G. ADDITIONAL DESCRIPTION:

Mike Robertson of NEDT called back to update that they had inspected the storm drains, and found they were impacted. The first storm drain had free product, the second had a sheen.

They are getting a vac truck to remove the free product, and will install boom at the discharge of the storm drain - a retention pond. They believe the water level in the storm drain is high enough such that removal of sediments in the storm drains will not be necessary, but they will assess the need to.
