

**AUTHORIZATION TO DISCHARGE UNDER THE
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM
INDUSTRIAL PERMIT NO. DC0000141**

Permit Modification No. 1

Issuance Date:

Effective Date:

In compliance with the provisions of the Clean Water Act, as amended, 33 U.S.C. §1251 et seq. (the "Act"),

Naval District Washington

is authorized to discharge from a facility located at

Washington Navy Yard
1014 N Street, SE Suite 320
Washington, DC 20374

to receiving waters named

Lower Anacostia River

in accordance with effluent limitations, monitoring requirements and other conditions set forth herein.

This permit and the authorization to discharge shall expire 5 years from the date of issuance, unless the permittee has submitted a complete and timely application for a new permit, and EPA, through no fault of the permittee, does not issue a new permit before the expiration date of this permit.

Signed this day of

Jon M. Capacasa, Director
Water Protection Division
U.S. Environmental Protection Agency
Region III

Fecal Coliform Study

- Within 60 days of the effective day of the Permit Modification No. 1, the Naval Support Activity Washington (NSAW) shall submit a copy of the Fecal Coliform Source Study plan specified in Task 9 of the work assignment for the NSAW Contract No. N40080-09-D-0499. The plan shall include a description of the assessment methodology and the sampling plan. As specified in the work assignment the sampling plan shall include sampling locations, analytes required, field procedures, and laboratory procedures, information about blank and duplicate samples as well as external samples of the Anacostia River at the discharge points, upstream of the discharge points and downstream points for comparisons. Also, the sampling shall be conducted during rain events with magnitude ranging from 0.3 and 0.5 inches.
- The permittee shall submit with its Discharge Monitoring Report the number of samples that were collected in compliance with the study specifications.
- Six months after the completion of the 13 sampling events, the permittee shall submit a report identifying the sources of fecal coliform at the Washington Navy Yard. If the sources of fecal coliform are anthropogenic, the permittee shall submit an action plan with a detailed schedule to address the identified sources.
- This study shall be completed as soon as possible but no later than three years from the effective date of the Permit Modification No. 1.
- The permittee shall submit quarterly progress report to EPA Region III and DC DOE indicating status of the interim compliance milestones listed above.
- No later than 14 days following each interim compliance date and the final date of compliance, the permittee shall notify the Director and DCDOE in writing of its compliance or non compliance with the with the interim and final compliance dates specified above.
