

10 CSR 10-5.240 Additional Air Quality Control Measures May Be Required When Sources Are Clustered in a Small Land Area

(1) Areas to Which This Regulation Applies.

(A) This regulation shall apply to areas in which there are one (1) or more existing sources and/or proposed new sources of particulate matter in any circular area with a diameter of two (2) miles (including sources outside metropolitan areas) from which the sum of particulate emissions allowed from such sources by regulations of general application are or would be greater than two thousand (2,000) tons per year or five hundred (500) pounds per hour.

(B) This regulation shall apply in areas in which there are one (1) or more existing sources and/or proposed new sources of sulfur dioxide in any circular area with a diameter of two (2) miles from which the sum of sulfur dioxide emissions from such sources allowed by regulations of general application are or would be greater than one thousand (1,000) tons for any consecutive three (3) months or one thousand (1,000) pounds per hour.

(2) Air Conservation Commission May Prescribe More Restrictive Air Quality Control Measures. In areas where this regulation applies, as specified in section (1) herein, the Air Conservation Commission may prescribe air quality control requirements that are more restrictive and more extensive than provided in regulations of general application.
