Re: Approval of Closure Report for 21st Century Environmental Management Inc., 25
Graystone St., Warwick

Dear Mr. Stiller:

The Office of Waste Management (OWM) has reviewed the Hazardous Waste Closure Report for the above site prepared by LFR Levine-Fricke received on September 26, 2000. On November 20, 2000 this Office requested clarification on certain items in that report. We have also reviewed your responses to our comments submitted on March 19, 2001.

Based upon the data contained in these submittals, the Department has concluded that the above referenced reports have met the requirements for closure of a RCRA site and such closure is therefore approved. Our determination of closure is based on the information submitted in the previously referenced reports. Be advised that the Department reserves the right to require further actions should any of the following occur:

- Conditions at the site, previously unknown to the Department are discovered;
- Information, previously unknown to the Department becomes available;

Nothing in this approval relieves the responsible party nor the site from compliance with all other applicable State or Federal regulations.

If you have further questions regarding this issue please contact Mark Dennen at (401) 222-2797 extension 7112.

Sincerely,

Mark M. Dennen
Sr. Environmental Scientist
Office of Waste Management
