OFFICE OF THE
REGIONAL ADMINISTRATOR

The Honorable Togiola T. A. Tulafono, Governor
Territory of American Samoa
Executive Office Building
Pago Pago, American Samoa 96799

Dear Governor Tulafono:

This letter is to advise you that EPA intends to designate the Territory of American Samoa as attainment/unclassifiable for the 2006 24-hour fine particle (PM_{2.5}) health standard. We are aware that there currently are no PM_{2.5} monitors in American Samoa and therefore, lacking data, EPA will use the attainment/unclassifiable designation for your area. This designation will not impose on American Samoa any additional responsibilities with regard to the revised fine particle standard. The designation for American Samoa will appear in Part 81 of the Code of Federal Regulations. If you would like to provide additional information about the PM_{2.5} status of American Samoa, please provide it to us by October 20, 2008.

Although American Samoa does not currently have monitors for fine particulates, we think the population in American Samoa would be interested to learn that fine particle pollution represents one of the most significant barriers to clean air facing our nation today. Health studies link these tiny particles – about 1/30th the diameter of a human hair – to serious human health problems including aggravated asthma, increased respiratory symptoms such as coughing and difficult or painful breathing, chronic bronchitis, decreased lung function, and even premature death in people with heart and lung disease. Fine particle pollution can remain suspended in the air for long periods of time and create public health problems far away from emission sources. Reducing levels of fine particle pollution is an important part of our nation's commitment to clean, healthy air.

We intend to make final designation decisions for the 2006 24-hour PM_{2.5} standards by December 18, 2008. If you have any questions, please do not hesitate to have your staff contact Deborah Jordan, Air Division Director, at 415-947-8715. We look forward to a continued dialogue with you as we work together to implement the PM_{2.5} standards.

Sincerely,

A handwritten signature in black ink, appearing to read "Wayne Nasti".

Wayne Nasti
Regional Administrator
