 - d) Operation of Municipal facilities such as Coliseum, baseball stadium and other sports fields, etc.
 - e) Maintenance of Municipal roads which includes asphalt pavement and construction of curl and side walk.
8. The estimate of square mileage serve is of 7,496.
9. Description of Best Management Practices to be implementing by the Municipality is the following.

a) Public Education and out reach on storm water impacts.

The Municipality will implement a public education program into the different residential communities and commercial facilities to explain the impacts of the contamination of storm water discharge on water bodies and aware the public of how they can reduce pollutants in storm water runoff. A similar program is already established in the Municipality for the recycling program and we will use the same schedule and program to educate the public about this matter.

b) Public Involvement Participation

The Municipality will promote the public participation providing seminar and meeting with civil and social clubs in Moca such as Lions Clubs, Sertona Club, JCI and other organization. They can assist the Municipality providing space in their meeting to comment the storm water Management Plan. Also, the Municipality will establish a storm water management panel.

c) Illicit Discharge Detection and Elimination

The Municipality will establish and implement an ordinance and regulations to enforce the compliance with the storm water regulations. The Municipality will train personnel to provide assessment of commercial activities in order to detect illegal discharge or dumping activities into the storm water system.

d) Construction site storm water run off control.

The Municipality will delegate to the Planning and Permits office the enforcement of construction activities conducted by third parties. The planning and Permits office will request to construction activities copies of the EQB erosion control permits and will performed random inspection to verify compliance with the EQB Permit.

e) Post-Construction storm water management in New Development and Redevelopment

The Municipality will develop, implement and enforce a program to address storm water runoff from new development and redevelopment project that disturb greater than or equal to one acre, and project less than one acre that are part of a larger common plan of development or sale.

The municipality will request to developer structural and non-structural Best Management Practices.

f. Pollution Prevention/Good Housekeeping for Municipal Operations

The Municipality of Moca will develop and implement an operation and maintenance program that includes a training component and has ultimate goal of preventing or reducing pollutant run off from municipal operations.

10. Description of the measurable goals for each BMP will be presented is the next 60days.
11. The person responsible for implementing or coordinating the storm water management program is:

Mr. Wilson Roman
Planning and Permit Office Director
