

A portion of Pompton Lake and the Lakeside Avenue shoreline will be involved in a major cleanup project
The project may take multiple years

The purpose of the project is to remove contamination originating from the DuPont Pompton Lakes Works plant

You need to get the facts, ask questions, and give your feedback

DuPont is sponsoring two Informational Poster Sessions at the High School Gymnasium on
Wednesday July 20 from 3:00pm – 5:00pm and again from 7:00pm – 9:00pm

DuPont is seeking input from the community on the following areas

- Work area containment process
- Potential work area layout (e.g., equipment and material staging areas)
- Material removal processes
- Material stabilization process
- Material transport process (e.g., traffic flow, equipment access, etc.)
- Work area monitoring programs
- Safety plan elements for the expanded work area (e.g., pedestrian traffic, security, etc.)
- Restoration elements

This is your opportunity to get informed and state your opinion...PLEASE ATTEND
