## Current Progress at the Site

---

---

This facility is one of EPA Region III's high priority RCRA corrective action sites. In the next ten (10) months the State, EPA and/or EPA's contractor will be conducting an Environmental Indicator (EI) inspection at this facility to determine if RCRA Corrective Action is necessary.

EPA and the State will be discussing the possibility of the State conducting this inspection as part of EPA's work share program. After the inspection is completed the data gathered will be evaluated. If releases are identified, it will determine whether or not a facility investigation or any clean-up measures are necessary to protect human health and the environment.

## Site Responsibility

---

---

RCRA Corrective Action activities at this facility are being conducted under the direction of EPA Region 3 with assistance from the State.

## Institutional Controls

---

---

Institutional controls are not required at this time.
