Boston, Massachusetts 02114-2023

**Re: Private Well Survey For the Lake Success Business Park (Bridgeport, CT)**

Dear Ms. Carr:

As part of EPA's Corrective Action Program, Sporting Good Properties (SGP) is required to evaluate the environmental indicator status for human exposure (EI 725) at the Lake Success Business Park (LSBP) site. The intent of the EI 725 is to demonstrate that there are no unacceptable human exposures to contamination that can reasonably be expected under current land and groundwater use conditions. As part of this evaluation for LSBP, SGP conducted an extensive evaluation of groundwater use by residents adjacent to LSBP (within one quarter mile). The results of this evaluation show that all but nine residents within the quarter mile search area are served by public water. The nine who are not are upgradient of the site in Stratford. Therefore, for the purpose of the EI 725, groundwater use in the area is not considered a complete pathway. The following paragraphs describe the evaluation process in detail.

Groundwater, a media requiring evaluation, is impacted at the site in isolated areas. To evaluate the potential for exposure to off-site receptors from groundwater impact around the LSBP site, SGP compiled a master list of 3,075 residential and business addresses on nearby streets.

The master list was developed through an extensive search of each residential and commercial address within one-quarter mile of the site. To accomplish this task, the streets in Bridgeport and Stratford were located and plotted on maps for the Lake Success Business Park. Each of the streets were driven, and addresses for each property observed were recorded manually. In the instance where a building had several tenants such as a business or multi family home, each of the addresses were noted. This process was conducted until all of the streets within a one-quarter mile radius were verified and recorded.

The master list was compared to a service list provided by Bridgeport Hydraulic Company (BHC), the local water supplier, to determine which residences and businesses are served by public water. A total of 2,094 addresses were immediately confirmed as BHC customers. The 981 remaining addresses on the master list, those that did not appear on the service list from BHC, were investigated to verify they existed and to determine if they were associated with a property that did appear on the BHC list (e.g., a duplex, an apartment complex).

URS Corporation  
Barley Mill Plaza, Building 27  
4417 Lancaster Pike  
Wilmington, DE 19805  
Tel: 302.992.4366  
Fax: 302.892.7643

In the Town of Stratford, several streets on the list included 201 residences on Baird Court, Bullard Court, Cupheag Crescent, Fisher Court, Hull Court, Marsh Way, Singer Court, Underwood Court, and addresses between 800 and 1180 Success Avenue. The 201 residences are all part of a housing complex for which the management office is the BHC service address. The 201 addresses were removed from the remaining total reducing the list to 780. Additionally, 40 addresses were determined to be a part of two apartment complexes on Kingsbury Road and Granfield Avenue in Bridgeport. 267 addresses on Louisiana Avenue, Mencil Circle, Nob Hill Circle, Pennsylvania Avenue, Texas Avenue, and Virginia Avenue comprise the Nob Hill Condominium complex, which was confirmed as being served by BHC. Removing these 307 addresses from the master list reduced the number of outstanding properties to 473.

The approximate locations of the 473 addresses were mapped on "map quest." 176 addresses were found to be greater than ¼ mile from the site (the immediate area of interest), hydraulically upgradient, or both, leaving 297 addresses for investigation.

During drive by and visual survey of the remaining properties, 33 properties were not located. No structures were evident nor information available to determine what or where these properties were. This reduced the list to 264 addresses.

The remaining 264 addresses on the master list were sent again to BHC's Water Quality Management office for comparison to records in their database of water service installations. Bridgeport Hydraulic Company confirmed that 245 of the addresses received their service. (71 addresses were confirmed as multi-family residences for which BHC provided service to a different address also contained in the same building. It is assumed that in these situations, water is supplied to each of the residences in the unit but billed through only one occupant.) This reduced the total number of addresses to be investigated to 19.

Records from the tax assessors' offices of the Town of Stratford (five addresses) and the City of Bridgeport (19 addresses) were reviewed to determine if any information was contained therein about utility service to the properties. The Tax Assessors' records contained no information concerning water service to the properties but were useful in determining the correct address of several properties. The five Stratford addresses, initially believed to be on Claudia Drive were actually on Stonybrook Road. Bridgeport Hydraulic Company confirmed that they do serve the five properties in question on Stonybrook Road.

Based upon the new location information for the 19 remaining Bridgeport properties, an additional visual survey was performed to locate each and any other addresses associated with them. Eighteen of the 19 outstanding addresses were identified and are associated with properties for which BHC service was confirmed. According to the City of Bridgeport Tax Assessors records, the Bridgeport Housing Authority owns the last outstanding property at 75 Stewart Street in Bridgeport where they operate an elderly housing center. The Bridgeport Housing Authority was contacted by phone and confirmed that BHC provides water service to this address.

With the exception of nine homes upgradient of the site in Stratford, all residences and businesses within 1/4 mile from the site are served by public water.

The database (see attachment) lists each of the addresses in the evaluation and the status of water supply. The 2,094 addresses that are listed as their respective addresses are those confirmed initially by BHC to be customers served by public water. The remaining 981 addresses follow with appropriate designations of the type of use of the site (multi-family, apartment, business, etc.) or location (upgradient of site, > 1/4 mile from the site) or confirmation that the individual address is a BHC customer.

If you have any questions concerning this evaluation, please do not hesitate to contact our office at (203) 576-1829.

Very Truly Yours,

Scott F. Martin, LEP, CHMM  
Project Manager

## Legend of Descriptions for "BHC Service Listing Or Property Status"

Where Property Address Is Listed (i.e. 33 ALPINE ST)	Indicates that a property was confirmed as a BHC customer in the initial review by the water company.
Address could not be located	Indicates an address could not be located after several attempts to visually verify the existence the address.
Multi-Family Residence	Indicates an address is part of a multi-tenant residential building with water service to one of the addresses.
BHC Confirmed Customer	Indicates an address was omitted from the initial 2,094 service addresses confirmed by Bridgeport Hydraulic Company (BHC). However, the address was confirmed as an address receiving public water service in a subsequent review by BHC.
Address is > 1/4 Mile From LSBP	Indicates that a property address is greater than 1/4 mile from the LSBP site and is therefore outside the area of interest. No further attempt was made to locate the property or confirm water service once the property was deemed outside the area of interest.
Location is Upgradient Of LSBP	Indicates that a property is hydraulically upgradient of the LSBP site and therefore would not be potentially impacted by groundwater from the site. No further attempt was made to locate the property or confirm water service once the property was determined to be upgradient.
