigan, the MDEQ recommends that Kent County be designated as nonattainment. All other counties in Michigan should be designated as attainment. Enclosed is Table 1, which shows the PM_{2.5} 24-hour ambient air monitoring data for the 2004-2006, and Figure 1 shows the PM_{2.5} monitor network.

The MDEQ, along with the Southeast Michigan Council of Governments (SEMCOG), the Lake Michigan Air Directors Consortium, and scientific experts in the region, have been studying the PM_{2.5} situation in Southeast Michigan for several years. A much greater understanding of PM_{2.5} and source contribution has come of this effort and considerable progress has been made. At this time, only two monitors in Wayne County do not meet the annual PM_{2.5} NAAQS. We believe that the recommended separate nonattainment area designations would enhance flexibility in state planning and will in no way impair progress toward attaining and maintaining the annual or the 24-hour standards.

If you have any questions regarding this submittal, please contact Mr. G. Vinson Hellwig, Chief, Air Quality Division, at 517- 373-7069, or you may contact me.

Sincerely,

Steven E. Chester
Director
517-373-7917

Acting

Enclosure
