## Status

---

This is a new site to the RCRA Corrective Action program. Region 3, with its State partners, is in the process of conducting site visits at new sites, not previously evaluated. The facility has been assigned to a project manager to initiate corrective action activities, as necessary, to ensure protection of human health and the environment.

EPA has reviewed the files and there is not enough information to determine the Corrective Action status of the facility. Once the site visit is complete and a report is submitted, EPA will review and determine if further corrective action is necessary to ensure protection of human health and the environment.
